Discrepancy: This subject seems to have completed the study and one source states this. The subject did miss the Week 16 visit, but seems to have made the timing for the Week 28 visit to complete the EOS procedures.

Internal Comment: This subject completed the study about 1 week later than 28 weeks? Why would this be Early Term? The subject deviated by not completing Week 16, but it does appear that he/she did complete the study. Please check source and amend this page as needed.
