

MAR COR
SERVICES, INC.

MAY 28 1986

K945559

SUMMARY

Mar Cor Services, Inc., has developed a complete water treatment system for kidney dialysis. This system is equivalent to such other commercial water treatment systems as the Water Pure RO System (K# 873487) and the C.D. Medical, Inc., Drake Willock RO Water Treatment System (K# 894106), and other comparable water treatment systems.

Mar Cor Services, Inc., is confident that this water treatment system is comparable to existing water treatment systems for kidney dialysis, providing a system that, from the incoming water supply, treats the water through a number of system components and carries it to the point where it enters the individual kidney machines.

Through this 510(k) notification, Mar Cor Services, Inc., requests that its Complete Water Treatment System for Kidney Dialysis be granted substantial equivalence to other water treatment systems currently on the market.
