Re: P990045  
DiaSorin ETI-AB-COREK PLUS Assay  
Filed: July 2, 1999  
Amended: September 9 and October 4, 1999; February 3, February 8, April 26, June 13, and  
June 23, 2000; and March 27, 2001

Dear Ms. Smith:

The Center for Devices and Radiological Health (CDRH) of the Food and Drug Administration (FDA) has completed its review of your premarket approval application (PMA) for the DiaSorin ETI-AB-COREK PLUS Assay. This device is indicated for:

ETI-AB-COREK PLUS is an *in vitro* enzyme immunoassay (EIA) intended for use in the qualitative determination of total antibodies to hepatitis B core antigen (anti-HBc) in human serum or plasma (EDTA, citrate or heparin). The ETI-AB-COREK PLUS is intended for manual use and with the Biochem Immunosystems Labotech/ETI-LAB automated instrument.

The detection of total anti-HBc is indicative of a laboratory diagnosis for exposure to hepatitis B virus (HBV) infection. Further HBV serological marker testing is required to define the specific disease state. The ETI-AB-COREK PLUS assay's performance has not been established for the monitoring of HBV disease or therapy.

We are pleased to inform you that the PMA is approved subject to the conditions described below and in the "Conditions of Approval" (enclosed). You may begin commercial distribution of the device upon receipt of this letter.

The sale, distribution and use of this device are restricted to prescription use in accordance with 21 CFR 801.109. Expiration dating for this device when stored at 2 - 8 °C has been established and approved at 7 months.

In addition to the postapproval requirements in the enclosure, the following two postapproval studies are required:

1. Within 6 months of this approval, we request that you submit a reproducibility study for the Biochem Immunosystems Labotech/ETI-Lab automated instrument.
2. To address the concerns made by the FDA advisory panel regarding the retrospective nature of your clinical studies, within 2 years of this approval, we request you submit the results of an additional prospective clinical study. We suggest that this study involve individuals that may be considered representative of an U.S. population, i.e., similar prevalence of HBV disease and serotypes.

CDRH will notify the public of its decision to approve your PMA by making available a summary of the safety and effectiveness data upon which the approval is based. The information can be found on the FDA CDRH Internet Home Page located at <http://www.fda.gov/cdrh/pmapage.html>. Written requests for this information can also be made to the Dockets Management Branch, (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, Maryland 20852. The written request should include the PMA number or docket number. Within 30 days from the date that this information is placed on the Internet, any interested person may seek review of this decision by requesting an opportunity for administrative review, either through a hearing or review by an independent advisory committee, under section 515(g) of the Federal Food, Drug, and Cosmetic Act (the act).

Failure to comply with the conditions of approval invalidates this approval order. Commercial distribution of a device that is not in compliance with these conditions is a violation of the act.

You are reminded that, as soon as possible and before commercial distribution of your device, you must submit an amendment to this PMA submission with copies of all approved labeling in final printed form. As part of our reengineering effort, the Office of Device Evaluation is piloting a new process for review of final printed labeling. The labeling will not routinely be reviewed by FDA staff when PMA applicants include with their submission of the final printed labeling a cover letter stating that the final printed labeling is identical to the labeling approved in draft form. If the final printed labeling is not identical, any changes from the final draft labeling should be highlighted and explained in the amendment. Please see the CDRH Pilot for Review of Final Printed Labeling document at <http://www.fda.gov/cdrh/pmat/pilotpmat.html> for further details.

All required documents should be submitted in triplicate, unless otherwise specified, to the address below and should reference the above PMA number to facilitate processing.
