510(k) SUMMARY: PATRIOT® SPACERS

Company: Globus Medical Inc.
2560 General Armistead Avenue
Audubon, PA 19403
(610) 930-1800

Contact: Christina Kichula
Group Manager, Regulatory Affairs

Date Prepared: July 13, 2012

Device Name: PATRIOT® Spacers

Classification: Per 21 CFR as follows:
§888.3080 Intervertebral Body Fusion Devices.
Product Code: MAX.
Regulatory Class II, Panel Code: 87.

Predicate(s): PATRIOT® Spacers (K072970, K093242, & K102313)
RISE™ (K113447)

Purpose:
The purpose of this submission is to request clearance for additional Signature® spacers with a modified articulation mechanism, additional Signature® spacers manufactured from titanium, and sterile lumbar PATRIOT® spacers.

Device Description:
PATRIOT® Spacers (Constitution® PLIF, Signature® TLIF, Continental® ALIF, and TransContinental® and TransContinental® M Spacers) are lumbar interbody fusion devices used to provide structural stability in skeletally mature individuals following discectomy. Each of the PATRIOT® spacers provides a different shape to accommodate various surgical approaches to the lumbar spine. The Constitution® PLIF Spacer is inserted using a posterior approach. The Signature® TLIF Spacer is inserted using a transforminal approach. The Continental® ALIF Spacer is inserted using an anterior approach. The Transcontinental® and Transcontinental® M Spacers are inserted using an anterior or lateral approach. The devices are available in various heights and geometric options to fit the anatomical needs of a wide variety of patients. These spacers are to be filled with autogenous bone graft material. Protrusions on the superior and inferior surfaces of each device grip the endplates of the adjacent vertebrae to resist expulsion.

PATRIOT® Spacers are made from PEEK radiolucent polymer (ASTM F2026) with titanium alloy or tantalum markers (ASTM F560). The Signature® R Spacer also includes an internal titanium alloy or commercially pure titanium (ASTM F67).
component, and the TransContinental® M Spacer also includes an integrated titanium alloy nut. The Signature® Ti Spacer is made from titanium alloy or commercially pure titanium. The titanium alloy is TAV (ASTM F136) or TAN (ASTM F1295).

**Indications for Use:**
PATRIOT® Spacers (Constitution® PLIF, Signature® TLIF, Continental® ALIF, TransContinental® and TransContinental® M Spacers) are interbody fusion devices intended for use in patients with degenerative disc disease (DDD) at one or two contiguous levels of the lumbosacral spine (L2-S1). DDD is defined as discogenic back pain with degeneration of the disc confirmed by history and radiographic studies. These patients should be skeletally mature and have had at least six (6) months of non-operative treatment. In addition, these patients may have up to Grade 1 spondylolisthesis or retrolisthesis at the involved level(s).

PATRIOT® Spacers are to be filled with autogenous bone graft material. These devices are intended to be used with supplemental fixation.

**Technological Characteristics:**
The technological characteristics of the PATRIOT® Spacer additional implants are similar to the predicate devices in terms of design, dimensions, intended use, materials, and performance characteristics.

**Basis for Substantial Equivalence:**
The PATRIOT® Spacer additional implants are similar to the predicate devices with respect to technical characteristics, material, performance, and intended use. Confirmatory static compression testing was conducted in accordance with ASTM F2077-03 with the subject device meeting all acceptable criteria. An engineering rationale was provided to demonstrate equivalence to the predicate device. Therefore, the information provided within this premarket notification supports substantial equivalence to the predicate devices.

Re: K122097
  Trade/Device Name: PATRIOT® Spacers
  Regulation Number: 21 CFR 888.3080
  Regulation Name: Intervertebral body fusion device
  Regulatory Class: Class II
  Product Code: MAX
  Dated: November 06, 2012
  Received: November 07, 2012

Dear Ms. Kichula:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set
forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Erin L. Keith
