

September 28, 1998

Mylan Pharmaceuticals Inc.
Attention: Frank R. Sisto
781 Chestnut Ridge Road
P.O. Box 4310
Morgantown, WV 26504-4310

Dear Sir:

Reference is made to your abbreviated new drug application dated June 6, 1997, submitted pursuant to Section 505(j) of the Federal Food, Drug, and Cosmetic Act for Terazosin Hydrochloride Capsules, 1 mg (base), 2 mg (base), 5 mg (base), and 10 mg (base).

Reference is also made to your amendments dated September 3, 1997; and January 30, February 6 and 24, July 16, and August 5, 1998.

We have completed the review of this abbreviated application and have concluded that, based upon the information you have presented to date, the drug is safe and effective for use as recommended in the submitted labeling. Therefore, the application is **tentatively approved**. This determination is based upon information available to the Agency at this time, (i.e., information in your application and the status of current good manufacturing practices of the facilities used in the manufacturing and testing of the drug product) and is, therefore, subject to change on the basis of new information that may come to our attention. This letter does not address notice issues related to the 180-day exclusivity provisions under section 505(j)(4)(B)(iv) of the Act.

The listed drug product referenced in your application is subject to periods of patent protection which expire on February 17, 2000 (patent 4,251,532), June 29, 2010 (patent 5,212,176), and April 29, 2013 (patents 5,504,207; 5,412,095; and 5,294,615), respectively. Your application contains certifications to each of these patents under Section 505(j)(2)(A)(vii)(IV) of the Act stating that to the best of Mylan's knowledge the patents are invalid, unenforceable or that your manufacture, use, sale, or offer for sale, or importation of Terazosin Hydrochloride Capsules will not infringe on the patents. Section 505(j)(5)(B)(iii) of the Act provides that approval shall be made effective immediately unless an action is brought for infringement of the patent(s) which are the subject of the certifications before the expiration of forty-five days from the

date the notice provided under paragraph (2)(B)(i) is received. However, you have notified FDA that litigation is underway in the United States District Court for the Northern District of Illinois, Eastern Division, involving a challenge to patent 5,504,207 (the '207 patent) (Abbott Laboratories, an Illinois Corporation, v. Mylan Pharmaceuticals Inc., Civil Action No. 97-C-5450 and 98-C-1280). Therefore, final approval cannot be granted until:

1. a. the expiration of the 30-month period provided for in section 505(j)(5)(B)(iii) since the date of receipt of the 45-day notice required under section 505(j)(2)(B)(i), unless the court has extended or reduced the period because of the failure of either party to reasonably cooperate in expediting the action, or,
 - b. the date of court decision [505(j)(5)(B)(iii) (I), (II), or (III)], which has been interpreted by the Agency to mean the date of the final order or judgement of that court from which no appeal can be or has been taken, or,
 - c. the patent has expired, and
2. The Agency is assured there is no new information that would affect whether final approval should be granted.

Because the Agency is granting a tentative approval for this application, when you believe that your application may be considered for final approval, you must amend your application to notify the Agency whether circumstances have or have not arisen that may affect the effective date of final approval. Your amendment must provide:

1. a copy of a final order or judgement from which no appeal may be taken (which might not be the one from the district court), or a settlement agreement between the parties, whichever is applicable, or a licensing agreement between you and the patent holder, or any other relevant information, and
2. a. updated information related to labeling or chemistry, manufacturing and controls data, or any other change in the conditions outlined in this abbreviated application, or
- b. a statement that no such changes have been made to the application since the date of tentative approval.

Any changes in the conditions outlined in this abbreviated application and the status of the manufacturing and testing facilities' compliance with current good manufacturing procedures are subject to Agency review before final approval of the application will be made.

In addition to, or instead of, the amendments referred to above, the Agency may, at any time prior to the final date of approval, request that you submit amendments containing the information requested above.

Failure to submit either or both amendments may result in rescission of this tentative approval determination, or delay in issuance of the final approval letter.

The drug product that is the subject of this abbreviated application may not be marketed without final Agency approval under Section 505 of the Act. The introduction or delivery for introduction into interstate commerce of this drug before the effective final approval date is prohibited under Section 501 of the Act. Also, until the Agency issues the final approval letter, these drug products will not be listed in the Agency's "Approved Drug Products with Therapeutic Equivalence Evaluations" list.

Validation of the regulatory methods has not been completed. It is the policy of the Office not to withhold approval until the validation is complete. We acknowledge your commitment to satisfactorily resolve any deficiencies which may be identified.

The amendment should be designated as a MINOR AMENDMENT in your cover letter. Before you submit the amendment, please contact Joseph Buccine, Project Manager, at (301) 827-5848, for further instructions.

Sincerely yours,

Douglas L. Sporn
