Food and Drug Administration
Silver Spring MD 20993

NDA 206042

TENTATIVE APPROVAL

Mylan Pharmaceuticals Inc.
Attention: Shane Shupe, Senior Manager, Regulatory Affairs
U.S. Agent for Mylan Laboratories Limited in India
781 Chestnut Ridge Road
P.O. Box 4310
Morgantown, WV 26504-4310

Dear Mr. Shupe:

Please refer to your New Drug Application (NDA) dated and received November 13, 2013, submitted pursuant to section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act, for the following drug product:

- Emtricitabine and Tenofovir Disoproxil Fumarate Tablets, 200 mg/300 mg Co-packaged with Nevirapine Tablets, 200 mg

We also acknowledge receipt of your submissions dated:

November 19, 2013	June 24, 2014	August 4, 2014
March 6, 2014	July 8, 2014	August 27, 2014
March 17, 2014	July 23, 2014	August 28, 2014

This NDA provides for the use of Emtricitabine and Tenofovir Disoproxil Fumarate Tablets, 200 mg/300 mg Co-packaged with Nevirapine Tablets, 200 mg alone or in combination with other antiretrovirals for the treatment of HIV-1 infection in adults and pediatric patients 12 years of age and older weighing at least 38 kg.

This NDA was reviewed under the President's Emergency Plan for AIDS Relief (PEPFAR).

We completed our review of this application. It is **tentatively approved** under 21 CFR 314.105 for use as recommended in the agreed-upon labeling (refer to the enclosed text for the package insert, medication guide, and blister pack and carton labels). Also refer to the agreed-upon labeling submitted on September 11, 2014, for the package insert and medication guide and your August 28, 2014, submission for the revised blister pack and carton labels. Based on the data provided, the expiration dating period is 24 months for Emtricitabine and Tenofovir Disoproxil Fumarate Tablets, 200 mg/300 mg Co-Packaged with Nevirapine Tablets, 200 mg in cartons containing (b) (4)

This determination is based upon information available to the Agency at this time [i.e., information in your application and the status of current good manufacturing practices (cGMPs) of the facilities used in manufacturing and testing of the drug product]. This determination is subject to change on the basis of any new information that may come to our attention.

The listed reference drug product [Truvada (emtricitabine and tenofovir disoproxil fumarate)] upon which you base your application is subject to a period of patent and exclusivity protection and therefore, final approval of your application under section 505(c)(3) of the Act [21 U.S.C. 355(c)(3)] may not be made effective until the period has expired. If you have questions as to when this date will be, please contact the Agency at the information provided below.

Two or six months prior to the expiration of the patent and exclusivity protection, as appropriate, submit an amendment to this application identifying changes, if any, in the conditions under which your product was tentatively approved. Any changes to the conditions outlined in this NDA require our review before final approval and the goal date for our review will be set accordingly. Your amendment should include updated labeling, chemistry, manufacturing and controls data, and a safety update. This amendment should include draft final printed labels and labeling which comply with all U.S. regulations (uniqueness of drug product appearance per 21 CFR 206; child-resistant packaging per 16 CFR 1700, etc.). This amendment should be designated clearly in your cover letter as a **“FINAL APPROVAL REQUESTED.”**

We remind you that you are expected to comply with the reporting requirements provided in 21 CFR 314.80 and 314.81. If the product is to be mass distributed in developing countries, a system of collecting and reporting adverse drug reactions by the distributor would be desirable (e.g., through governmental or nongovernmental agencies distributing the products).

We also remind you that, should you intend to market this product in the United States after the period of patent and exclusivity protection, you are required to comply with all applicable U.S. legislation, including the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), which requires that all NDAs, Biological License Applications (BLAs), or supplemental applications for new active ingredients, new indications, new dosage forms, new dosing regimens, or new routes of administration contain a pediatric assessment unless this requirement is waived, deferred, or inapplicable. A pediatric assessment contains data gathered from pediatric studies using appropriate formulations for each age group for which the assessment is required, and other data that are adequate to: 1) assess the safety and effectiveness of the product for the claimed indications in all relevant pediatric subpopulations and 2) support dosing and administration for each pediatric subpopulation for which the product has been assessed to be safe and effective. You must also join the antiretroviral pregnancy registry at that time and make the appropriate labeling change that references the existence of the pregnancy registry. In addition, an updated package insert (PI) must be submitted under the Structured Product Labeling requirements (<http://www.fda.gov/oc/datacouncil/spl.html>) as defined by the Physician's Labeling Rule [21 CFR 201.56, 201.57].

Until we issue a final approval letter, this NDA is not deemed approved. If you believe that there are grounds for issuing the final approval letter before the period of patents' protection has expired, you should amend your application accordingly.

Please note that this drug product may not be marketed in the United States without final Agency approval under Section 505 of the Act. The introduction or delivery for introduction into interstate commerce of this drug product before the final approval date is prohibited under Section 501 of the Act and 21 U.S.C. 331(d).

If you have any questions, please contact Monica Zeballos, Pharm.D., Senior Program Consultant, at (301) 796-0840 or email at monica.zeballos@fda.hhs.gov.

Sincerely yours,
