Dear Dr. Scalfarotto:

Please refer to your Supplemental New Drug Application (sNDA) dated and received on March 2, 2016, submitted under section 505(b) the Federal Food, Drug, and Cosmetic Act (FDCA) for Vizamyl™ (Flutemetamol F 18 Injection).

This “Changes Being Effected” supplemental new drug application provides for a change to the product package insert under, Section 2.5, “Image Interpretation”, to include text for image readers, as an option, to obtain “in-person training” in order to complete a Vizamyl image reader training program provided by GE Healthcare.

The following change was observed (underlined text = additions):

2.5 Image Interpretation

Vizamyl images should be interpreted only by readers who successfully complete the electronic or in-person training program provided by the manufacturer [*see Warnings and Precautions (5.2)*]. The objective of Vizamyl image interpretation is to provide an estimate of the brain β -amyloid neuritic plaque density, not to make a clinical diagnosis. Image interpretation is performed independently of a patient’s clinical features and relies upon recognition of image features in certain brain regions.
