EXCESS ACID: A BURNING PROBLEM

It is normal for the stomach to produce acid, especially after consuming food and beverages. However, acid in the stomach may move up into the wrong place (the esophagus), causing burning pain and discomfort that interfere with everyday activities.

Heartburn—Caused by acid in the esophagus

- Burning pain/discomfort in esophagus
- A valve-like muscle called the lower esophageal sphincter (LES) is relaxed in an open position
- Acid moves up from stomach

TIPS FOR MANAGING HEARTBURN

- Do not lie flat or bend over soon after eating.
- Do not eat late at night, or just before bedtime.
- Certain foods or drinks are more likely to cause heartburn, such as rich, spicy, fatty, and fried foods, chocolate, caffeine, alcohol, and even some fruits and vegetables.
- Eat slowly and do not eat big meals.
- If you are overweight, lose weight.
- If you smoke, quit smoking.
- Raise the head of your bed.
- Wear loose fitting clothing around your stomach.

A NON-PRESCRIPTION STOMACH MEDICINE

PEPCID COMPLETE combines an acid reducer (famotidine) with antacids (calcium carbonate and magnesium hydroxide) to relieve heartburn in two different ways: Acid reducers decrease the production of new stomach acid; antacids neutralize acid that is already in the stomach. The active ingredients in PEPCID COMPLETE have been used for years to treat acid-related problems in millions of people safely and effectively.

- **Just 1 tablet** relieves heartburn due to acid indigestion.

Shown actual size

2

Drug Facts (continued)

Use relieves heartburn associated with acid indigestion and sour stomach

Warnings

Allergy alert: Do not use if you are allergic to famotidine or other acid reducers

Do not use • if you have trouble swallowing • with other famotidine products or acid reducers

Ask a doctor or pharmacist before use if you are presently taking a prescription drug. Antacids may interact with certain prescription drugs.

Stop use and ask a doctor if • stomach pain continues • you need to take this product for more than 14 days

If pregnant or breast-feeding, ask a health professional before use.

Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

Directions
- adults and children 12 years and over:
  - **do not swallow tablet whole: chew completely**
  - to relieve symptoms, chew 1 tablet before swallowing
  - do not use more than 2 chewable tablets in 24 hours
- children under 12 years: ask a doctor

Pepcid® Complete

ANTACID + Pepcid AC = Pepcid Complete

The benefits of a chewable antacid | Acid control of Pepcid AC | A single tablet that both reduces and neutralizes acid.

Do not use if the individual pouch is open or torn.

Drug Facts

Active ingredients (in each chewable tablet)	Purpose
Famotidine 10 mg	Acid reducer
Calcium carbonate 800 mg	Antacid
Magnesium hydroxide 165 mg	Antacid

Use relieves heartburn associated with acid indigestion and sour stomach

Warnings

Allergy alert: Do not use if you are allergic to famotidine or other acid reducers

Do not use • if you have trouble swallowing • with other famotidine products or acid reducers

Ask a doctor or pharmacist before use if you are presently taking a prescription drug. Antacids may interact with certain prescription drugs.

Stop use and ask a doctor if • stomach pain continues • you need to take this product for more than 14 days

If pregnant or breast-feeding, ask a health professional before use.

Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

Directions

- adults and children 12 years and over:
  - **do not swallow tablet whole: chew completely**
  - to relieve symptoms, chew 1 tablet before swallowing
  - do not use more than 2 chewable tablets in 24 hours
- children under 12 years: ask a doctor

Other information

- read the directions and warnings before use
- keep the carton and package insert. They contain important information.
- store at 25-30°C (77-86°F) • protect from moisture

Inactive ingredients cellulose acetate, corn starch, dextrates, flavors, hydroxypropyl cellulose, hydroxypropyl methylcellulose, lactose, magnesium stearate, pregelatinized starch, red iron oxide, sodium lauryl sulfate, sugar

Pepcid Complete®

PACKAGE INSERT

Acid Reducer + Antacid

A non-prescription stomach medicine

PEPCID COMPLETE combines an acid reducer (famotidine) with antacids (calcium carbonate and magnesium hydroxide) to relieve heartburn in two different ways: Acid reducers decrease the production of new stomach acid; antacids neutralize acid that is already in the stomach. The active ingredients in PEPCID COMPLETE have been used for years to treat acid-related problems in millions of people safely and effectively.

- **Just 1 tablet** relieves heartburn due to acid indigestion.

Shown actual size

How to use PEPCID COMPLETE

Use PEPCID COMPLETE to relieve heartburn due to acid indigestion and sour stomach. Children under 12 years: ask a doctor

TO RELIEVE SYMPTOMS Chew **1 tablet** completely before swallowing.

PEPCID COMPLETE can be used up to twice daily (up to 2 chewable tablets in 24 hours).

Excess acid: a burning problem

It is normal for the stomach to produce acid, especially after consuming food and beverages. However, acid in the stomach may move up into the wrong place (the esophagus), causing burning pain and discomfort that interfere with everyday activities.

- **Heartburn—Caused by acid in the esophagus**

A valve-like muscle called the lower esophageal sphincter (LES) is relaxed in an open position

Burning pain/ discomfort in esophagus

Acid moves up from stomach

Tips for Managing Heartburn

- Do not lie flat or bend over soon after eating.
- Do not eat late at night, or just before bedtime.
- Certain foods or drinks are more likely to cause heartburn, such as rich, spicy, fatty, and fried foods, chocolate, caffeine, alcohol, and even some fruits and vegetables.
- Eat slowly and do not eat big meals.
- If you are overweight, lose weight.
- If you smoke, quit smoking.
- Raise the head of your bed.
- Wear loose fitting clothing around your stomach.

Proven effective in clinical studies

In clinical studies, PEPCID COMPLETE was significantly better than placebo pills in relieving heartburn.

Warnings

Heartburn and acid indigestion are common, but you should stop taking PEPCID COMPLETE and see your doctor promptly if:

- You have trouble swallowing or stomach pain continues.
- You need to take this product for more than 14 days.

You may have a serious condition that may need different treatment.

Important Allergy alert: Do not use if you are allergic to famotidine or other acid reducers.

- Antacids may interact with certain prescription drugs. If you are presently taking a prescription drug, ask a doctor or pharmacist before use.
- This product should not be given to children under 12 years old, unless directed by a doctor.
- **If pregnant or breast-feeding,** ask a health professional before use.
- **Keep out of reach of children.** In case of overdose, get medical help or contact a Poison Control Center right away.

Questions or comments?

Please call 1-800-755-4008 for more information and a guide on how to help control heartburn.
