

CellCept® Intravenous
(mycophenolate mofetil
hydrochloride for injection)
500 mg
4 Vials
NDC 0004-0298-09

NDC 0004-0298-09

CellCept® Intravenous
(mycophenolate mofetil
hydrochloride for injection)

CellCept Intravenous 500 mg vials must be reconstituted with 14 mL 5% Dextrose Injection USP. Further dilution of the content of the reconstituted vials with 5% Dextrose Injection USP is required to produce the infusion solution at the final concentration of 6 mg/mL. Refer to package insert for complete directions.

**OTHER INFUSION SOLUTIONS ARE NOT
RECOMMENDED FOR DILUTION.**

USUAL DOSAGE: For dosage recommendations and other important prescribing information, read accompanying insert.

Store powder and reconstituted/infusion solutions at 25°C (77°F); excursions permitted to 15°–30°C (59°–86°F).

COMMENCEMENT OF TREATMENT TO OCCUR WITHIN 4 HOURS FROM RECONSTITUTION AND DILUTION.

CellCept®
Oral Suspension
(mycophenolate mofetil
for oral suspension)

200 mg/mL

Each mL contains
200 mg mycophenolate mofetil
after constitution.

**Attention Pharmacist: Dispense
the accompanying Medication
Guide to each patient.**

R_xonly

Usual dosage: See package insert.

Net contents after constitution: 175 mL,
containing 35.0 grams mycophenolate mofetil.
Deliverable volume after constitution: 160-165 mL.

Phenylketonurics: Contains 0.56 mg
phenylalanine per mL after constitution.

To the pharmacist: Tap the closed bottle several
times to loosen the powder. Measure 94 mL of water
in a graduated cylinder. Add approximately half the
total amount of water for constitution to the bottle
and shake the closed bottle well for about 1 minute.
Add the remainder of water and shake the closed
bottle well for about 1 minute. Remove the child-
resistant cap and push bottle adapter
into neck of bottle. Close bottle with
child-resistant cap tightly. This will
assure the proper seating of the
bottle adapter in the bottle, and
child-resistant status of the cap.
Dispense with patient instructions and
oral dispensers. See enclosed patient
instructions for use of oral dispenser.
