

Inner Bag

NDC 66288-1100-1

# CEFAZOLIN For Injection, USP

**PHARMACY BULK PACKAGE  
NOT FOR DIRECT INFUSION**

**100** grams [ONE HUNDRED GRAMS] per Pharmacy Bulk Package Bag  
FOR INTRAVENOUS USE ONLY  
**NOT TO BE DISPENSED AS A UNIT**

Rx Only

Sterile, Nonpyrogenic, Preservative-Free

Each 100 gram Pharmacy Bulk Package contains sterile cefazolin sodium equivalent to 100 grams of cefazolin. The sodium content is 48 mg (2.1 mEq) per gram of cefazolin sodium.

Use this formulation only in patients who require a 1 gram dose.

Contains 100 doses (1 gram per dose). See package insert.

**Prior to reconstitution, store dry powder at 20° to 25°C (68° to 77°F). [See USP Controlled Room Temperature].** Protect from light.

After reconstitution, dilute and use promptly. **DISCARD BAG WITHIN 4 HOURS AFTER INITIAL ENTRY.** See package insert for full information.

**THIS PHARMACY BULK PACKAGE IS INTENDED FOR PREPARING MANY SINGLE DOSES IN A PHARMACY ADMIXTURE PROGRAM.**

Approximate Concentration	Amount of Sterile Water for Injection
1 gram/10 mL	960 mL

See package insert for detailed reconstitution, final dilution, and administration instructions.

**PROTECT FROM LIGHT. THE INNER BAG SHOULD BE RETAINED IN THE OUTER BAG UNTIL TIME OF USE.**

SmartPak system components are not made with natural rubber latex.

Manufactured in Italy for:

## HIGHLIGHTS OF PRESCRIBING INFORMATION

These highlights do not include all of the information needed to use Cefazolin for Injection, USP safely and effectively. See full prescribing information for Cefazolin for Injection, USP.

### CEFAZOLIN FOR INJECTION, USP

#### PHARMACY BULK PACKAGE - NOT FOR DIRECT INFUSION

Initial U.S. Approval: 1973

To reduce the development of drug-resistant bacteria and maintain the effectiveness of cefazolin and other antibacterial drugs, cefazolin should be used only to treat or prevent infections that are proven or strongly suspected to be caused by bacteria.

#### INDICATIONS AND USAGE

Cefazolin for Injection, USP is a cephalosporin antibacterial indicated in the treatment of the following infections caused by susceptible isolates of the designated microorganisms: Respiratory tract infections (1.1); urinary tract infections (1.2); skin and skin structure infections (1.3); biliary tract infections (1.4); bone and joint infections (1.5); genital infections (1.6); septicemia (1.7); endocarditis (1.8); and perioperative prophylaxis (1.9).

#### DOSAGE AND ADMINISTRATION

For intravenous use only over approximately 30 minutes. (2)

THIS IS A PHARMACY BULK PACKAGE – NOT FOR DIRECT INJECTION.

Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should be used only in patients who require a 1 gram dose and not any fraction thereof. Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should not be used in patients who require less than the 1 gram dose of cefazolin (2.1)

Site and Type of Infection	Dose	Frequency
Moderate to severe infections	500 mg to 1 gram	Every 6 to 8 hours
Mild infections caused by susceptible gram-positive cocci	250 mg to 500 mg	Every 8 hours
Acute, uncomplicated urinary tract infections	1 gram	Every 12 hours
Pneumococcal pneumonia	500 mg	Every 12 hours
Severe, life-threatening infections (e.g., endocarditis, septicemia)*	1 gram to 1.5 grams	Every 6 hours
Perioperative prophylaxis	1 gram to 2 grams	½ to 1 hour prior to start of surgery
	500 mg to 1 gram	During surgery for lengthy procedures
	500 mg to 1 gram	Every 6 to 8 hours for 24 hours postoperatively

\*In rare instances, doses of up to 12 grams of cefazolin per day have been used.

Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should be used only in patients who require a 1 gram dose and not any fraction thereof. Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should not be used in patients who require less than the 1 gram dose of cefazolin (2.1)

1

#### DOSAGE FORMS AND STRENGTHS

Pharmacy Bulk Package bags, 100 grams and 300 grams (3)

THIS IS A PHARMACY BULK PACKAGE – NOT FOR DIRECT INJECTION

#### CONTRAINDICATIONS

Hypersensitivity to cefazolin or other cephalosporin class antibacterial drugs, penicillins or other beta-lactams (4.1)

#### WARNINGS AND PRECAUTIONS

- Hypersensitivity reactions: Cross-hypersensitivity may occur in up to 10% of patients with a history of penicillin allergy. If an allergic reaction occurs, discontinue the drug. (5.1)
- Use in patients with renal impairment: Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should not be used in patients who require less than the 1 gram dose of cefazolin: Dose adjustment required for patients with CrCl less than 55 mL/min. (5.2)
- Clostridium difficile*-associated diarrhea: May range from mild diarrhea to fatal colitis. Evaluate if diarrhea occurs. (5.3)

#### ADVERSE REACTIONS

Most common adverse reactions: gastrointestinal (nausea, vomiting, diarrhea) and allergic reactions (anaphylaxis, urticaria, skin rash). (6)

To report SUSPECTED ADVERSE REACTIONS, contact Samson Medical Technologies, L.L.C. at 1-877-418-3600 or FDA at 1-800-FDA-1088 or [www.fda.gov/medwatch](http://www.fda.gov/medwatch)

#### DRUG INTERACTIONS

Probenecid may decrease renal tubular secretion of cephalosporins when used concurrently, resulting in increased and more prolonged cephalosporin blood concentrations. (7)

#### USE IN SPECIFIC POPULATIONS

- Pediatric Use:** This formulation of Cefazolin for Injection USP – Pharmacy Bulk Package bag, SmartPak® should not be used in pediatric patients who require less than the 1 gram adult dose of cefazolin. (8.4)
- Renal Impairment:** This formulation of Cefazolin for Injection USP – Pharmacy Bulk Package bag SmartPak® should not be used in renally impaired patients who require less than the 1 gram dose of cefazolin. Lower daily dosage of Cefazolin for Injection is required in patients with impaired renal function (creatinine clearance less than 55 mL/min.) (8.6)

See 17 for PATIENT COUNSELING INFORMATION

Revised 07/2013

#### FULL PRESCRIBING INFORMATION: CONTENTS\*

##### 1 INDICATIONS AND USAGE

- Respiratory Tract Infections
- Urinary Tract Infections
- Skin and Skin Structure Infections
- Biliary Tract Infections
- Bone and Joint Infections
- Genital Infections
- Septicemia
- Endocarditis
- Perioperative Prophylaxis

##### 2 DOSAGE AND ADMINISTRATION

- Adult Population
- Perioperative Prophylactic Use
- Patients with Renal Impairment

- Preparation for Use of Cefazolin for Injection, USP, Pharmacy Bulk Package bags SmartPak®

#### PATIENT COUNSELING INFORMATION

\*Sections or subsections omitted from the full prescribing information are not listed.

#### FULL PRESCRIBING INFORMATION

##### 1 INDICATIONS AND USAGE

To reduce the development of drug-resistant bacteria and maintain the effectiveness of cefazolin and other antibacterial drugs, cefazolin should be used only to treat or prevent infections that are proven or strongly suspected to be caused by susceptible bacteria. When culture and susceptibility information are available, they should be considered in selecting or modifying antibacterial therapy. In the absence of such data, local epidemiology and susceptibility patterns may contribute to the empiric selection of therapy.

Cefazolin for Injection is indicated for the treatment of the following infections when caused by susceptible bacteria.

##### 1.1 Respiratory Tract Infections

Respiratory tract infections due to *Streptococcus pneumoniae*, *Staphylococcus aureus* and *Streptococcus pyogenes*.

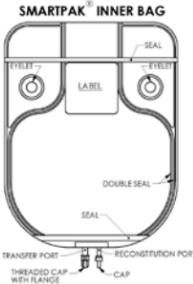

Injectable benzathine penicillin is considered the drug of choice in treatment and prevention of streptococcal infections, including the prophylaxis of rheumatic fever.

Cefazolin is effective in the eradication of streptococci from the nasopharynx; however, data establishing the efficacy of cefazolin in the subsequent prevention of rheumatic fever are not available.

3

#### INSTRUCTION FOR RECONSTITUTION OF THE PHARMACY BULK PACKAGE BAG SmartPak®

The entire contents of the bag and the preparation process (reconstitution and dilution) should be completed within 4 hours of initial entry.

- Document the date and time reconstitution starts in the designated place on the container label. The entire contents of the bag must be used within 4 hours from the time of initial entry.
- Remove the translucent unthreaded cap from the reconstitution (smaller) port and discard it.
- Reconstitute the powder through the reconstitution (smaller) port, using Sterile Water for Injection according to the table below

Reconstitution Table		
SmartPak® Bag Size	Amount of Sterile Water	Approximate Concentration
100 grams	960 mL	100 mg/mL (1 g/10 mL)
300 grams	2880 mL	100 mg/mL (1 g/10 mL)

- After reconstitution is complete, remove the transfer needle from the reconstitution port.
- Place the bag on a flat surface of a laminar flow hood and mix for at least 15 minutes for the 100 gram product or 25 minutes for the 300 gram product by rocking gently from side to side. **CAUTION: To avoid possible leakage caused by the heavy weight of the added water, do not shake vigorously or pull strongly on the bag.**
- When foam dissipates, visually inspect the bag to verify the solution is clear, colorless to pale yellow and free of particulate matter. **DO NOT USE THE INNER BAG IF PARTICULATE OR FOREIGN MATTER IS PRESENT.**
- Unscrew the clear threaded cap from the transfer (larger) port and discard it. Attach sterile tubing and filling adapter unit to the transfer port.
- Reconstituted solution can now be transferred using the transfer port and the filling adapter.

It should be noted that the spike placed into the transfer port of the Pharmacy Bulk Package SmartPak® is NEVER removed during this procedure and that the reconstitution port is self-sealing.

7

#### Urinary Tract Infections

Urinary tract infections due to *Escherichia coli* and *Proteus mirabilis*.

#### Skin and Skin Structure Infections

Skin and skin structure infections due to *S. aureus*, *S. pyogenes*, and *Streptococcus agalactiae*.

#### Biliary Tract Infections

Biliary infections due to *E. coli*, various isolates of streptococci, *P. mirabilis*, and *S. aureus*.

#### Bone and Joint Infections

Bone and joint infections due to *S. aureus*.

#### Genital Infections

Genital infections due to *E. coli* and *P. mirabilis*.

#### Septicemia

Septicemia due to *S. pneumoniae*, *S. aureus*, *P. mirabilis*, and *E. coli*.

#### Endocarditis

Endocarditis due to *S. aureus* and *S. pyogenes*.

#### Perioperative Prophylaxis

The prophylactic administration of cefazolin preoperatively, intraoperatively, and postoperatively may reduce the incidence of certain postoperative infections in patients undergoing surgical procedures which are classified as contaminated or potentially contaminated (e.g., vaginal hysterectomy, and cholecystectomy in high-risk patients such as those older than 70 years, with acute cholecystitis, obstructive jaundice, or common duct bile stones). The perioperative use of cefazolin may also be effective in surgical patients in whom infection at the operative site would present a serious risk (e.g., during open-heart surgery and prosthetic arthroplasty). If there are signs of infection, specimens for cultures should be obtained for the identification of the causative organism so that appropriate therapy may be instituted.

#### DOSAGE AND ADMINISTRATION

Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should be used only in patients who require a 1 gram dose and not any fraction thereof.

Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should not be used in patients who require less than the 1 gram dose of Cefazolin. THIS PHARMACY BULK PACKAGE REQUIRES RECONSTITUTION WITH STERILE WATER FOR INJECTION, USP TO A CONCENTRATION OF 100 mg per ml AND FURTHER DILUTION IN 50 mL OF A COMPATIBLE SOLUTION.

#### THIS IS A PHARMACY BULK PACKAGE - NOT FOR DIRECT INJECTION

USE THIS FORMULATION OF CEFAZOLIN ONLY IN PATIENTS WHO REQUIRE A 1 GRAM DOSE.

##### 2.1 Adult Population

Cefazolin for Injection, USP, Pharmacy Bulk Package bag SmartPak® should be used only in patients who require a 1 gram dose and not any fraction thereof.

Cefazolin for Injection USP, Pharmacy Bulk Package bag SmartPak® should not be used in patients who require less than the 1 gram dose of Cefazolin.

Cefazolin for Injection should be reconstituted with Sterile Water for Injection, USP to a concentration of 100 mg per mL and further diluted in 50 mL of a compatible solution. The recommended adult dosages are outlined in Table 1.

Cefazolin for Injection, USP, Pharmacy Bulk Package SmartPak® should be used only in patients who require a 1 gram dose and not any fraction thereof. Cefazolin for Injection should be administered intravenously (IV) over approximately 30 minutes.

4

#### Dilution

- Hang the bag from two eyelets.
- Following reconstitution, transfer 10 mL of the reconstituted solution into transfusion bags, each containing 50 mL of one of the compatible solutions below.
  - Compatible solutions for dilution are the following:
    - Sodium Chloride Injection, USP
    - 5% Dextrose Injection, USP
- Dilution should be completed within the 4 hour preparation process.
- When diluted according to the instructions above, cefazolin is stable for 24 hours at room temperature or for 10 days if stored under refrigeration (5°C or 41°F).

#### Administration

Prior to administration, parenteral drug products should be inspected visually for particulate matter and discoloration whenever solution and container permit.

#### DOSAGE FORMS AND STRENGTHS

- 100 grams Cefazolin for Injection, USP, Pharmacy Bulk Package bag SmartPak®
  - 300 grams Cefazolin for Injection, USP, Pharmacy Bulk Package bag SmartPak®
- THIS IS A PHARMACY BULK PACKAGE – NOT FOR DIRECT INJECTION

#### CONTRAINDICATIONS

4.1 Hypersensitivity to Cefazolin or the Cephalosporin Class of Antibacterial Drugs, Penicillins or Other Beta-lactams

Cefazolin for Injection, USP is contraindicated in patients who have a history of immediate hypersensitivity reactions (e.g., anaphylaxis, serious skin reactions) to cefazolin or the cephalosporin class of antibacterial drugs, penicillins or other beta-lactams [see *Warnings and Precautions* (5.1)].

#### WARNINGS AND PRECAUTIONS

##### 5.1 Hypersensitivity Reactions to Cefazolin, Cephalosporins, Penicillins, or Other Beta-lactams

Serious and occasionally fatal hypersensitivity (anaphylactic) reactions have been reported in patients receiving beta-lactam antibacterial drugs. Before therapy with Cefazolin for Injection, USP is instituted, careful inquiry should be made to determine whether the patient has had previous immediate hypersensitivity reactions to cefazolin, cephalosporins, penicillins, or carbapenems. Exercise caution if this product is to be given to penicillin-sensitive patients because cross-hypersensitivity among beta-lactam antibacterial drugs has been clearly documented and may occur in up to 10% of patients with a history of penicillin allergy. If an allergic reaction to Cefazolin for Injection, USP occurs, discontinue the drug.

##### 5.2 Use in Patients with Renal Impairment

This formulation of Cefazolin for Injection USP – Pharmacy Bulk Package bags SmartPak® should not be used in renally impaired patients who require less than the 1 gram dose of cefazolin.

As with other beta-lactam antibacterial drugs, seizures may occur if inappropriately high doses are administered to patients with impaired renal function (creatinine clearance less than 55 mL/minute) [see *Dosage and Administration* (2.3)].

8
