RISK EVALUATION AND MITIGATION STRATEGY (REMS)

1. GOALS

The goals of the REVLIMID risk evaluation and mitigation strategy are as follows:

1. To prevent the risk of embryo-fetal exposure to REVLIMID.
2. To inform prescribers, patients, and pharmacists on the serious risks and safe-use conditions for REVLIMID.

2. REMS ELEMENTS

2.1. Elements to Assure Safe Use

2.1.1. Healthcare providers who prescribe REVLIMID are specially certified.

Celgene will ensure that healthcare providers who prescribe REVLIMID are specially certified in the REVLIMID REMS® program.

To become certified, each prescriber must complete the Prescriber Enrollment Form and agree to do the following:

- a. Provide patient counseling on the benefits and risks of REVLIMID therapy, including risks described in the BOXED WARNINGS.
- b. Enroll each patient by completing and submitting to the Celgene Customer Care Center via mail (86 Morris Avenue, Summit, NJ 07901), email (customer care@celgene.com), fax (1-888-432-9325), or online (www.celgeneriskmanagement.com), a signed Patient-Physician Agreement Form (PPAF) identifying the patient's risk category (see PPAFs for all six risk categories) for each new patient. In signing the PPAF, each prescriber acknowledges that they understand that REVLIMID is available only through the REVLIMID REMS® program, and that they must comply with program requirements.

- c. Provide contraception and emergency contraception counseling with each new prescription prior to and during REVLIMID treatment.
- d. Provide scheduled pregnancy testing for females of reproductive potential and verify negative pregnancy test results prior to writing a new prescription or subsequent prescriptions.
- e. Report any pregnancies in female patients or female partners of male patients prescribed REVLIMID immediately to Celgene Drug Safety (or Celgene Customer Care Center, 1-888-423-5436).
- f. Complete a prescriber survey (phone or online) for every patient (new and follow-up), obtain a unique prescription authorization number for each prescription written, and include this authorization number on the prescription. The authorization number can be obtained by contacting the Celgene Customer Care Center, using the automated IVR system, via the www.CelgeneRiskManagement.com website.
 - o For females of reproductive potential, authorization numbers are valid only for 7 days from date of last pregnancy test and 30 days from the date it is issued for all other patients.
- g. Facilitate compliance with the mandatory REVLIMID REMS[®] program patient survey by instructing patients to complete the mandatory surveys (phone or online) at program specified frequencies.
- h. Prescribe no more than a 4-week (28-day) supply, with no automatic refills or telephone prescriptions.
- i. Contact a REVLIMID REMS[®] program pharmacy certified by the REVLIMID REMS[®] program to fill the REVLIMID prescription.
- j. Return all unused REVLIMID brought in by patients to Celgene Customer Care.
- k. Re-enroll patients in the REVLIMID REMS[®] program if REVLIMID is required and previous therapy with REVLIMID has been discontinued for 12 consecutive months.

Celgene will:

1. Ensure that the REVLIMID REMS[®] program materials including prescriber enrollment are available on the CelgeneRiskManagement.com website or can be obtained by contacting Celgene Customer Care Center at 1-888-423-5436
2. Maintain a secure database of all REVLIMID REMS[®] program certified prescribers.
3. Monitor to ensure that only REVLIMID REMS[®] program certified prescribers are prescribing REVLIMID.
4. Monitor and ensure that patients have been assigned correctly to one of the following patient risk categories. Confirm risk category when completing the PPAFs during the patient enrollment process:
 - a. **Adult female of reproductive potential:** all females who are menstruating, amenorrheic from previous medical treatments, under 50 years, and/or perimenopausal.
 - b. **Female child of reproductive potential:** all females under 18 years who are menstruating.
 - c. **Adult female NOT of reproductive potential:** females who have had a natural menopause for at least 24 consecutive months, a hysterectomy, and/or bilateral oophorectomy.
 - d. **Female child NOT of reproductive potential:** all females under 18 years who are not menstruating.
 - e. **Adult males 18 years or older**
 - f. **Male child under 18 years**
5. Monitor certified prescriber compliance with the REVLIMID REMS[®] program, including patient risk categorization and the appropriate corresponding counseling requirements, contraception requirements, pregnancy testing, and survey completion for all patients treated with REVLIMID.

6. Institute corrective action and prevent the certified prescriber from prescribing REVLIMID if the prescriber is found to be non-compliant with the REVLIMID REMS[®] program.
7. Train REVLIMID REMS[®] program certified prescribers in adverse experience reporting procedures, including the requirement to immediately report to Celgene any suspected embryo-fetal exposure to REVLIMID if a pregnancy occurs.
8. Ensure that once the prescriber submits the completed PPAF, the prescriber will receive a confirmation letter via fax or online to confirm the patient's enrollment and signify that the prescriber and patient surveys can be taken to receive an authorization number for the REVLIMID prescription (for all males, the PPAF is considered the initial survey). The authorization number is written on the REVLIMID prescription.
9. Ensure that, for subsequent prescriptions, the prescriber completes a telephone or online survey designed to look for signals of at-risk behavior (e.g., pending or outdated pregnancy test), report the patient's pregnancy test results, correct assignment of risk category, and confirm or re-enforce patient understanding of contraceptive requirements. The completion of the survey will allow the prescriber to obtain a new authorization number every time a prescription for REVLIMID is written.

The following materials are part of the REMS, and are appended:

- [Prescriber Enrollment Form](#)
- [Patient Prescription Form](#)
- [Patient Prescription Form \(Veterans Administration\)](#)
- [Prescriber Guide to REVLIMID REMS[®] Program](#)
- [REVLIMID REMS[®] At-A-Glance](#)
- [Welcome Letter](#)
- [Celgene Risk Management.com website](#)

2.1.2. REVLIMID will only be dispensed by pharmacies that are specially certified.

Celgene will ensure that REVLIMID is only dispensed from REVLIMID REMS[®] program certified pharmacies. To become a certified pharmacy, the pharmacy must agree to do the following before filling a REVLIMID prescription:

- a. Only accept prescriptions with a prescription authorization number. Authorization numbers are valid for 7 days from date of last pregnancy test for females of reproductive potential and 30 days from the date it is issued for all other patients.
- b. Dispense no more than a 4-week (28-day) supply, and require a new prescription from the patient prior to dispensing additional REVLIMID.
- c. Dispense subsequent prescriptions only if there are 7 days or less remaining on an existing REVLIMID prescription.
- d. Obtain a REVLIMID REMS[®] confirmation number from the Celgene Customer Care Center (phone or online) and write this confirmation number on the prescription. The REVLIMID REMS[®] confirmation number may be obtained using the following procedure:
 1. Enter the pharmacy identification number (NABP or DEA);
 2. Enter the prescription authorization number written on the prescription;
 3. Enter the number of capsules and milligram (mg) strength being dispensed;

4. Dispense or ship the prescribed REVLIMID within 24 hours of obtaining and recording the REVLIMID REMS[®] confirmation number and confirmation date.
- e. Dispense REVLIMID only after a REVLIMID REMS[®] program confirmation number is obtained. If no confirmation is obtained, then no REVLIMID is dispensed. Contact the patient's physician and Celgene for further instruction.
 - f. Accept unused REVLIMID (previously dispensed) from a patient or patient caregiver and return to Celgene Corporation for proper disposal.
 - g. For each patient receiving treatment, retain a record of each REVLIMID prescription dispensed and the corresponding completed Education and Counseling Checklist.
 - h. Complete the checklist that applies to the program patient risk category written on the front of the Education and Counseling Checklist for Pharmacies.
 - i. Provide counseling to patients and/or guardians of patients under 18 years of age receiving REVLIMID treatment.
 - a. Counsel all patients and guardians of patients under 18 years of age on the following:
 - 1. The benefits and risks of REVLIMID therapy.
 - 2. Not sharing REVLIMID medication
 - 3. Not donating blood while taking REVLIMID, during dose interruptions, and for 4 weeks after stopping REVLIMID.
 - 4. Not to break, chew, or open REVLIMID capsules.
 - 5. Instructions on REVLIMID dose and administration.
 - 6. To read the REVLIMID REMS[®] program education materials and encourage compliance with the requirements.
 - b. In addition to above, counsel **Females of Reproductive Potential** on the following:
 - 1. The potential for embryo-fetal toxicity with exposure to REVLIMID.
 - 2. Using 2 forms of effective birth control at the same time or abstaining from heterosexual sexual intercourse.
 - 3. Continuing to use 2 forms of birth control if REVLIMID therapy is interrupted and for at least 4 weeks after therapy is discontinued.
 - 4. Obtaining a pregnancy test weekly during the first 4 weeks of REVLIMID use, then a repeat pregnancy test every 4 weeks in females with regular menstrual cycles, and every 2 weeks in females with irregular menstrual cycles.
 - 5. The need to stop taking REVLIMID and notify their REVLIMID prescriber immediately if they become pregnant or suspect they may be pregnant.
 - c. In addition to items listed for all patients above, counsel **Males** receiving REVLIMID treatment about the potential for embryo-fetal toxicity with exposure to REVLIMID and the importance of using barrier contraception by wearing a latex or synthetic condom when engaging in sexual intercourse with a female of reproductive potential even if the male receiving REVLIMID has had a successful vasectomy.
 - 1. The need to not donate sperm while taking REVLIMID, during dose interruptions, and for 4 weeks after stopping REVLIMID.
 - d. Counsel the **Parent or legal guardian of Female Child NOT of reproductive potential** who is receiving REVLIMID treatment about the need to inform their REVLIMID prescriber when the child begins menses.

Before a certified pharmacy dispenses REVLIMID, Celgene will train the appropriate pharmacy staff:

1. About the REVLIMID REMS[®] program
2. About the procedures for reporting adverse experiences to Celgene, including the requirement to immediately report to Celgene any suspected embryo-fetal exposure to REVLIMID if a pregnancy occurs.

The following materials are part of the REMS, and are appended:

- [Pharmacy Guide to REVLIMID REMS[®] Program](#)
- [Education and Counseling Checklist for Pharmacies](#)
- [Celgene REMS Programs Pharmacy Training: REVLIMID REMS[®]](#)
- [Pharmacy Certification Quiz \(the REVLIMID REMS[®] Program\)](#)

2.1.3. Celgene will ensure that REVLIMID[®] will only be dispensed to patients enrolled in the REVLIMID REMS[®] program with evidence or other documentation of safe-use conditions.

Celgene will ensure that all patients treated with REVLIMID are enrolled by a certified prescriber. The prescriber will enroll the patient by completing Patient-Physician Agreement Form and submitting the form via mail (86 Morris Avenue, Summit, NJ 07901), fax (1-888-432-9325), email (customercare@celgene.com) or online (www.celgeneriskmanagement.com) for each patient who receives REVLIMID. Each patient and/or guardian of patients under 18 years of age consents to participate in the program by:

- a. acknowledging that he or she understands that:
 - i. severe birth defects or death to an unborn baby may occur if a female becomes pregnant while she is receiving REVLIMID;
 - ii. REVLIMID must not be shared with anyone, even someone with similar symptoms;
 - iii. REVLIMID must be kept out of the reach of children and should NEVER be shared with females who are able to have children;
 - iv. they cannot donate blood while receiving REVLIMID including during dose interruptions, and for 4 weeks after stopping REVLIMID;
 - v. they might be asked to participate in the REVLIMID Pregnancy Exposure Registry; and
 - vi. they may be contacted by Celgene about following the rules of the REMS.
- b. In addition, each patient and/or guardian of patients under 18 years of age consents to participate in the program by:
 - i. agreeing to return unused REVLIMID to Celgene or their REVLIMID prescriber, or to the pharmacy that dispensed the REVLIMID to them ;
 - ii. agreeing to participate in a monthly (telephone or online) survey while on REVLIMID (with the exception of Adult Females Not of Reproductive Potential who are required to take a survey once every six months); and
 - iii. reviewing the REVLIMID REMS[®] program educational materials and asking their prescriber any questions that have not been answered.

In addition, **Females and guardians of female children** must attest to their understanding of their/their child's reproductive potential, as categorized by the prescribing physician.

Females of Reproductive Potential and guardians of Female Children of Reproductive Potential will attest that they/their child:

- a. is not currently pregnant, and will try to refrain from becoming pregnant while receiving REVLIMID therapy and for at least 4 weeks after completely stopping REVLIMID therapy;
- b. must not take REVLIMID if pregnant, breastfeeding a baby, or not using birth control as defined in the REMS;
- c. will, unless abstinent, use contraception as defined within the REMS: for at least 4 weeks before starting REVLIMID, while receiving REVLIMID, during dose interruptions, and for at least 4 weeks after stopping REVLIMID;
- d. will have pregnancy testing done as ordered by the certified prescriber within 10 to 14 days and 24 hours prior to starting REVLIMID, every week for at least the first 4 weeks of REVLIMID therapy, and then every 4 weeks if the Female of Reproductive Potential has regular menstrual cycles, or every 2 weeks if the Female of Reproductive Potential has irregular menstrual cycles, while receiving REVLIMID;
- e. will immediately stop taking REVLIMID and inform the certified prescriber if the patient becomes pregnant, misses a menstrual period, experiences unusual menstrual bleeding, stops using contraception, or thinks for any reason that she might be pregnant; if the prescriber is not available, the Female of Reproductive Potential or guardian of a Female Child of Reproductive Potential can call the Celgene Customer Care Center at 1-888-423-5436

Males or Guardians of males will attest that they/their child will:

- a. never have unprotected sexual contact with a female who can become pregnant;
- b. wear a latex or synthetic condom every time the male patient has sexual contact with a female who is or who can become pregnant; continue condom use with sexual contact while the male patient is receiving REVLIMID treatment, during dose interruptions, and for 4 weeks after the male patient stops taking REVLIMID, even if the patient has had a successful vasectomy; and
- c. inform their certified prescriber if the male patient has unprotected sexual contact with a female who can become pregnant, or if they think for any reason that the male patient's sexual partner might be pregnant; if the prescriber is not available, the male patient or guardian of an underage male patient can call the Celgene Customer Care Center at 1-888-423-5436;
- d. not donate sperm while taking (including dose interruptions) and for 4 weeks after stopping REVLIMID

The following appended materials are part of the REMS:

- [Patient-Physician Agreement Form for Adult Male](#)
- [Patient-Physician Agreement Form for Male Child](#)
- [Patient-Physician Agreement Form for Adult Female Who Can Not Get Pregnant](#)
- [Patient-Physician Agreement Form for Adult Female Who Can Get Pregnant](#)
- [Patient-Physician Agreement Form for Female Child Who Can Not Get Pregnant](#)
- [Patient-Physician Agreement Form for Female Child Who Can Get Pregnant](#)

- Emergency Contraception Brochure
- Patient Survey Reminder Card
- REVLIMID Risk Evaluation and Mitigation Strategy (REMS) Program Education and Safety Kit
- REVLIMID REMS[®] Patient Resource Pack Envelope

2.1.4. Female patients or female partners of male patients receiving REVLIMID who report a pregnancy that occurred during REVLIMID therapy will be enrolled in the REVLIMID Pregnancy Exposure Registry.

Upon receiving a report of pregnancy from the REVLIMID REMS[®] program, Celgene Pregnancy Prevention Plan programs in the rest of the world, clinical trials, or directly from a prescriber, a pharmacy, or a patient, Celgene will enroll the female patient or female partner of the male patient taking REVLIMID into the REVLIMID Pregnancy Exposure Registry. The objectives of the registry are to monitor pregnancy outcomes in female patients of reproductive potential and male patients' female partners who are exposed to REVLIMID and to understand why the REVLIMID REMS[®] program was unsuccessful.

2.2. Implementation System

The implementation system will include the following:

- 1) Celgene will maintain a secure database of all certified entities, including enrolled patients and certified prescribers and pharmacies to monitor and evaluate implementation of the elements provided for in Sections 2.1.1, 2.1.2, and 2.1.3.
- 2) Celgene will monitor pharmacy certification compliance and address deviations by monitoring real time dispensing activity and conducting pharmacy audits.
 - a. The Celgene Customer Care Center will monitor the certified pharmacies in the manner described in the REMS supporting document to ensure only enrolled and authorized patients are receiving REVLIMID. If a certified pharmacy is found to be non-compliant with the REVLIMID REMS[®] program, Celgene will institute corrective action and may de-activate pharmacies for which re-training has proven ineffective, removing them from the REVLIMID REMS[®] program.
 - b. Celgene will perform regular audits of contract pharmacies participating in the REVLIMID REMS[®] program. For pharmacies that have been in the program for more than two years, Celgene will perform a risk-based assessment to select which pharmacies will be audited. The REVLIMID REMS[®] program compliance audits will be performed by internal auditors of Celgene and/or outside auditors contracted and trained by Celgene.
- 3) Celgene will monitor and ensure that the prescriptions are filled within the allowed timeframes.
- 4) Celgene Customer Care Center will address customer complaints received that are related to the REVLIMID REMS[®] program and distribution and dispensing of REVLIMID.
- 5) Celgene will maintain a reporting and collection system for safety information that includes a process to monitor pregnancy testing results and pregnancy outcomes (should one occur) through the

REVLIMID Pregnancy Exposure Registry and to understand why the REVLIMID REMS[®] program was unsuccessful for the pregnancy case in question.

- 6) Based on monitoring and evaluation of these elements to assure safe use, Celgene will take reasonable steps to work to improve implementation of these elements as applicable.
- 7) Celgene will develop and follow written procedures related to the implementation of the REMS.

2.3. Timetable for Submission of Assessment Reports

Celgene will submit REMS assessments August 3, 2015, August 3, 2016, and every two years thereafter. To facilitate inclusion for as much information as possible while allowing reasonable time to prepare the submission, the reporting interval covered by each assessment should conclude no earlier than 60 days before the submission date for that assessment. Celgene will submit each assessment so it will be received by the FDA on or before the due date.

How to Fill a REVLIMID® (lenalidomide) Prescription

1. Healthcare provider (HCP) instructs female patients to complete initial patient survey
2. HCP completes survey
3. HCP completes patient prescription form
4. HCP obtains REVLIMIDREMS® (formerly known as the RevAssist® program) authorization number
5. HCP provides authorization number on patient prescription form
6. HCP faxes form, including prescription, to one of the Celgene Certified Pharmacy Network participants (see below)
7. HCP advises patient that a representative from the certified pharmacy will contact them
8. Certified pharmacy conducts patient education
9. Certified pharmacy obtains confirmation number
10. Certified pharmacy ships REVLIMID to patient with MEDICATION GUIDE

Please see www.Celgene.com/PharmacyNetwork for the list of pharmacy participants

Information about REVLIMID and the REVLIMIDREMS® program can be obtained by calling the Celgene Customer Care Center toll-free at 1-888-423-5436, or at www.CelgeneRiskManagement.com.

How to Fill a REVLIMID[®] (lenalidomide)

Prescription in the Veterans Administration (VA)

1. Healthcare Provider (HCP) instructs female patients to complete initial patient survey
2. HCP completes survey
3. HCP completes patient prescription form (include cell number for patient if possible)
4. HCP obtains REVLIMID REMS[®] (formerly known as the RevAssist[®] program) authorization number
5. HCP provides authorization number on patient prescription form
6. HCP sends prescription to the VA Pharmacy

The following information must be filled in:

 - Rx must include McKesson Specialty Distribution account number
 - Rx must include VA address (Name, Street, City, State, ZIP)
 - Rx must include VA Pharmacist contact information (Name, Phone and Fax #)
7. VA Pharmacist faxes the form, including prescription, to:

The REVLIMID REMS[®] certified OncologyRx Care Advantage Specialty at 1- 855-637-9446
8. HCP advises patient that a representative from REVLIMID REMS[®] certified pharmacy will be in contact
9. The REVLIMID REMS[®] certified OncologyRx Care Advantage Pharmacist conducts patient education
10. The REVLIMID REMS[®] certified OncologyRx Care Advantage Pharmacist obtains confirmation number
11. The REVLIMID REMS[®] certified OncologyRx Care Advantage Pharmacist ships REVLIMID to the VA Pharmacy or directly to the patient with MEDICATION GUIDE
12. VA Pharmacist gives REVLIMID to VA patient with MEDICATION GUIDE

Prescriber Guide to

((REVLIMID REMS[®] logo))

Risk Evaluation and Mitigation Strategy (REMS) Program

Due to its structural similarity to thalidomide, a known teratogen, REVLIMID[®] (lenalidomide) is approved for marketing only under a restricted distribution program approved by the Food and Drug Administration. This program is called the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) program (formerly known as the RevAssist[®] program).

This guide contains important information for prescribers about:

- The risks of REVLIMID, including a boxed warning for
 - Embryo-fetal toxicity
 - Hematologic toxicity
 - Venous and arterial thromboembolism

- The REVLIMID REMS[®] program
 - Prescriber Certification
 - Patient Enrollment
 - Contraceptive Requirements and Counseling for Patients
 - Initial and Subsequent Prescription Requirements

REVLIMID REMS[®] Resources for Prescribers Include:

- Prescriber Guide to REVLIMID REMS[®] Program
- CD-ROM, including Patient-Physician Agreement Form and Patient Prescription Form Software and Installation Instructions
- Full Prescribing Information for REVLIMID

About REVLIMID® (lenalidomide)

REVLIMID in combination with dexamethasone is indicated for the treatment of patients with multiple myeloma (MM).

REVLIMID is indicated for the treatment of patients with transfusion-dependent anemia due to low- or intermediate-1-risk myelodysplastic syndromes (MDS) associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities.

REVLIMID is indicated for the treatment of patients with mantle cell lymphoma (MCL) whose disease has relapsed or progressed after two prior therapies, one of which included bortezomib.

Risks of REVLIMID

REVLIMID has a Boxed Warning for embryo-fetal toxicity, hematologic toxicity, and deep venous thrombosis (DVT) and pulmonary embolism (PE) as well as risk of myocardial infarction and stroke.

Due to its structural similarity to thalidomide, a known teratogen, REVLIMID is contraindicated in pregnant females or females capable of becoming pregnant. Females of reproductive potential may be treated with REVLIMID if they take adequate precautions to avoid pregnancy.

REVLIMID is associated with significant neutropenia and thrombocytopenia in patients with del 5q MDS. Many patients taking REVLIMID may require dose interruption and/or reduction. Evaluate your del 5q MDS patients closely for cytopenias. Patients on REVLIMID should have their complete blood counts monitored weekly for the first 8 weeks of therapy, and at least monthly thereafter.

There is a significant risk of deep venous thrombosis and pulmonary embolism as well as risk of myocardial infarction and stroke in patients with MM taking REVLIMID plus dexamethasone in combination. Monitor for and advise patients about the signs and symptoms of thromboembolism. Advise patients to seek immediate medical care if they develop symptoms such as shortness of breath, chest pain, or arm or leg swelling. Thromboprophylaxis is recommended and the choice of regimen should be based on an assessment of the patient's underlying risks.

The REVLIMID REMS[®] program

To avoid embryo-fetal exposure, REVLIMID[®] (lenalidomide) is only available under a restricted distribution program called “REVLIMID Risk Evaluation and Mitigation Strategy (REMS).” Only certified prescribers can prescribe REVLIMID and only certified pharmacies can dispense REVLIMID in the REVLIMID REMS[®] program.

In order to receive REVLIMID, all patients must be enrolled in REVLIMID REMS[®] and agree to comply with the requirements of the REVLIMID REMS[®] program. Information about REVLIMID and the REVLIMID REMS[®] program can be obtained by visiting www.CelgeneRiskManagement.com, accessing the Celgene REMS mobile app, or calling the Celgene Customer Care Center toll-free at

1-888-423-5436.

Key points of the REVLIMID REMS[®] program

Prescriber

- The prescriber enrolls and becomes certified with Celgene for the REVLIMID REMS[®] program
- The prescriber counsels patient on benefits and risks of REVLIMID
- The prescriber provides contraception and emergency contraception counseling
- The prescriber verifies negative pregnancy test for all female patients of reproductive potential
- The prescriber completes a REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form with each patient and sends to Celgene
- The prescriber/patient completes applicable mandatory confidential survey
- The prescriber obtains an authorization number from Celgene and writes it on every prescription, along with the patient risk category
- The prescriber writes no more than a 4-week (28-day) supply, with no automatic refills or telephone prescriptions
- The prescriber sends REVLIMID prescription to certified pharmacy

Pharmacy

- The pharmacy certifies with Celgene for REVLIMID REMS[®]
- The certified pharmacy must obtain a confirmation number from Celgene before dispensing
- The certified pharmacy dispenses REVLIMID to patient along with a Medication Guide

Prescribing REVLIMID[®] (lenalidomide) under the REVLIMID REMS[®] program

FEMALES	MALES
<p>Patient Counseling</p> <p>Instruct your patients on why and how they and their partners should prevent pregnancy. Also inform them not to share the drug, not to donate blood, and about appropriate contraceptive use. Patient should be instructed not to extensively handle or open REVLIMID capsules</p> <p>Pregnancy Tests Only in Females of Reproductive Potential</p> <p>Conduct initial pregnancy test within 10-14 days. Confirm the patient is not pregnant with a second pregnancy test within 24 hours prior to writing an initial prescription. During treatment, pregnancy testing should be repeated every 4 weeks if the patient has regular menses or is amenorrheic, or every 2 weeks if the patient has irregular menses</p> <p>Enrollment</p> <p>Both you and your patients must understand and agree to comply with the REVLIMID REMS[®] program, including the pregnancy prevention steps. The REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form must be signed by both patient and physician and faxed to the Celgene Customer Care Center at 1-888-432-9325 or generated, signed, and submitted electronically at www.CelgeneRiskManagement.com. If enrolling a patient online, the system generates an online prescription that you should complete and print, sign (include the authorization number and risk category), and fax to the certified pharmacy</p>	<p>Patient Counseling</p> <p>Instruct your patients on why and how they and their partners should prevent pregnancy. Adult female patients not of reproductive potential must complete surveys every 6 months</p>	<p>surveys monthly for subsequent prescriptions</p>
--	---

ALL PATIENTS

Fax Prescription

Obtain an authorization number from Celgene and write it on the prescription, along with the patient risk category, and then fax it to a certified pharmacy. The certified pharmacy will contact patients for mandatory counseling and coordinate delivery of REVLIMID to them.

REVLIMID REMS® patient enrollment

- Obtain, review, and complete the REVLIMID® (lenalidomide) Patient-Physician Agreement Form online by visiting www.CelgeneRiskManagement.com, accessing the Celgene REMS mobile app, using the CD-ROM software, or by calling the Celgene Customer Care Center for assistance at **1-888-423-5436**

- Prescribers who do not have access to a computer, or whose computer systems are not compatible with the software, will be provided with REVLIMID REMS[®] program materials. For additional assistance, please contact the Celgene Customer Care Center or your Celgene Hematology Oncology Consultant
- Patient, parent/legal guardian, and/or authorized representative must read the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form in the language of their choice

Help Ensure Timely Processing of Each Prescription

Fill Out Form as Directed

- Write only in the designated areas on the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form
- The box next to each statement must be marked (with an “X”) to indicate understanding
- The form must be completed and signed by both prescriber and patient

Instructions for Female Patients

- For female patients, the prescriber will need to provide information on whether the patient has been in surgical menopause, chemical menopause, or natural menopause for at least 24 months

Instructions for Minors

- If the patient is under 18 years of age, his or her legal guardian must read this material, mark the statement in each block of the form (with an “X”) and agree to ensure compliance by signing and dating the form

Instructions for Incompetent Adult Patients

- For an incompetent adult patient, an authorized representative must sign the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

REVLIMID REMS[®] patient enrollment (continued)

- An authorized representative is a caretaker authorized under applicable state law to consent to treatment on the incompetent patient’s behalf
- The authorized representative must read the material, mark the statements, and agree to ensure compliance by signing and dating the form

- If the authorized representative does not have the power of attorney, **a signed and dated letter from the prescriber, on the prescriber's letterhead, must be submitted to the Celgene Customer Care Center, along with the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form.** This letter must contain the following: a statement that the incompetent patient lacks the capacity to complete the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form, including identification of the medical condition causing the incapacity; the name and address of the authorized representative; the authorized representative's relationship to the patient; and an opinion that the authorized representative accepts responsibility for the patient's compliance with the REVLIMID REMS[®] program and is authorized to consent to treatment with REVLIMID on behalf of the patient

Send in Completed Forms

- Send the completed REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form online through **www.CelgeneRiskManagement.com**, the Celgene REMS mobile app, or to the Celgene Customer Care Center by faxing to **1-888-432-9325**
- You will receive confirmation electronically or via fax to your office once the patient is enrolled
- Once REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form is received, both female patients and prescriber can take their surveys as required. Male patients do not take initial surveys
- In the event that you do not receive this confirmation within 15 minutes, call the Celgene Customer Care Center

Note: If therapy with REVLIMID is discontinued for 12 consecutive months, the patient must enroll again in the REVLIMID REMS[®] program. Follow the above procedures to re-enroll the patient.

Prescription requirements

All patients

- Provide comprehensive counseling on the benefits and risks of therapy with REVLIMID® (lenalidomide)
- Patients must be counseled on the potential risks of birth defects, other side effects, and important precautions associated with REVLIMID
- Provide counseling not to share REVLIMID capsules, and not to donate blood during treatment (including dose interruptions) and for 4 weeks after receiving their last dose of REVLIMID, as well as counseling on appropriate contraceptive use, including emergency contraception
- Provide patients with educational materials provided in the REVLIMID REMS® Patient Resource Pack
- Patients should be instructed to not extensively handle or open REVLIMID capsules
- Instruct patients to return unused REVLIMID capsules for disposal to Celgene or to their REVLIMID prescriber, or to the pharmacy that dispensed the REVLIMID to them

Female Patients

Determine if female patient is of reproductive potential

Two categories:
1. Females of Reproductive Potential <ul style="list-style-type: none">• All females who are menstruating, amenorrheic from previous medical treatments, under 50 years of age, and/or perimenopausal, and do not qualify for the females not of reproductive potential category
2. Females Not of Reproductive Potential <ul style="list-style-type: none">• Females who have been in natural menopause for at least 24 consecutive months, or who have had a hysterectomy and/or bilateral oophorectomy, or female children who have not started menstruating

1. Females of Reproductive Potential

Pregnancy test requirements

- Obtain a **negative** pregnancy test 10 to 14 days prior to writing an initial prescription for REVLIMID® (lenalidomide) and again within 24 hours prior to writing an initial prescription for REVLIMID even if continuous abstinence is the chosen method of birth control

- The pregnancy test must be sensitive to at least 50 mIU/mL
- Pregnancy testing should occur weekly during the first 4 weeks of use

Prescription requirements (continued)

- Pregnancy testing should be repeated every 4 weeks if patient has regular menses or is amenorrheic, or every 2 weeks if irregular menses
- If a patient misses her period or if there is any abnormality in menstrual bleeding, REVLIMID should be discontinued immediately. Obtain a pregnancy test and counsel the patient
- **If pregnancy does occur during treatment, REVLIMID must be immediately discontinued.** Any suspected embryo-fetal exposure to REVLIMID must be reported immediately to the FDA via the MedWatch number at 1-800-FDA-1088 and also to the Celgene Customer Care Center at 1-888-423-5436. The patient should be referred to an obstetrician/gynecologist experienced in reproductive toxicity for further evaluation and counseling
- The patient must not breastfeed a baby while being treated with REVLIMID

Patient Counseling on Contraception Requirements

Contraception requirements

- Female patients of reproductive potential must either completely abstain from heterosexual sexual contact or must use 2 methods of reliable contraception
- Reliable contraceptive methods include using at the same time at least 1 highly effective method and at least 1 additional method of birth control every time they have sex with a male
- Reliable contraceptive methods must be started at least 4 weeks before REVLIMID[®] (lenalidomide) therapy, during therapy (including dose interruptions), and for at least 4 weeks following discontinuation of therapy

Effective Methods of Birth Control to Use Together

Highly effective birth control methods	Additional effective birth control methods
Intrauterine device (IUD)	Male latex or synthetic condom
Hormonal methods (birth control pills, hormonal patches, injections, vaginal rings, or implants)	Diaphragm
Tubal ligation (having your tubes tied)	Cervical cap

Partner's vasectomy (tying of the tubes to prevent the passing of sperm)	
--	--

Prescription requirements (continued)

Remind all patients that not having any sexual intercourse is the only birth control method that is 100% effective.

- **Unacceptable forms of contraception:**

- Progesterone-only “mini-pills”
- IUD Progesterone T
- Female condoms
- Natural family planning (rhythm method) or breastfeeding
- Fertility awareness
- Withdrawal
- Cervical shield*

- Patients should be counseled that concomitant use of certain prescription drugs and/or dietary supplements can decrease the effects of hormonal contraception. If hormonal or IUD contraception is medically contraindicated, 2 other contraceptive methods may be used simultaneously during periods of concomitant use and for 4 weeks after stopping therapy

* A cervical shield should not be confused with a cervical cap, which is an effective secondary form of contraception

2. Females Not of Reproductive Potential

- The patient must confirm that she is currently not pregnant, nor of reproductive potential as she has been in natural menopause for at least 24 months, or had a hysterectomy and/or bilateral oophorectomy
- The parent or guardian must confirm that a prepubertal female child is not now pregnant, nor is of reproductive potential as **menstruation has not yet begun**, and/or the child will not be engaging in heterosexual sexual contact for at least 4 weeks before REVLIMID® (lenalidomide) therapy, during therapy, and for at least 4 weeks after stopping therapy

Male Patients

- Male patients must be instructed to use a latex or synthetic condom every time they have sexual intercourse with a female of reproductive potential, even if they have undergone a successful vasectomy. The risk to the developing baby from the semen of male patients taking REVLIMID therapy is unknown
- Male patients must be instructed not to donate sperm during treatment (including dose interruptions) and for 4 weeks after their last dose of REVLIMID

Del 5q MDS Patients

- Evaluate your del 5q MDS patients closely for cytopenias. Obtain a weekly CBC for the first 8 weeks of treatment, and at least monthly thereafter

Initial mandatory confidential survey

Females

- Instruct the female patient to complete a brief initial mandatory confidential survey by visiting **www.CelgeneRiskManagement.com**, accessing the Celgene REMS mobile app, or by calling **1-888-423-5436**. See page 12 for subsequent prescription requirements.

Males

- Males do not need to take the initial survey

Prescribers

Prescriber will complete a brief mandatory confidential survey by visiting **www.CelgeneRiskManagement.com**, accessing the Celgene REMS mobile app, or by calling the Celgene Customer Care Center at **1-888-423-5436**, for **every patient** before each prescription is written. Be prepared to enter some of the following information:

- Prescriber's identification number
 - Patient's identification number
 - Date and result of patient's pregnancy test(s) (if applicable); valid only for 7 days from date of last pregnancy test
 - Average daily dose
 - Total number of days supply (cannot exceed 28 days)
- An authorization number will be issued upon completion of the survey and must be written along with the patient risk category on the prescription. Authorization numbers are valid for 7 days from date of last

pregnancy test for females of reproductive potential and 30 days from the date it is issued for all other patients. No automatic refills or telephone prescriptions are permitted

Additional Information for the Prescriber

- Healthcare provider must send the prescription to a REVLIMID REMS[®] certified pharmacy. To locate a certified pharmacy, please visit www.Celgene.com/PharmacyNetwork
- Prescribe no more than 4 weeks (28 days) of therapy, with no automatic refills

Subsequent prescription requirements

The prescriber must complete a brief mandatory confidential survey to obtain a new authorization number **every time** a prescription for REVLIMID[®] (lenalidomide) is written.

No automatic refills or telephone prescriptions are permitted. The patient risk category must be written on the prescription.

Female patients

- Provide counseling as outlined in the “Female patients” section on pages 8-10
- Follow pregnancy test requirements as outlined in the “Pregnancy test requirements” section on page 8
- Female patients must complete a brief mandatory confidential survey according to the following schedule:
 - Before prescription is obtained
 - Monthly
 - Adult females of reproductive potential\
 - All female children
 - Every 6 months
 - Adult females not of reproductive potential

Male patients

- Provide patient counseling as outlined in the “Male patients” section on page 10
- Male patients must complete a brief mandatory confidential survey once a month
 - Males do not complete an initial survey

Del 5q MDS patients

- Evaluate your del 5q MDS patients closely for cytopenias. Obtain a weekly CBC for the first 8 weeks of treatment and at least monthly thereafter

After the last dose of REVLIMID® (lenalidomide)

After patients have stopped taking REVLIMID, they must do the following:

All patients

- Must not share REVLIMID capsules—especially with females of reproductive potential
- Must return any unused REVLIMID capsules for disposal to Celgene or their REVLIMID prescriber, or to the pharmacy that dispensed the REVLIMID to them
- Must not donate blood for 4 weeks after stopping REVLIMID

Female patients

- Must not get pregnant for at least 4 weeks after stopping REVLIMID by using the appropriate contraceptives each time engaging in sexual activity with a male

Male patients

- Must use a latex or synthetic condom each time when engaging in sexual activity for 4 weeks after stopping REVLIMID, even if they have undergone a successful vasectomy
- Must not donate sperm for 4 weeks after stopping REVLIMID

Ordering English and non-English materials

Call Celgene Customer Care Center at 1-888-423-5436

- Materials are available in 16 languages and include:
 - REVLIMID[®] (lenalidomide) Patient-Physician Agreement Forms
 - Patient Guide to REVLIMID REMS[®] Program
 - Mandatory confidential survey forms

Adverse drug experience reporting procedure for healthcare professionals

Celgene is committed to ensuring patient safety through the monitoring of adverse drug experiences associated with the use of REVLIMID® (lenalidomide).

Please report adverse drug experiences that are suspected to be associated with the use of REVLIMID and any suspected pregnancy occurring during the treatment with REVLIMID to Celgene using any of the following methods.

Reporting to Celgene

- Email: drugsafety@celgene.com
- Telephone: **1-908-673-9667**
- Toll-free: **1-800-640-7854** (Global Drug Safety & Risk Management) or **1-888-423-5436** (Celgene Customer Care Center)
- Fax: **1-908-673-9115**
- Mail to: Global Drug Safety & Risk Management, Celgene Corporation, 300 Connell Dr., Suite 6000, Berkeley Heights, NJ 07922

Reporting to the FDA

Adverse drug experiences that are suspected to be associated with the use of REVLIMID and any suspected pregnancy occurring during the treatment with REVLIMID may also be reported to the FDA MedWatch Reporting System using any of the following methods:

- Online: <https://www.accessdata.fda.gov/scripts/medwatch/medwatch-online.htm>
- Telephone: **1-800-FDA-1088**
- Fax: **1-800-FDA-0178**
- Mail to: MedWatch, 5600 Fishers Lane, Rockville, MD 20852-9787

At-A-Glance

Important information about REVLIMID[®] (lenalidomide) and the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) program

- REVLIMID is contraindicated in pregnant females and females capable of becoming pregnant. Females of reproductive potential may be treated with REVLIMID provided adequate precautions are taken to avoid pregnancy
- To avoid embryo-fetal exposure, REVLIMID is only available under a restricted distribution program called “REVLIMID REMS[®]” (formerly known as the RevAssist[®] program)
- Only prescribers and pharmacies certified by the REVLIMID REMS[®] program can prescribe and dispense REVLIMID to patients who are enrolled and meet all the conditions of the REVLIMID REMS[®] program
- Information about REVLIMID and the REVLIMID REMS[®] program can be obtained by visiting **www.CelgeneRiskManagement.com**, or calling the Celgene Customer Care Center toll-free at **1-888-423-5436**

For more information about REVLIMID and the REVLIMID REMS[®] program, please visit **www.CelgeneRiskManagement.com**, or call the Celgene Customer Care Center at **1-888-423-5436**.

Please see full Prescribing Information, including Boxed WARNINGS, CONTRAINDICATIONS, WARNINGS AND PRECAUTIONS, and ADVERSE REACTIONS, enclosed.

((Celgene logo)) ((REVLIMID REMS[®] logo)) ((REVLIMID logo))

Initial prescription (for all patients unless otherwise noted)

1. For females of reproductive potential, obtain 2 negative pregnancy tests sensitive to at least 50 mIU/mL, even if continuous abstinence is the chosen method of birth control. One test must be obtained 10 to 14 days and one test within 24 hours prior to writing an initial prescription for REVLIMID[®] (lenalidomide).
2. Provide mandatory counseling: no drug sharing, no blood or sperm donation, and appropriate contraceptive use. Patients should be instructed to not extensively handle or open REVLIMID capsules.
3. Obtain, review, and complete the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form online by visiting www.CelgeneRiskManagement.com, accessing the Celgene REMS mobile app, using the CD-ROM software, or by calling the Celgene Customer Care Center for assistance at **1-888-423-5436**.
 - **Males (adults and children)**
 - **Females of reproductive potential include all females who are menstruating**, amenorrheic from previous medical treatments, under 50 years of age, and/or perimenopausal, and do not qualify for the females not of reproductive potential category
 - **Females not of reproductive potential include females who have been in natural menopause for at least 24 consecutive months**, or who have had a hysterectomy and/or bilateral oophorectomy, or female children who have not started menstruating
4. Send the completed and signed REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form online through www.CelgeneRiskManagement.com, the Celgene REMS mobile app, or to the Celgene Customer Care Center by faxing to **1-888-432-9325**.
5. Instruct female patients to complete a brief initial mandatory confidential survey by visiting www.CelgeneRiskManagement.com, accessing the Celgene REMS mobile app, or by calling **1-888-423-5436**, prior to prescriber obtaining an authorization number.
 - Males do not need to complete the initial survey
6. Complete a prescriber brief mandatory confidential survey by visiting www.CelgeneRiskManagement.com, accessing the Celgene REMS mobile app, or calling the Celgene Customer Care Center at **1-888-423-5436**, for **every patient** before each prescription is written.
 - You will need to enter the following information:
 - Prescriber's identification number
 - Patient's identification number
 - Date and result of patient's last pregnancy test(s) (if applicable); valid only for 7 days from date of last pregnancy test
 - Average daily dose
 - Total number of days supplied (cannot exceed 28 days)
7. An authorization number will be issued upon completion of the survey and must be written along with the patient risk category on the prescription. Authorization numbers are valid for 7 days from date of last pregnancy test for females of reproductive potential and 30 days from the date it is issued for all other patients. No automatic refills or telephone prescriptions are permitted.
8. Send the prescription to a certified pharmacy.

Subsequent prescriptions (for all patients unless otherwise noted)

1. For females of reproductive potential, obtain scheduled pregnancy tests weekly during the first 4 weeks of use; then pregnancy testing should be repeated every 4 weeks in females with regular menstrual cycles. If menstrual cycles are irregular, the pregnancy testing should occur every 2 weeks.
2. Provide mandatory counseling: no drug sharing, no blood or sperm donation, and appropriate contraceptive use. Patients should be instructed to not extensively handle or open REVLIMID capsules.
3. Instruct patient to complete a brief mandatory confidential survey **as scheduled**, prior to prescriber obtaining an authorization number and filling the prescription.
 - Monthly:
 - **Males (adults and children)**
 - **Females of reproductive potential (adults and children)**
 - **Female children not of reproductive potential**
 - Every 6 months:
 - **Adult females not of reproductive potential**
4. Complete a prescriber brief mandatory confidential survey by visiting **www.CelgeneRiskManagement.com**, accessing the Celgene REMS mobile app, or calling the Celgene Customer Care Center at **1-888-423-5436**, for every patient before each prescription is written.
 - You will need to enter the following information:
 - Prescriber's identification number
 - Patient's identification number
 - Date and result of patient's last pregnancy test(s) (if applicable); valid only for 7 days from date of last pregnancy test
 - Average daily dose
 - Total number of days supplied (cannot exceed 28 days)
5. An authorization number will be issued upon completion of the survey and must be written along with the patient risk category on the prescription. Authorization numbers are valid for 7 days from date of last pregnancy test for females of reproductive potential and 30 days from the date it is issued for all other patients. No automatic refills or telephone prescriptions are permitted.
6. Send the prescription to a certified pharmacy.

((REVLIMID REMS[®] logo)) Prescriber Enrollment Form

All prescribers must be certified to prescribe REVLIMID[®] (lenalidomide). To become certified the prescriber must:

1. Complete the Prescriber Enrollment Form which is required for REVLIMID REMS[®] (formerly known as the RevAssist[®] program) certification.
2. Agree to steps on the following page that must be followed with every patient.

To submit this form electronically, please visit www.CelgeneRiskManagement.com or access the Celgene REMS mobile app.

To submit this form via fax, please complete the following page and fax it to 1-888-432-9325.

REVLIMID is contraindicated in pregnant females and females capable of becoming pregnant. Females of reproductive potential may be treated with REVLIMID provided adequate precautions are taken to avoid pregnancy.

Please review the steps on the following page that must be followed with every patient.

REVLIMID is only available under a restricted distribution program, REVLIMID REMS®.

[Back]

REVLIMID REMS® Prescriber Enrollment Form

When prescribing REVLIMID® (lenalidomide), I agree to:

- Provide patient counseling on the benefits and risks of REVLIMID therapy, including Boxed Warnings
- Submit a completed REVLIMID® (lenalidomide) Patient-Physician Agreement Form for each new patient
- Provide contraception and emergency contraception counseling with each new prescription prior to and during REVLIMID treatment
- Provide scheduled pregnancy testing for females of reproductive potential and verify negative pregnancy test results prior to writing a new prescription or subsequent prescriptions
- Report any pregnancies in female patients or female partners of male patients prescribed REVLIMID immediately to Celgene Drug Safety (or Celgene Customer Care Center)
- Complete a mandatory and confidential prescriber survey online or by telephone for all patients and obtain a new authorization number for each prescription written. The authorization number and patient risk category must be written on each prescription
- Facilitate female patient compliance with an initial mandatory confidential patient survey online or by telephone
- Prescribe no more than a 4-week (28-day) supply, with no automatic refills or telephone prescriptions
- Contact a REVLIMID REMS® certified pharmacy to fill the prescription
- Remind patients to return all REVLIMID capsules to Celgene Corporation or their REVLIMID prescriber, or to the pharmacy that dispensed the REVLIMID to them
- Return to Celgene all REVLIMID capsules that are returned by patients. Shipping fees will be paid by Celgene Corporation. To arrange returns, call the Celgene Customer Care Center
- Re-enroll patients in the REVLIMID REMS® program if REVLIMID is required and previous therapy with REVLIMID has been discontinued for 12 consecutive months

Please fill out the spaces below completely.

REVLIMID® (lenalidomide) Patient-Physician Agreement Form

~~Adult Female Who Can Get Pregnant~~

Please read the following statements carefully.

Your healthcare provider has prescribed REVLIMID for you. REVLIMID is available only through a restricted distribution program called the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) (formerly known as the RevAssist® program). Before taking REVLIMID, you must read and agree to all of the instructions in the REVLIMID REMS® program.

If you are pregnant or become pregnant while taking REVLIMID, it is important for you to know that your unborn baby can have severe birth defects or even die.

REVLIMID causes low white blood cells (neutropenia) and low platelets (thrombocytopenia) in most patients.

REVLIMID causes a higher chance for blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine.

For more information, please see the REVLIMID Medication Guide.

INSTRUCTIONS

Before starting your treatment with REVLIMID, you will need to:

1. Complete sections 1 and 2 of this form and sign and date on page 6.
2. Read the REVLIMID REMS® materials contained in the **Patient Resource Pack**.
3. Keep a copy of this form for your records.

Authorized Representatives:

If the authorized representative does not have the power of attorney, **a signed and dated letter from the prescriber, on the prescriber's letterhead, must be submitted to the Celgene Customer Care Center, along with the REVLIMID® (lenalidomide) Patient-Physician Agreement Form.** This letter must contain the following: a statement that the incompetent patient lacks the capacity to complete the REVLIMID® (lenalidomide) Patient-Physician Agreement Form, including identification of the medical condition causing the incapacity; the name and address of the authorized representative; the authorized representative's relationship to the patient; and an opinion that the authorized representative accepts responsibility for the patient's compliance with the REVLIMID REMS® program and is authorized to consent to treatment with REVLIMID on behalf of the patient.

For more information, visit www.CelgeneRiskManagement.com, or call the Celgene Customer Care Center at 1-888-423-5436.

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

~~Adult Female Who Can Get Pregnant~~

Please read the following statements carefully. Mark the box (with an "X") if you agree with the statement. Please do not mark or write outside of designated areas.

Section 1. Patient Agreement

I understand and confirm that:

- REVLIMID can cause severe birth defects or death to my unborn baby if I am pregnant or become pregnant during treatment
- I am not pregnant now and will not get pregnant while being treated with REVLIMID
- It is possible for me to get pregnant if:
 - I am having my period (am menstruating), or
 - My period has stopped because of my treatment
 - And I have sex with a male
- Not having sex is the only birth control method that is 100% effective
- I am not breastfeeding now and will not breastfeed while being treated with REVLIMID
- My REVLIMID prescription is **only** for me and is not to be shared with others
- I have read and understood the REVLIMID Patient Guide to REVLIMID REMS[®] Program and/or educational materials, including the Medication Guide. These materials include information about the possible health problems and side effects that REVLIMID may cause
- My healthcare provider has reviewed this information with me and answered any questions I have asked
- I may be contacted by Celgene to assist with the REVLIMID REMS[®] program
- I will NOT donate blood while taking REVLIMID (including dose interruptions) and for 4 weeks after stopping REVLIMID

BAR CODE HERE

REVLIMID® (lenalidomide) Patient-Physician Agreement Form

~~Adult Female Who Can Get Pregnant~~

- I will use at the same time at least 1 highly effective method and at least 1 additional effective method of birth control every time I have sex with a male unless otherwise recommended by my healthcare provider. My healthcare provider may recommend that I use at the same time 2 different birth control methods every time I have sex with a male if I cannot use a hormonal or intrauterine device (IUD) method

Highly effective birth control methods	Additional effective birth control methods
Intrauterine device (IUD)	Male latex or synthetic condom Diaphragm Cervical cap
Hormonal methods (birth control pills, hormonal patches, injections, vaginal rings, or implants)	
Tubal ligation (having your tubes tied)	
Partner's vasectomy (tying of the tubes to prevent the passing of sperm)	

Not having any sex is the only birth control that is 100% effective. Unacceptable methods of birth control are progesterone-only "mini-pills", IUD Progesterone T, female condoms, natural family planning (rhythm method) or breastfeeding, fertility awareness, withdrawal, and cervical shield (A cervical shield should not be confused with a cervical cap, which is an effective secondary form of contraception).

- I will use at the same time at least 1 highly effective method and at least 1 additional effective method of birth control every time I have sex with a male:

- Starting at least 4 weeks before taking REVLIMID
- While taking REVLIMID
- During breaks (dose interruptions)
- For at least 4 weeks after stopping REVLIMID

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

Adult Female Who Can Get Pregnant

- I will have pregnancy tests—performed by my healthcare provider—according to the schedule listed below:
 - 10 to 14 days before receiving my first prescription for REVLIMID, and again 24 hours before receiving my first prescription for REVLIMID
 - Every week during the first 4 weeks of my treatment with REVLIMID
 - Every 4 weeks during the rest of my treatment if I have a regular menstrual cycle or no cycle at all—or—every 2 weeks if I have an irregular menstrual cycle
- I will have these pregnancy tests even if I do not get my period because of my treatment
- I will need to take another pregnancy test performed by my healthcare provider if my medication is not dispensed within 7 days of taking my pregnancy test
- I will stop taking REVLIMID and call my healthcare provider right away if:
 - I become pregnant while taking REVLIMID, or
 - I miss my period or have unusual menstrual bleeding, or
 - I stop using birth control, or
 - I think—for any reason—that I am pregnant or may be pregnant

If my healthcare provider is not available I will call the Celgene Customer Care Center at

1-888-423-5436

- I will stop taking REVLIMID immediately and call my healthcare provider right away if I have sex with a male without using birth control or if I think my birth control has failed. My healthcare provider will discuss my options, which may include emergency birth control. If I become pregnant or think I may be pregnant, and my healthcare provider is not available, I will call the Celgene Customer Care Center at **1-888-423-5436**
- I will complete the mandatory confidential monthly survey while taking REVLIMID
- I will keep my REVLIMID prescription out of the reach of children
- I will return any unused REVLIMID capsules for disposal to Celgene by calling **1-888-423-5436**. Celgene will pay for the shipping costs. I understand that Celgene cannot give me a refund for the capsules I did not take. Unused REVLIMID capsules can also be returned to my REVLIMID prescriber or to the pharmacy that dispensed the REVLIMID to me

Section 2. Authorization

I understand and confirm that:

- By signing this authorization, I allow my healthcare providers and pharmacies to share my medical and other health information with Celgene Corporation and other companies that Celgene works with to:
 - Coordinate the delivery of products and services available from pharmacies and Celgene patient assistance programs, including Celgene Patient Support[®], and other companies
 - Analyze data for internal business purposes on the use of REVLIMID
 - Evaluate the effectiveness of the REVLIMID REMS[®] program
 - Use in any other manner as required or permitted by law
 - Provide me with information about REVLIMID or my condition
- This authorization will remain in effect for 12 months after I stop REVLIMID. However, it may be revoked (cancelled) earlier by me, at any time, once I inform my healthcare provider that I will no longer be a part of the REVLIMID REMS[®] program
- Once my information is shared as noted above, and to process and coordinate the delivery of product, there is no guarantee that the person receiving the information will not share it with another party
- I may refuse to sign this authorization, which means that I do not want to participate in the REVLIMID REMS[®] program. I understand that by refusing to participate in the REVLIMID REMS[®] program, I will not be able to receive REVLIMID. However, I understand that I can speak with my healthcare provider about other treatment options for my condition
- Upon signing this form, I authorize my healthcare provider to begin my treatment with REVLIMID

Section 3. Authorization to Start Treatment

I have read the information on this form or it has been read aloud to me in the language of my choice. I understand that if I do not follow all of the instructions regarding the REVLIMID REMS[®] program, I will not be able to receive REVLIMID. I also understand that the information I provide on this form and as part of the surveys I will complete during treatment will be known by the manufacturer of REVLIMID and the Food and Drug Administration (FDA).

I agree that the prescriber has fully explained to the patient the nature, purpose, and risks of the treatment described above, especially the potential risks to females who can get pregnant. The prescriber has asked the patient if she has any questions regarding her treatment with REVLIMID (including appropriate birth control methods) and has answered those questions to the patient's and prescriber's mutual satisfaction. Both patient and prescriber certify that they will comply with all of their obligations and responsibilities as described under the REVLIMID REMS[®] program.

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

Adult Female Who Can Not Get Pregnant

Please read the following statements carefully.

Your healthcare provider has prescribed REVLIMID for you. REVLIMID is available only through a restricted distribution program called the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) (formerly known as the RevAssist[®] program). Before taking REVLIMID, you must read and agree to all of the instructions in the REVLIMID REMS[®] program.

Any unborn baby of a female taking REVLIMID can have severe birth defects or even die.

REVLIMID causes low white blood cells (neutropenia) and low platelets (thrombocytopenia) in most patients.

REVLIMID causes a higher chance for blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine.

For more information, please see the REVLIMID Medication Guide

INSTRUCTIONS

Before starting your treatment with REVLIMID, you will need to:

1. Complete sections 1 and 2 of this form and sign and date on page 5.
2. Read the REVLIMID REMS[®] materials contained in the Patient Resource Pack.
3. Keep a copy of this form for your records.

Authorized Representatives:

If the authorized representative does not have the power of attorney, a signed and dated letter from the prescriber, on the prescriber's letterhead, must be submitted to the Celgene Customer Care Center, along with the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form. This letter must contain the following: a statement that the incompetent patient lacks the capacity to complete the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form, including identification of the medical condition causing the incapacity; the name and address of the authorized representative; the authorized representative's relationship to the patient; and an opinion that the authorized representative accepts

responsibility for the patient's compliance with the REVLIMID REMS[®] program and is authorized to consent to treatment with REVLIMID on behalf of the patient.

For more information, visit www.CelgeneRiskManagement.com, or call the Celgene Customer Care Center at **1-888-423-5436**.

Female Child Who Can Get Pregnant

Please read the following statements carefully.

Your healthcare provider has prescribed REVLIMID for your child.^{*} REVLIMID is available only through a restricted distribution program called the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) (formerly known as the RevAssist[®] program). Before taking REVLIMID, patients must read and agree to all of the instructions in the REVLIMID REMS[®] program.

If your child is pregnant or becomes pregnant while taking REVLIMID, it is important to know that the unborn baby can have severe birth defects or even die.

REVLIMID causes low white blood cells (neutropenia) and low platelets (thrombocytopenia) in most patients.

REVLIMID causes a higher chance for blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine.

For more information, please see the REVLIMID Medication Guide.

INSTRUCTIONS

Before your child starts treatment with REVLIMID, you will need to:

1. Complete sections 1 and 2 of this form and sign and date on page 6.
2. Read the REVLIMID REMS[®] materials contained in the Patient Resource Pack.
3. Keep a copy of this form for your records.

For more information, visit www.CelgeneRiskManagement.com, or call the Celgene Customer Care Center at 1-888-423-5436.

*Throughout this form, the word *child* includes any child of whom you are the parent or guardian.

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

~~Female Child Who Can Not Get Pregnant~~

Section 3. Authorization to Start Treatment

I have read the information on this form or it has been read aloud to me in the language of my choice. I understand that if my child does not follow all of the instructions regarding the REVLIMID REMS[®] program, she will not be able to receive REVLIMID. I also understand that the information we provide on this form and as part of the surveys we will complete during treatment will be known by the manufacturer of REVLIMID and the Food and Drug Administration (FDA).

I agree that the prescriber has fully explained to the patient and her parent/guardian the nature, purpose, and risks of the treatment described above, especially the potential risks to females who can get pregnant. The prescriber has asked the patient and her parent/guardian if they have any questions regarding the child's treatment with REVLIMID and has answered those questions to the patient's, parent/guardian's, and prescriber's mutual satisfaction. The patient, parent/guardian, and prescriber certify that they will comply with all of their obligations and responsibilities as described under the REVLIMID REMS[®] program.

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

Adult Male

Please read the following statements carefully.

Your healthcare provider has prescribed REVLIMID for you. REVLIMID is available only through a restricted distribution program called the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) (formerly known as the RevAssist[®] program). Before taking REVLIMID, you must read and agree to all of the instructions in the REVLIMID REMS[®] program.

If a female you have sex with is pregnant or becomes pregnant by you while you are taking REVLIMID, it is important for you to know that your unborn baby can have severe birth defects or even die.

REVLIMID causes low white blood cells (neutropenia) and low platelets (thrombocytopenia) in most patients.

REVLIMID causes a higher chance for blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine.

For more information, please see the REVLIMID Medication Guide.

INSTRUCTIONS

Before starting your treatment with REVLIMID, you will need to:

1. Complete sections 1 and 2 of this form and sign and date on page 6.
2. Read the REVLIMID REMS[®] materials contained in the Patient Resource Pack.
3. Keep a copy of this form for your records.

Authorized

Representatives:

If the authorized representative does not have the power of attorney, a **signed and dated letter from the prescriber, on the prescriber's letterhead, must be submitted to the Celgene Customer Care Center, along with the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form.** This letter must contain the following: a statement that the incompetent patient lacks the capacity to complete the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form, including identification of the medical condition causing the incapacity; the name and address of the authorized representative; the authorized representative's relationship to the patient; and an opinion that the authorized representative accepts responsibility for the patient's compliance with the REVLIMID REMS[®] program and is authorized to consent to treatment with REVLIMID on behalf of the patient.

For more information, visit www.CelgeneRiskManagement.com, or call the Celgene Customer Care Center at 1-888-423-5436.

Adult Male

Please read the following statements carefully. Mark the box (with an "X") if you agree with the statement. Please do not mark or write outside of designated areas.

Section 1. Patient Agreement

I understand and confirm that:

- REVLIMID can cause severe birth defects or death to my unborn baby if I have sex with a female who is pregnant or who is able to get pregnant during my treatment

- My semen may contain REVLIMID even after I stop treatment. I must use a latex or synthetic condom **every time** I have sex with a female who is pregnant or who is able to get pregnant while taking REVLIMID (including dose interruptions), and for 4 weeks after stopping REVLIMID
- Not having sex is the only birth control method that is 100% effective
- My REVLIMID prescription is **only** for me and is not to be shared with others
- I have read and understood the REVLIMID Patient Guide to the REVLIMID REMS[®] Program and/or educational materials, including the Medication Guide. These materials include information about the possible health problems and side effects that REVLIMID may cause
- My healthcare provider has reviewed this information with me and answered any questions I have asked
- I may be contacted by Celgene to assist with the REVLIMID REMS[®] program

BAR CODE HERE

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

Adult Male

- I must use a latex or synthetic condom **every time** I have sex with a female who is pregnant or who is able to get pregnant, even if I have had a successful vasectomy (tying of the tubes to prevent the passing of sperm)
- I will use a latex or synthetic condom **every time** I have sex with a female who is pregnant or who is able to get pregnant:
- While taking REVLIMID
 - During breaks (dose interruptions)
 - For 4 weeks after stopping REVLIMID
- I will call my healthcare provider right away if:
- I have unprotected sex with a female who is pregnant or who is able to get pregnant
 - I think—**for any reason**—that my sexual partner is pregnant or may be pregnant
 - My partner becomes pregnant or thinks she may be pregnant

If my healthcare provider is not available I will call the Celgene Customer Care Center at **1-888-423-5436**

- I will complete the mandatory confidential monthly survey while taking REVLIMID
- I will keep my REVLIMID prescription out of the reach of children
- I will return any unused REVLIMID capsules for disposal to Celgene by calling **1-888-423-5436**. Celgene will pay for the shipping costs. I understand that Celgene cannot give me a refund for the capsules I did not take. Unused REVLIMID capsules can also be returned to my REVLIMID prescriber, or to the pharmacy who dispensed the REVLIMID to me

BAR CODE HERE

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

Adult Male

- I will **not** share my REVLIMID capsules with anyone even if they have symptoms like mine
- I will **not** donate blood or sperm while taking REVLIMID during breaks (dose interruptions) and for 4 weeks after stopping REVLIMID

Section 2. Authorization

I understand and confirm that:

- By signing this authorization, I allow my healthcare providers and pharmacies to share my medical and other health information with Celgene Corporation and other companies that Celgene works with to:
 - Coordinate the delivery of products and services available from pharmacies and Celgene patient assistance programs, including Celgene Patient Support[®], and other companies
 - Analyze data for internal business purposes on the use of REVLIMID
 - Evaluate the effectiveness of the REVLIMID REMS[®] program
 - Use in any other manner as required or permitted by law
 - Provide me with information about REVLIMID or my condition

BAR CODE HERE

REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form

Adult Male

- This authorization will remain in effect for 12 months after I stop REVLIMID. However, it may be revoked (cancelled) earlier by me, at any time, once I inform my healthcare provider that I will no longer be a part of the REVLIMID REMS[®] program
- Once my information is shared as noted above, and to process and coordinate the delivery of product, there is no guarantee that the person receiving the information will not share it with another party
- I may refuse to sign this authorization, which means that I do not want to participate in the REVLIMID REMS[®] program. I understand that by refusing to participate in the REVLIMID REMS[®] program, I will not be able to receive REVLIMID. However, I understand that I can speak with my healthcare provider about other treatment options for my condition
- Upon signing this form, I authorize my healthcare provider to begin my treatment with REVLIMID

REVLIMID Risk Evaluation and Mitigation Strategy (REMS) program education and prescribing safety kit

[Housing Unit Cover]

Risks of REVLIMID[®] (lenalidomide)

- REVLIMID is similar to the medicine thalidomide (THALOMID[®]). Thalidomide can cause severe life-threatening birth defects. If REVLIMID is used during pregnancy, it can cause birth defects or embryo-fetal death. REVLIMID must not be used by pregnant females and females who are able to get pregnant. Females who are able to get pregnant must avoid pregnancy while taking REVLIMID
- REVLIMID causes low white blood cells (neutropenia) and low platelets (thrombocytopenia) in most patients
- REVLIMID causes a higher chance for blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine

REVLIMID in combination with dexamethasone is indicated for the treatment of patients with multiple myeloma (MM).

REVLIMID is indicated for the treatment of patients with transfusion-dependent anemia due to low- or intermediate-1—risk myelodysplastic syndromes (MDS) associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities.

REVLIMID is indicated for the treatment of patients with mantle cell lymphoma (MCL) whose disease has relapsed or progressed after two prior therapies, one of which included bortezomib.

Prescriber quick reference guide

1. The prescriber provides comprehensive counseling.
2. The prescriber verifies negative pregnancy test for all female patients of reproductive potential.
3. The prescriber completes REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form with each patient and sends to Celgene.
4. Female patients complete initial mandatory confidential survey by:
 - Visiting **www.CelgeneRiskManagement.com**
 - Accessing the Celgene REMS mobile app
 - Calling Celgene Customer Care Center at **1-888-423-5436**

Male patients do not need to complete the initial survey.

All patients must complete subsequent mandatory confidential surveys as outlined in the Prescriber Guide to REVLIMID REMS[®] Program (formerly known as the RevAssist[®] program).

5. The prescriber completes mandatory confidential survey and receives authorization number by:
 - Visiting **www.CelgeneRiskManagement.com**
 - Accessing the Celgene REMS mobile app
 - Calling Celgene Customer Care Center at **1-888-423-5436**
6. **The** prescriber writes REVLIMID prescription and includes authorization number and patient risk category.
7. The prescriber sends prescription to certified pharmacy.

This flow sheet should be used only as a quick reference and only after reviewing all of the REVLIMID REMS[®] procedures.

REVLIMID is only available under a restricted distribution program, REVLIMID REMS[®].

Please see full Prescribing Information, including Boxed WARNINGS, CONTRAINDICATIONS, WARNINGS AND PRECAUTIONS, and ADVERSE REACTIONS, enclosed.

Program for REVLIMID[®] (lenalidomide) Education and Prescribing Safety

Dear Prescriber:

Enclosed are your REVLIMID REMS[®] education materials.

Celgene Corporation is pleased to provide you with the enclosed materials for use in the REVLIMID REMS[®] program (formerly known as the RevAssist[®] program).

Important Information about the REVLIMID REMS[®] program

- To avoid embryo-fetal exposure, REVLIMID is only available under a restricted distribution program called “REVLIMID REMS[®]”
- Lenalidomide is contraindicated in pregnant females and females capable of becoming pregnant. Females of reproductive potential may be treated with lenalidomide provided adequate precautions are taken to avoid pregnancy
- Male Patients: Clinical data has demonstrated the presence of lenalidomide in human semen. Male patients taking REVLIMID should not donate sperm. Males receiving REVLIMID must always use a latex or synthetic condom during any sexual contact with females of reproductive potential even if they have undergone a successful vasectomy
- Only prescribers and pharmacies certified with REVLIMID REMS[®] can prescribe and dispense REVLIMID to patients who are enrolled and meet all the conditions of the REVLIMID REMS[®] program

As a prescriber certified with the REVLIMID REMS[®] program, please review and familiarize yourself with the contents of the enclosed REVLIMID REMS[®] Kit:

Prescriber Materials

- REVLIMID REMS[®] software and Installation Guide
- Prescriber Guide to REVLIMID REMS[®] Program
- REVLIMID Full Prescribing Information

Patient Materials (Patient Resource Pack)

- Patient Guide to REVLIMID REMS[®] Program
- Emergency Contraception Brochure
- MEDICATION GUIDE

To order additional Patient Resource Packs, or if you have any questions about using the enclosed software, please call the Celgene Customer Care Center at 1-888-423-5436.

Sincerely,

Jerome B. Zeldis, MD, PhD

Chief Medical Officer

Guidelines for ordering, counseling, and dispensing REVLIMID[®] (lenalidomide)

Dispensing pharmacies must be certified in the REVLIMID REMS[®] program with Celgene and must be educated in the following dispensing procedures.

Step 1. Review incoming REVLIMID prescriptions

- A. Only accept prescriptions with an authorization number and patient risk category written on them.
 - Authorization numbers are valid for 7 days from the date of last pregnancy test for female patients of reproductive potential and 30 days from the date it is issued for all other patients. No automatic refills or telephone prescriptions are permitted
 - Faxed prescriptions are permissible depending on state laws
- B. Make sure the prescription is signed and dated.
- C. Confirm the prescription is written for a 4-week (28-day) supply or less.
- D. For subsequent prescriptions, verify there are 7 days or less remaining of therapy on the existing prescription.

Step 2. Counsel patient

- A. Make sure a **certified REVLIMID REMS[®]** counselor counsels the patient.
- B. Complete the corresponding section (based on the patient risk category) of the Education and Counseling Checklist and ensure the form is signed and dated. Ensure the appropriate boxes are checked off. Retain a copy of the checklist and record of the associated prescription.
- C. If the patient mentions adverse drug experiences that are suspected to be associated with the use of REVLIMID and any suspected pregnancy occurring during the treatment with REVLIMID, make sure to document these experiences using acceptable documentation as noted on the checklist.
 - **Acceptable documentation examples:**
 1. Celgene Adverse Drug Event form and fax confirmation
 2. Pharmacy log

- D. Report adverse drug experiences that are suspected to be associated with the use of REVLIMID to Celgene Drug Safety within 24 hours. See the Adverse Drug Experience Reporting Procedure on page 7 for more information.

Guidelines for ordering, counseling, and dispensing REVLIMID[®] (lenalidomide) (continued)

Step 3. Obtain confirmation number from Celgene Customer Care

- A. Prior to each prescription, contact Celgene Customer Care at **1-888-423-5436**, available 24 hours a day, 7 days a week. Eligible pharmacies may also use the Celgene REMS Pharmacy Portal at **www.CelgeneREMSPharmacyPortal.com**. Call your Celgene Account Manager to see if your pharmacy is eligible.
- Enter the pharmacy NABP number or DEA number
 - Enter the authorization number written on the prescription
 - Enter the number of capsules and milligram strength being dispensed
- B. Write the confirmation number and the date of receipt on the prescription. The confirmation number is only valid for 24 hours.
- C. If you do not obtain a confirmation number, do not dispense REVLIMID.

Step 4. Dispensing

- A. No Refills. A new prescription is required for each dispense. **Dispense subsequent prescriptions only if there are 7 days or less remaining of therapy on the existing prescription.**
- B. Ensure the confirmation number has not expired, ie, dispense within 24 hours from confirmation number receipt. If more than 24 hours have elapsed, **Do Not Dispense**. You must call Celgene Customer Care at **1-888-423-5436** to cancel the first confirmation number and obtain a new confirmation number. For female patients of reproductive potential, ship the same day or hand to the patient within 24 hours.
- C. Dispense each prescription with a Medication Guide and maintain a record on acceptable documentation.
- **Acceptable documentation examples:**
 1. Signed Education and Counseling Checklist (if counseling pharmacist and dispensing pharmacist are the same)
 2. Pharmacy log

D. Document the dispense date and maintain a record on acceptable documentation.

- **Acceptable documentation examples:**

1. Shipping receipt
2. Pharmacy dispensing log

Guidelines for ordering, counseling, and dispensing REVLIMID[®] (lenalidomide) (continued)

E. Dispense no more than a 4-week (28-day) supply. A new prescription is required for each dispense. No automatic refills or telephone prescriptions are permitted.

F. A signature is required for all shipping and dispense if picked up by patient.

Step 5. Perform drug accountability

- A. Pharmacy shall keep an inventory log for REVLIMID, by strength, reflecting its on-hand inventory at all times.
- B. Do not transfer REVLIMID to another pharmacy without prior authorization from Celgene.
- C. Accept unused REVLIMID (previously dispensed) from a patient or patient caregiver and return the capsules to Celgene for proper disposal.

REVLIMID Risk Evaluation Mitigation Strategy (REMS) Education and Counseling Checklist for Pharmacies

Ensure your patients know the risks

Before you are able to fill a prescription for REVLIMID[®] (lenalidomide), a checklist for each patient must be completed based on the patient risk category (written on the front of the Patient Prescription Form). When completing the checklist, be sure all the appropriate boxes are checked off ([✓]) and the form is signed and dated. All boxes and spaces must be marked or filled in during counseling with the patient for every prescription. Retain a copy of the checklist and record of the associated prescription.

Be prepared to provide the following information for each checklist: ((IMAGE OF CHECKLIST))

Authorization Number	Confirmation Number	Confirmation Date
Pharmacy Name	Pharmacy Address (including City, State, ZIP Code)	
Counselor Name	Work Phone Number	Extension
Patient Name	Patient Date of Birth	

Rules for dispensing and shipping

Making sure before you release REVLIMID

DO NOT DISPENSE OR SHIP REVLIMID TO A PATIENT UNLESS ALL THE FOLLOWING ARE DONE:

- Prescription has an authorization number and patient risk category written on it
- You have obtained a confirmation number and a confirmation date

- You are shipping the product within 24 hours of obtaining the confirmation number and requesting confirmation of receipt. For females of reproductive potential, the product must be shipped the same day the confirmation number is obtained
- The Medication Guide is included with the prescription
- You confirm the prescription is no more than a 4-week (28-day) supply and there are 7 days or less remaining on the existing REVLIMID prescription

For further information about REVLIMID, please refer to the full Prescribing Information, enclosed.

Adverse drug experience reporting procedure for healthcare professionals

Celgene is committed to ensuring patient safety through the monitoring of adverse drug experiences associated with the use of REVLIMID® (lenalidomide).

Please report adverse drug experiences that are suspected to be associated with the use of REVLIMID and any suspected pregnancy occurring during the treatment with REVLIMID to Celgene using any of the following methods.

REPORTING TO CELGENE

- Email: **drugsafety@celgene.com**
- Telephone: **1-908-673-9667**
- Toll-free: **1-800-640-7854** (Global Drug Safety & Risk Management) or **1-888-423-5436** (Celgene Customer Care Center)
- Fax: **1-908-673-9115**
- Mail to: Global Drug Safety & Risk Management, Celgene Corporation, 300 Connell Dr., Suite 6000, Berkeley Heights, NJ 07922

REPORTING TO THE FDA

Adverse drug experiences that are suspected to be associated with the use of REVLIMID and any suspected pregnancy occurring during the treatment with REVLIMID may also be reported to the FDA MedWatch Reporting System using any of the following methods:

- Online at: **<https://www.accessdata.fda.gov/scripts/medwatch/medwatch-online.htm>**
- Telephone: **1-800-FDA-1088**
- Fax: **1-800-FDA-0178**
- Mail to: MedWatch, 5600 Fishers Lane, Rockville, MD 20852-9787

Education and Counseling Checklist for Pharmacies

REVLIMID Risk Evaluation and Mitigation Strategy (REMS) program (formerly known as the RevAssist® program) education and prescribing safety

Authorization No.: Confirmation No.: Confirmation Date:

Pharmacy Name:

Pharmacy Address:

Counselor Name: Work Phone: Ext.:

Patient Name: Date of Birth:

Risk Category:

Checklist for female patients of reproductive potential

I will make sure that patients are aware that they will receive the Medication Guide along with their prescription

I COUNSELED ADULTS AND CHILDREN ON:

Potential embryo-fetal toxicity

Not taking REVLIMID® (lenalidomide) if pregnant or breastfeeding

Using **at the same time** at least 1 highly effective method—tubal ligation, IUD, hormonal (birth controls pills, hormonal patches, injections, vaginal rings, or implants), or partner's vasectomy—and

at least 1 additional effective method of birth control—male latex or synthetic condom, diaphragm, or cervical cap—**every time they have sex with a male**, or abstaining from sex with a male

- Unacceptable methods of birth control are progesterone-only “mini-pills”, IUD Progesterone T, female condoms, natural family planning (rhythm method) or breastfeeding, fertility awareness, withdrawal, and cervical shield (A cervical shield should not be confused with a cervical cap, which is an effective secondary form of contraception).

- Continuing to use **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control beginning at least 4 weeks before taking REVLIMID, while taking REVLIMID, during dose interruptions, and for at least 4 weeks after stopping REVLIMID **every time they have sex with a male**, or abstaining from sex with a male

- Obtaining a pregnancy test—performed by their healthcare provider—weekly during the first 4 weeks of use. Thereafter, pregnancy testing should be repeated every 4 weeks during the rest of their treatment in females with regular menstrual cycles or no cycle at all. If menstrual cycles are irregular, the pregnancy testing should occur every 2 weeks

The need to stop taking REVLIMID right away in the event of becoming pregnant, or if they think for any reason they may be pregnant, and to call their healthcare provider immediately

Possible side effects include neutropenia, thrombocytopenia, deep vein thrombosis, and pulmonary embolism as well as risk of myocardial infarction and stroke

The need for del 5q MDS patients to schedule a blood test every week for the first 8 weeks and monthly thereafter to monitor blood counts while taking REVLIMID

Not sharing REVLIMID capsules with anyone—especially with females who can get pregnant

Not donating blood while taking REVLIMID (including dose interruptions) and for 4 weeks after stopping REVLIMID

Not breaking, chewing, or opening REVLIMID capsules

Instructions on REVLIMID dose and administration

Milligram (mg) Strength _____ Number of Capsules Dispensed _____

FEMALE CHILDREN (<18 YEARS OF AGE):

Parent or legal guardian must have read the REVLIMID REMS® education material and agreed to ensure compliance

Checklist for female patients not of reproductive potential (natural menopause for at least 24 consecutive months, a hysterectomy, and/or bilateral oophorectomy)

I will make sure that patients are aware that they will receive the Medication Guide along with their prescription

I COUNSELED ADULTS AND CHILDREN ON:

- Possible side effects include neutropenia, thrombocytopenia, deep vein thrombosis, and pulmonary embolism as well as risk of myocardial infarction and stroke

- The need for del 5q MDS patients to schedule a blood test every week for the first 8 weeks and monthly thereafter to monitor blood counts while taking REVLIMID

- Not sharing REVLIMID capsules with anyone—especially with females who can get pregnant

- Not donating blood while taking REVLIMID (including dose interruptions) and for 4 weeks after stopping REVLIMID

- Not breaking, chewing, or opening REVLIMID capsules

- Instructions on REVLIMID dose and administration

Milligram (mg) Strength _____ Number of Capsules Dispensed _____

FEMALE CHILDREN (<18 YEARS OF AGE):

- Parent or legal guardian must have read the REVLIMID REMS[®] education material and agreed to ensure compliance
- Parent or legal guardian must inform the child's healthcare provider when the child begins menses

Checklist for male patients

- I will make sure that patients are aware that they will receive the Medication Guide along with their prescription

I COUNSELED ADULTS AND CHILDREN ON:

- Potential embryo-fetal toxicity and contraception (wearing a latex or synthetic condom **every time** when engaging in sexual intercourse with a female who can get pregnant, even if the patient has had a successful vasectomy)
- Female partners of males taking REVLIMID[®] (lenalidomide) must call their healthcare provider right away if they get pregnant
- Possible side effects include neutropenia, thrombocytopenia, deep vein thrombosis, and pulmonary embolism as well as risk of myocardial infarction and stroke

- The need for del 5q MDS patients to schedule a blood test every week for the first 8 weeks and monthly thereafter to monitor blood counts while taking REVLIMID

- Not sharing REVLIMID capsules with anyone—especially with females who can get pregnant

- Not donating blood or sperm while taking REVLIMID (including dose interruptions) and for 4 weeks after stopping REVLIMID

- Not breaking, chewing, or opening REVLIMID capsules

- Instructions on REVLIMID dose and administration
Milligram (mg) Strength _____ Numbers of Capsules Dispensed _____

MALE CHILDREN (<18 YEARS OF AGE):

- Parent or legal guardian must have read the REVLIMID REMS[®] education material and agreed to ensure compliance

All boxes and spaces must be marked or filled in during counseling with the patient for every prescription.

Counselor Signature: _____ **Date:** _____

REMS-REV16736

REVLIMID REMS® Pharmacy Certification Quiz

1. Authorization numbers for females of reproductive potential are valid for up to _____ days:
(Mandatory Question)
 - a. **7 days**
 - b. 10 days
 - c. 14 days
 - d. 28 days

2. It is not necessary to obtain a confirmation number to dispense. (Mandatory Question)
 - a. True
 - b. **False**

3. Celgene REMS programs are mandated to avoid embryo-fetal exposure and to inform prescribers, patients, and pharmacists on the serious risks and safe-use conditions for each treatment. (Mandatory Question)
 - a. **True**
 - b. False

4. It is not required to retain the prescription with the authorization and confirmation numbers for each filled prescription. It is not necessary to complete the Education and Counseling Checklist.
 - a. True
 - b. **False**

5. According to the package insert's boxed warnings and warnings and precautions, neutropenia, thrombocytopenia, deep venous thrombosis, and pulmonary embolism as well as risk of myocardial infarction and stroke have been reported in patients receiving REVLIMID.
(Mandatory Question)
 - a. **True**
 - b. False

6. REVLIMID can cause serious birth defects. (Mandatory Question)
 - a. **True**
 - b. False

7. What pregnancy precautions are required for a female of reproductive potential with respect to heterosexual sexual contact?

- a. **Must use at the same time at least 1 highly effective method and at least 1 additional effective method of birth control every time she has sex with a male, beginning at least 4 weeks before therapy, during therapy (including dose interruptions), and for at least 4 weeks after stopping therapy**
 - b. Abstain from having any heterosexual sexual contact only while taking therapy
 - c. After stopping therapy it is okay to get pregnant at any time
 - d. Use 2 forms of birth control 2 weeks before taking therapy
8. What precautions are required for a male with respect to sexual contact with his female partner of reproductive potential?
- a. **Use of a latex or synthetic condom every time he has sexual intercourse with a FRP during therapy (including dose interruptions) and for 4 weeks after stopping therapy, even if he has undergone a successful vasectomy**
 - b. Abstain from having any sexual contact with a female of reproductive potential only while taking therapy
 - c. Use latex or synthetic condoms while taking therapy. No precautions are necessary once treatment has stopped
 - d. Males taking therapy who have had a vasectomy do not need to use latex or synthetic condoms
9. For all Celgene REMS programs, female patients of reproductive potential must have a negative pregnancy test: *(Mandatory Question)*
- a. Prior to initial prescription
 - b. Prior to subsequent prescription
 - c. **Prior to initial prescription and prior to subsequent prescription**
 - d. None of these
10. Adverse drug experiences that are suspected to be associated with the use of therapy, and any suspected pregnancy occurring during treatment, must be reported to Celgene. *(Mandatory Question)*
- a. **True**
 - b. False
11. The Medication Guide must be provided every time REVLIMID is dispensed. *(Mandatory Question)*
- a. **True**
 - b. False
12. A certified Celgene REMS pharmacy cannot dispense more than a _____ supply of REVLIMID.

- a. **28 day**
- b. 3 month
- c. 2 week
- d. 1 year

13. Authorization numbers for patient risk categories other than females of reproductive potential are valid for up to _____ days. (*Mandatory Question*)

- a. **30 days**
- b. 10 days
- c. 7 days
- d. 28 days

14. A male patient can donate sperm at any time during therapy.

- a. True
- b. **False**

Patient Guide to ((REVLIMID REMS[®] logo)) Risk Evaluation And Mitigation Strategy (REMS) Program

This guide provides you important information about:

- The risks of REVLIMID[®] (lenalidomide)
 - Birth defects (deformed babies) or death of an unborn baby
 - Low white blood cells (neutropenia) and low platelets (thrombocytopenia)
 - Blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine

- The REVLIMID REMS[®] Program
 - What females who can get pregnant need to know:
 - Birth control options
 - What females who can not get pregnant need to know
 - What males need to know

((REVLIMID logo))

Risks of REVLIMID® (lenalidomide)

REVLIMID is similar to the medicine thalidomide (THALOMID®). Thalidomide can cause severe life-threatening birth defects. If REVLIMID is used during pregnancy, it can cause birth defects or death to unborn babies. REVLIMID must not be used by pregnant females and females who are able to get pregnant. Females who are able to get pregnant must avoid pregnancy while taking REVLIMID.

REVLIMID causes low white blood cells (neutropenia) and low platelets (thrombocytopenia) in most patients.

REVLIMID causes a higher chance for blood clots in your arteries (heart attacks and strokes), veins (deep vein thrombosis) and lungs (pulmonary embolism). To reduce this increased risk, most people who take REVLIMID will also take a blood thinner medicine.

What is the REVLIMID REMS® program?

To avoid serious risks to unborn babies, REVLIMID is only available under a restricted distribution program called the “REVLIMID Risk Evaluation and Mitigation Strategy (REMS)” (formerly known as the RevAssist® program). Only certified prescribers can prescribe REVLIMID and only certified pharmacies can dispense REVLIMID. In order to receive REVLIMID, patients must be enrolled in the REVLIMID REMS® program and agree to follow the requirements.

For more information about REVLIMID and the REVLIMID REMS® program, please visit www.CelgeneRiskManagement.com, or call the Celgene Customer Care Center toll-free at **1-888-423-5436**.

How to receive your first prescription for REVLIMID® (lenalidomide)

For Females:

Counseling Your healthcare provider will counsel you on why and how you and your partner should prevent pregnancy. Your healthcare provider will also inform you on not to share the drug, not to donate blood, and about appropriate contraceptive use. You should be instructed not to extensively handle or open REVLIMID capsules
Pregnancy Test #1 If you can get pregnant, you must take a pregnancy test within 10-14 days before getting a REVLIMID prescription
Pregnancy Test #2 If you can get pregnant, you must take another pregnancy test within 24 hours before getting a REVLIMID prescription
Enrollment You and your healthcare provider will then complete and submit the REVLIMID® (lenalidomide) Patient-Physician Agreement Form
Complete Mandatory Confidential Survey You and your healthcare provider will each complete a survey. Visit www.CelgeneRiskManagement.com or call 1-888-423-5436 and press 1 to take your survey
Prescription Your healthcare provider will send your prescription to a certified pharmacy
Pharmacy Call The certified pharmacy will contact you to provide counseling on the serious risks and safe-use conditions of REVLIMID before you receive your prescription. They will also coordinate delivery of REVLIMID to you
Receive REVLIMID REVLIMID will be shipped with a Medication Guide to the address you provide. A signature

will be required to receive this shipment

For each of your following prescriptions, pregnancy tests will be required depending on your ability to get pregnant. For specific pregnancy test requirements, please refer to page 10 of this guide. For full detailed information about the REVLIMID REMS[®] program requirements, please visit www.CelgeneRiskManagement.com or review the Patient Guide to REVLIMID REMS[®] Program.

For Males:

<p>Counseling</p> <p>Your healthcare provider will counsel you on why and how you and your partner should prevent pregnancy. Your healthcare provider will also inform you on not to share the drug, not to donate blood or sperm, and about appropriate contraceptive use. You should be instructed not to extensively handle or open REVLIMID capsules</p>
<p>Enrollment</p> <p>You and your healthcare provider will then complete and submit the Patient-Physician Agreement Form</p>
<p>Complete Mandatory Confidential Survey</p> <p>You will not have to take a survey for your first prescription, but will have to for the following ones. Visit www.CelgeneRiskManagement.com or call 1-888-423-5436 and press 1 to take your survey</p>
<p>Prescription</p> <p>Your healthcare provider will send your prescription to a certified pharmacy</p>
<p>Pharmacy Call</p> <p>The certified pharmacy will contact you to provide counseling on the serious risks and safe-use conditions of REVLIMID before you receive your prescription. They will also coordinate delivery of REVLIMID to you</p>
<p>Receive REVLIMID</p> <p>REVLIMID will be shipped with a Medication Guide to the address you provide. A signature will be required to receive this shipment</p>

For each of your following prescriptions, you will need to follow a similar process.

For full detailed information about the REVLIMID REMS[®] program requirements, please visit www.CelgeneRiskManagement.com or review the Patient Guide to REVLIMID REMS[®] Program.

What do all patients need to know about the REVLIMID REMS[®] program?

General guidelines

- This medicine is **only** for you. **Do not share it with anyone** even if they have symptoms like yours. It may harm them and can cause birth defects
- REVLIMID[®] (lenalidomide) must be kept out of the reach of children
- Do not open or unnecessarily handle REVLIMID capsules
- Keep REVLIMID in a cool, dry place
- Do **not** donate blood while you are taking REVLIMID, during breaks (dose interruptions), and for 4 weeks after stopping REVLIMID
- Unused REVLIMID capsules should be returned for disposal to Celgene by calling **1-888-423-5436** or to your REVLIMID prescriber, or to the pharmacy that dispensed the REVLIMID to you

What do females who can get pregnant need to know about the REVLIMID REMS® program?

A. Before taking REVLIMID® (lenalidomide)

- You must sign the REVLIMID® (lenalidomide) Patient-Physician Agreement Form that says you understand that REVLIMID should not be used during pregnancy, and that you agree not to become pregnant while taking REVLIMID
- If there is **any** chance that you can get pregnant, you must agree to use **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control **every time** you have sex with a male starting at least 4 weeks **before** taking REVLIMID
- Your healthcare provider must give you a pregnancy test 10 to 14 days before you receive your first prescription for REVLIMID, and again within 24 hours before you receive your first prescription for REVLIMID. If you are pregnant, you cannot take REVLIMID
- You will have pregnancy tests before starting REVLIMID and while taking REVLIMID, even if you agree not to have sex with a male
- Before your healthcare provider can write your prescription for REVLIMID, you must take part in a mandatory confidential survey. The survey will make sure that you understand and can follow information designed to prevent serious risks to unborn babies
- Before dispensing REVLIMID® (lenalidomide), your REVLIMID REMS® certified pharmacy will contact you to discuss treatment
- Your healthcare provider will talk with you about your birth control options

1. Choose at least 1 highly effective method and at least 1 additional effective method of birth control. Talk to your healthcare provider about the following acceptable birth control methods. See below.

Reliable Methods of Birth Control to Use Together

Highly effective birth control methods	Additional effective birth control methods
Intrauterine device (IUD)	
Hormonal methods (birth control pills, hormonal patches, injections, vaginal rings, or implants) +	Male latex or synthetic condom
Tubal ligation (having your tubes tied)	Diaphragm
Partner's vasectomy (tying of the tubes to prevent the passing of sperm)	Cervical cap

2. Use the 2 methods of birth control at the same time

- **Remember:** You must use at the same time at least 1 highly effective method and at least 1 additional effective method of birth control every time you have sex with a male. However, your healthcare provider may recommend that you use 2 different methods instead for medical reasons

What do females who can get pregnant need to know about the REVLIMID REMS[®] program? (continued)

- Talk to your healthcare provider to make sure that other medicines or dietary supplements you are taking do not interfere with your hormonal birth control methods
- **Remember, not having sex is the only birth control method that is 100% effective**

3. Unacceptable methods of birth control

- Progesterone-only “mini-pills”
- IUD Progesterone T
- Female condoms
- Natural family planning (rhythm method) or breastfeeding
- Fertility awareness
- Withdrawal
- Cervical shield*

4. Take pregnancy tests

- You must have a pregnancy test performed by your healthcare provider 10 to 14 days before receiving your first prescription for REVLIMID[®] (lenalidomide) and again within 24 hours before receiving your first prescription for REVLIMID. Both pregnancy tests must have a negative result

* A cervical shield should not be confused with a cervical cap, which is an effective secondary form of contraception.

What do females who can get pregnant need to know about the REVLIMID REMS® program? (continued)

B. While taking REVLIMID® (lenalidomide)

- If you are able to get pregnant, you must continue (including during breaks [dose interruptions]) to use **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control **every time** you have sex with a male
- **Remember, not having sex is the only birth control method that is 100% effective**
- You must talk to your healthcare provider before changing any birth control methods you have already agreed to use
- You will have a pregnancy test performed by your healthcare provider:
 - Every week during the first 4 weeks of treatment, then
 - Every 4 weeks if your menstrual cycles are regular, or
 - Every 2 weeks if your cycles are irregular
 - If you miss your period or have unusual menstrual bleeding, or
 - If your medication is not dispensed within 7 days of taking the pregnancy test
- If you had sex with a male without using birth control or if you think your birth control has failed, stop taking REVLIMID® (lenalidomide) immediately and call your healthcare provider right away. Your healthcare provider will discuss your options, which may include emergency birth control. Do not wait until your next appointment to tell your healthcare provider if you miss your menstrual period or if you think you may be pregnant
- If you get pregnant, or think you may be pregnant, you must immediately stop taking REVLIMID. Contact your healthcare provider immediately to discuss your pregnancy. If you do not have an obstetrician, your healthcare provider will refer you to one for care and counseling. If your healthcare provider is not available, call the Celgene Customer Care Center at **1-888-423-5436**
- You must not breastfeed a baby while you are taking REVLIMID
- In order to continue receiving REVLIMID, you must take part in a mandatory confidential survey every month. You must also continue to discuss your treatment with your REVLIMID REMS® healthcare provider. To take the survey, please visit www.CelgeneRiskManagement.com, access the Celgene REMS mobile app, or call the Celgene Customer Care Center at **1-888-423-5436**

C. After you have stopped taking REVLIMID® (lenalidomide)

- You must continue to use **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control **every time** you have sex with a male:

- For at least 4 weeks after stopping REVLIMID, or
- Do not have any sex with a male for 4 weeks after stopping REVLIMID

See also “General guidelines” on page 5 for requirements for all patients.

What do females who can not get pregnant need to know about the REVLIMID REMS[®] program?

A. Before taking REVLIMID[®] (lenalidomide)

- You must sign the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form that says you are currently not pregnant and are not able to get pregnant. This means that:
 - You have been in natural menopause for at least 2 years, or
 - You have had both ovaries and/or uterus removed
- For females who have not started their period (menstruation) and are under the age of 18, a parent or legal guardian must sign the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form that says the patient is not pregnant, is not able to get pregnant, and/or will not be having sex with a male for at least 4 weeks before starting REVLIMID
- Before your healthcare provider can write your prescription for REVLIMID, you must take part in a mandatory confidential survey. The survey will make sure that you understand and can follow information designed to prevent serious risks to unborn babies
- Before dispensing REVLIMID[®] (lenalidomide), your REVLIMID REMS[®] certified pharmacy will contact you to discuss treatment

B. While taking REVLIMID

- In order to continue receiving REVLIMID, you must take part in a mandatory confidential survey every six months. You must also continue to discuss your treatment with your REVLIMID REMS[®] healthcare provider. To take the survey, please visit www.CelgeneRiskManagement.com, access the Celgene REMS mobile app, or call the Celgene Customer Care Center at **1-888-423-5436**

See also “General guidelines” on page 5 for requirements for all patients.

What do males need to know about the REVLIMID REMS[®] program?

- You must use a latex or synthetic condom, **every time** you have sex with a female who is able to get pregnant, even if you have had a successful vasectomy (tying of the tubes to prevent the passing of sperm)

A. Before taking REVLIMID[®] (lenalidomide)

- You must sign the REVLIMID[®] (lenalidomide) Patient-Physician Agreement Form. You must agree that while taking REVLIMID you will use a latex or synthetic condom **every time** you have sex with a female who is pregnant or who is able to get pregnant, even if you have had a successful vasectomy (tying of the tubes to prevent the passing of sperm)
- Before dispensing REVLIMID, your REVLIMID REMS[®] certified pharmacy will contact you to discuss treatment

B. While taking REVLIMID

- You must use a latex or synthetic condom, **every time** (including during breaks [dose interruptions]) you have sex with a female who is pregnant or who is able to get pregnant, even if you have had a successful vasectomy (tying of the tubes to prevent the passing of sperm)
- **Remember, not having sex is the only birth control method that is 100% effective**
- You must tell your healthcare provider right away if you had sex with a female without using a latex or synthetic condom, or if you think for any reason that your partner may be pregnant, or if your partner is pregnant. If your healthcare provider is not available, call the Celgene Customer Care Center at **1-888-423-5436**
- You must **not** donate sperm while taking REVLIMID[®] (lenalidomide) (including during breaks [dose interruptions])
- In order to continue receiving REVLIMID, you must take part in a mandatory confidential survey every month. You must also continue to discuss your treatment with your REVLIMID REMS[®] healthcare provider. To take the survey, please visit **www.CelgeneRiskManagement.com**, access the Celgene REMS mobile app, or call the Celgene Customer Care Center at **1-888-423-5436**

C. After you have stopped taking REVLIMID

- For 4 weeks after receiving your last dose of REVLIMID, you must use a latex or synthetic condom **every time** you have sex with a female who is pregnant or who is able to get pregnant, even if you have had a successful vasectomy (tying of the tubes to prevent the passing of sperm)
- You must **not** donate sperm for 4 weeks after stopping REVLIMID

See also “General guidelines” on page 5 for requirements for all patients.

Mandatory confidential patient surveys

As a patient who is enrolled in the REVLIMID REMS[®] program for REVLIMID[®] (lenalidomide), you will need to complete a brief mandatory confidential survey as outlined below.

Adult females who can get pregnant

- Initial survey before first prescription
- Monthly

Adult females who can not get pregnant

- Initial survey before first prescription
- Every six months

Female children

- Initial survey before first prescription
- Monthly

Males

- No initial survey
- Monthly

Mandatory confidential survey process

- When your healthcare provider tells you to take the survey, go to the patient Mandatory Confidential Survey section of **www.CelgeneRiskManagement.com**, the Celgene REMS mobile app, or call the Celgene Customer Care Center at **1-888-423-5436**
- Be prepared with your patient identification number
- After completing your survey, your healthcare provider will also complete a survey. Your healthcare provider will then receive authorization to write your prescription
- The prescription will be sent to a REVLIMID REMS[®] certified pharmacy. The REVLIMIDREMS[®] certified pharmacy will contact you to discuss your REVLIMID[®] (lenalidomide) therapy. You will not receive your medication until you speak with the REVLIMID REMS[®] certified pharmacy
- For more information, contact the Celgene Customer Care Center at **1-888-423-5436**

Warning to patients taking REVLIMID[®] (lenalidomide)

Attention females:

Do **not** take REVLIMID if you are pregnant, if you are breastfeeding, or if you are able to get pregnant and are not using **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control **every time** you have sex with a male.

Attention males:

You must use a latex or synthetic condom **every time** you have sex with a female who is pregnant or who is able to get pregnant, even if you have had a successful vasectomy (tying of the tubes to prevent the passing of sperm).

You must **not** donate sperm while taking REVLIMID, during breaks (dose interruptions), and for 4 weeks after stopping REVLIMID.

Attention all patients:

You must **not** donate blood while taking REVLIMID[®] (lenalidomide), during breaks (dose interruptions), and for 4 weeks after stopping REVLIMID.

This medicine is **only** for you. **Do not share it with anyone** even if they have symptoms like yours. It may harm them and can cause birth defects.

REVLIMID must be kept out of the reach of children. Return any unused REVLIMID capsules for disposal to Celgene by calling **1-888-423-5436**, or to your REVLIMID prescriber, or to the pharmacy that dispensed the REVLIMID to you.

You may require regular blood tests during REVLIMID treatment. Consult with your healthcare provider.

Welcome to the Celgene REMS Program

To avoid embryo-fetal exposure, Risk Evaluation and Mitigation Strategy (REMS) programs are mandatory for the Celgene products THALOMID[®] (thalidomide), REVLIMID[®] (lenalidomide) and POMALYST[®] (pomalidomide). The THALOMID REMS[®] program (formerly known as the S.T.E.P.S.[®] program), REVLIMID REMS[®] program (formerly known as the RevAssist[®] program) and POMALYST REMS[®] program require prescribers and pharmacists to be certified and patients to enroll and comply with all of the requirements for each program.

If you would like to obtain more information about any of the Celgene REMS programs, please click on the program name below:

RevlimidREMS[®]

Visit www.REVLIMIDREMS.com,
to learn more about the
REVLIMID REMS[®] program.

PomalystREMS[®]

Visit www.POMALYSTREMS.com,
to learn more about the
POMALYST REMS[®] program.

Welcome to the REVLIMID REMS® program

REVLIMID® (lenalidomide) in combination with dexamethasone is indicated for the treatment of patients with multiple myeloma (MM).

REVLIMID is indicated for the treatment of patients with transfusion-dependent anemia due to low- or intermediate-1-risk myelodysplastic syndromes (MDS) associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities.

REVLIMID is indicated for the treatment of patients with mantle cell lymphoma (MCL) whose disease has relapsed or progressed after two prior therapies, one of which included bortezomib.

Important information about REVLIMID and the REVLIMID Risk Evaluation and Mitigation Strategy (REMS) program

- REVLIMID is contraindicated in pregnant females and females capable of becoming pregnant. Females of reproductive potential may be treated with REVLIMID provided adequate precautions are taken to avoid pregnancy.
- To avoid embryo-fetal exposure, REVLIMID is only available under a restricted distribution program called "REVLIMID REMS™" (formerly known as the RevAssist® program).
- Only prescribers and pharmacies certified by the REVLIMID REMS® program can prescribe and dispense REVLIMID to patients who are enrolled and meet all the conditions of the REVLIMID REMS® program.

The goals of the REVLIMID risk evaluation and mitigation strategy are as follows:

1. To prevent the risk of embryo-fetal exposure to REVLIMID
2. To inform prescribers, patients, and pharmacists on the serious risks and safe-use conditions for REVLIMID

About the REVLIMID REMS® program

REVLIMID® (lenalidomide) in combination with dexamethasone is indicated for the treatment of patients with multiple myeloma (MM).

REVLIMID is indicated for the treatment of patients with transfusion-dependent anemia due to low- or intermediate-1-risk myelodysplastic syndromes (MDS) associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities.

REVLIMID is indicated for the treatment of patients with mantle cell lymphoma (MCL) whose disease has relapsed or progressed after two prior therapies, one of which included bortezomib.

To avoid embryo-fetal exposure, REVLIMID is only available under a restricted distribution program called "REVLIMID Risk Evaluation and Mitigation Strategy (REMS)" (formerly known as the RevAssist® program). Only certified prescribers can prescribe REVLIMID and only certified pharmacies can dispense REVLIMID in the REVLIMID REMS® program.

In order to receive REVLIMID, all patients must be enrolled in the REVLIMID REMS® program and agree to comply with the requirements of the REVLIMID REMS® program.

Key points of the REVLIMID REMS® program

Prescriber

- The prescriber enrolls and becomes certified with Celgene for the REVLIMID REMS® program
- The prescriber counsels patient on benefits and risks of REVLIMID
- The prescriber provides contraception and emergency contraception counseling
- The prescriber verifies negative pregnancy test for all female patients of reproductive potential
- The prescriber completes a REVLIMID® (lenalidomide) Patient-Physician Agreement Form with each patient and sends to Celgene
- The prescriber/patient completes applicable mandatory confidential survey
- The prescriber obtains an authorization number from Celgene and writes it on every prescription, along with the patient risk category
- The prescriber writes no more than a 4-week (28-day) supply, with no automatic refills or telephone prescriptions
- The prescriber sends REVLIMID prescription to certified pharmacy

Pharmacy

- The pharmacy certifies with Celgene for the REVLIMID REMS® program
- The certified pharmacy must obtain a confirmation number from Celgene before dispensing
- The certified pharmacy counsels the patient, and completes an Education and Counseling Checklist
- The certified pharmacy dispenses REVLIMID to patient along with a Medication Guide

You May Want Emergency Contraception If

- His condom broke or slipped off, and he ejaculated inside your vagina.
- You forgot to take your birth control pills.
- Your diaphragm, cap, or shield slipped out of place, and he ejaculated inside your vagina.
- You miscalculated your "safe" days.
- He didn't pull out in time.
- You weren't using any birth control.
- He forced you to have unprotected vaginal sex.

Contact your health care provider immediately if you have had unprotected intercourse and you think you might become pregnant. **Ask about emergency contraception.**

www.plannedparenthood.org
www.teenwire.com
Other publications —
www.ppfastore.org

EC — Emergency Contraception
2675 9/08-180 2.13.5
ISBN 1-930996-91-8
Printed in the U.S.A.

**How Well Emergency Contraception Works**

- **Progestin-only EC reduces the risk of pregnancy by 89 percent if started within 72 hours of unprotected intercourse.** For example, eight out of 100 women will become pregnant after having unprotected sex once during the second or third week of their cycles. But only one woman out of 100 will become pregnant after taking progestin-only EC.
- **Combination EC reduces the risk of pregnancy by 75 percent if started within 72 hours of unprotected intercourse.** Only two women out of 100 will become pregnant after taking combination EC.

Emergency contraception is meant as backup birth control only. EC is not as effective as the correct and consistent use of reversible contraception — the IUD, the shot, the pill, the patch, or the ring.

EC does not continue to prevent pregnancy during the rest of the cycle. Other methods of birth control must be used.

Emergency contraception offers no protection against sexually transmitted infections. You may want to consider testing for sexually transmitted infections if there is a possibility that unprotected sex put you at risk.

How to Get Emergency Contraception

Plan B is now available over the counter for women 18 and older. Plan B and other forms of emergency contraception are also available by prescription for all women. Contact your local Planned Parenthood at 1-800-230-PLAN to get EC or to get a prescription for EC if you are younger than 18. You may also get EC at your local pharmacy if you are older than 18.

If you are younger than 18, you may want to ask your clinician for a prescription for EC before you need it. This will allow you to use EC in emergency situations without having to wait to get an appointment.

Costs Vary Widely

Costs depend on which of the following services are needed. Here are some estimates:

EC	Range of Costs
Plan B	\$10 – \$60
one pack of combination pills	\$20 – \$50
visit with health care provider	\$35 – \$150
pregnancy test	\$10 – \$20
Range of Total Cost	\$10 – \$255

Fees may be less at family planning clinics and health centers. Some use a sliding scale based on income. Costs vary from community to community, based on regional and local expenses. Contact your nearest Planned Parenthood health center at 1-800-230-PLAN for information about costs in your area.

Emergency IUD Insertion**IUDs can also be used as backup birth control.**

A clinician can insert a Copper T 380A IUD (ParaGard®) for emergency contraception within five days of unprotected intercourse. It can be left in place for up to 12 years for very effective contraception. Or the IUD can be removed after your next menstrual period, when it is certain that you are not pregnant. Emergency IUD insertion reduces the risk of pregnancy by 99.9 percent.

For more information about the advantages and disadvantages of the IUD as a regular method of birth control, read the Planned Parenthood pamphlet, *Understanding IUDs*.

Emergency Contraception

 **Planned Parenthood**
America's most trusted name in women's health.®

- **EC can prevent pregnancy after unprotected vaginal intercourse.** It is also called “the morning-after pill,” emergency birth control, or backup birth control.
- **EC must be started within 120 hours — five days — after unprotected intercourse.**
- **The sooner it is started, the better.** EC reduces the risk of pregnancy by 75–89 percent when the first dose is taken within 72 hours.

EC contains hormones found in birth control pills and prevents pregnancy by stopping ovulation or fertilization. Theoretically, EC could also prevent implantation, but that has not been proven scientifically.

Plan B® is a brand of hormone pills approved by the FDA specifically for emergency contraception. Certain birth control pills may also be prescribed for use as emergency contraception. Some EC regimens use “combination pills” with estrogen and progestin — synthetic hormones like the ones a woman’s body makes. Plan B has progestin only.

EC will not cause an abortion or affect an existing pregnancy. Still, a woman should not use emergency contraception if she is pregnant.

How to Use EC

Plan B can be taken in one dose or in two doses, 12 hours apart. Combined hormone pills must be taken in two doses, 12 hours apart. The number of pills in a dose varies with the brand of the pill. Use the same brand for both doses.

Swallow the pill(s) in the first dose as soon as possible, up to 120 hours — five days — after having unprotected sex. EC may cause nausea and vomiting. This risk is much higher for combination pills than for progestin-only pills.

To reduce the risk of nausea, you may want to take an anti-nausea medication, such as Dramamine or Bonine one hour before taking EC.

If you are taking the pills in two doses, swallow the second dose 12 hours after taking the first. If you vomited after the first dose, be sure to use an anti-nausea medication one hour before taking the second dose. Or you may want to take the second dose as a vaginal suppository by inserting the pills with your fingers as high into your vagina as you can reach. (The medication will be absorbed through the vaginal tissue.)

If you vomit the second dose, do not take any extra pills. They probably won’t reduce the risk of pregnancy. But they will probably make you sick to your stomach.

Lybrel	6 yellow pills	6 yellow pills
Nordette	4 light-orange pills	4 light-orange pills
Ogestrel	2 white pills	2 white pills
Ovral	2 white pills	2 white pills
Portia	4 pink pills	4 pink pills
Quasense	4 white pills	4 white pills
Seasonale	4 pink pills	4 pink pills
Seasonique	4 light-blue-green pills	4 light-blue-green pills
Tri-Levlen	4 yellow pills	4 yellow pills
Triphasil	4 yellow pills	4 yellow pills
Trivora	4 pink pills	4 pink pills

*Both doses of Plan B can be taken at the same time.

After You Take the Pills

- Your next period may be earlier or later than usual.
- Your flow may be heavier, lighter, more spotty, or the same as usual.
- Tell any other health care provider you may see before you get your next period that you have taken EC.
- Schedule a follow-up visit with your clinician if you do not have your period in three weeks or if you have symptoms of pregnancy.
- Be sure to use another method of contraception if you have vaginal intercourse any time before you get your period again.
- Continue using the birth control method of your choice for as long as you want to avoid pregnancy.

Side Effects

Side effects associated with the use of EC usually taper off within a day or two.

- Half of the women who take the combination pills feel sick to their stomachs, but only for about 24 hours. Less than one out of five women vomit with combination pills.
- The risk of nausea and vomiting is much lower with progestin-only EC, like Plan B — less than one in four women feel sick to their stomachs.
- Breast tenderness, irregular bleeding, dizziness, and headaches may also occur.

There have been no reports of serious complications among the millions of women who have used EC.

Frequent use of EC may cause periods to become irregular and unpredictable.

The side effects of anti-nausea medication may include drowsiness. Please follow the precautions on the package insert.

Celgene REMS Programs Pharmacy Training: REVLIMID REMS®

Section 1: What Is a REMS?

In this section

- What is a REMS?
- Celgene REMS programs
- Pharmacy staff knowledge check

What is a REMS?

- REMS stands for **Risk Evaluation and Mitigation Strategies**
- REMS programs are mandated by the **US Food and Drug Administration (FDA)**
- According to the FDA, a REMS program is:
 - A strategy to manage a known or potential serious risk associated with a drug or biological product
- The FDA determines if a REMS program is necessary to ensure that the benefits of the drug outweigh the risks

Celgene REMS programs

- Celgene has REMS programs for THALOMID[®] (thalidomide), REVLIMID[®] (lenalidomide), and POMALYST[®] (pomalidomide):
 - THALOMID REMS[®] program (formerly known as the S.T.E.P.S.[®] program) for THALOMID
 - REVLIMID REMS[®] program (formerly known as the RevAssist[®] program) for REVLIMID
 - POMALYST REMS[®] for POMALYST
- If these treatments are used during pregnancy, they can cause serious birth defects or embryo-fetal death
- The goals of these REMS programs are:
 - To prevent the risk of embryo-fetal exposure to these treatments
 - To inform prescribers, patients, and pharmacies on the serious risks and safe-use conditions for each treatment

Celgene REMS programs (continued)

For more information on Celgene REMS programs:

- Call the Celgene Customer Care Center at 1-888-423-5436
- Visit the specific product website

Did you know?

The Celgene Customer Care Center has Compliance Specialists to educate and train pharmacy staff on Celgene REMS program guidelines and compliance.

Pharmacy staff knowledge check

- REMS stands for Risk Evaluation and Mitigation Strategies.
 - A. True
 - B. False

Correct Answer: A. True

- REMS stands for **Risk Evaluation and Mitigation Strategies**
- A REMS is a strategy to manage a known or potential serious risk associated with a drug or biological product

Pharmacy staff knowledge check (continued)

- Who mandates REMS programs?
 - A. Celgene
 - B. The FDA
 - C. The EPA

Correct Answer: B. The FDA

- REMS programs are mandated by the FDA
- The FDA determines if a REMS program is necessary to ensure that the benefits of the drug outweigh the risks

Pharmacy staff knowledge check (continued)

- Celgene REMS programs are mandated to avoid embryo-fetal exposure and to inform prescribers, patients, and pharmacies on the serious risks and safe-use conditions for each treatment.
 - A. True
 - B. False

Correct Answer: A. True

- The goals of the Celgene REMS programs are:
 - To prevent the risk of embryo-fetal exposure to these treatments
 - To inform prescribers, patients, and pharmacies on the serious risks and safe-use conditions for each treatment

Celgene REMS Programs Pharmacy Training: REVLIMID REMS®

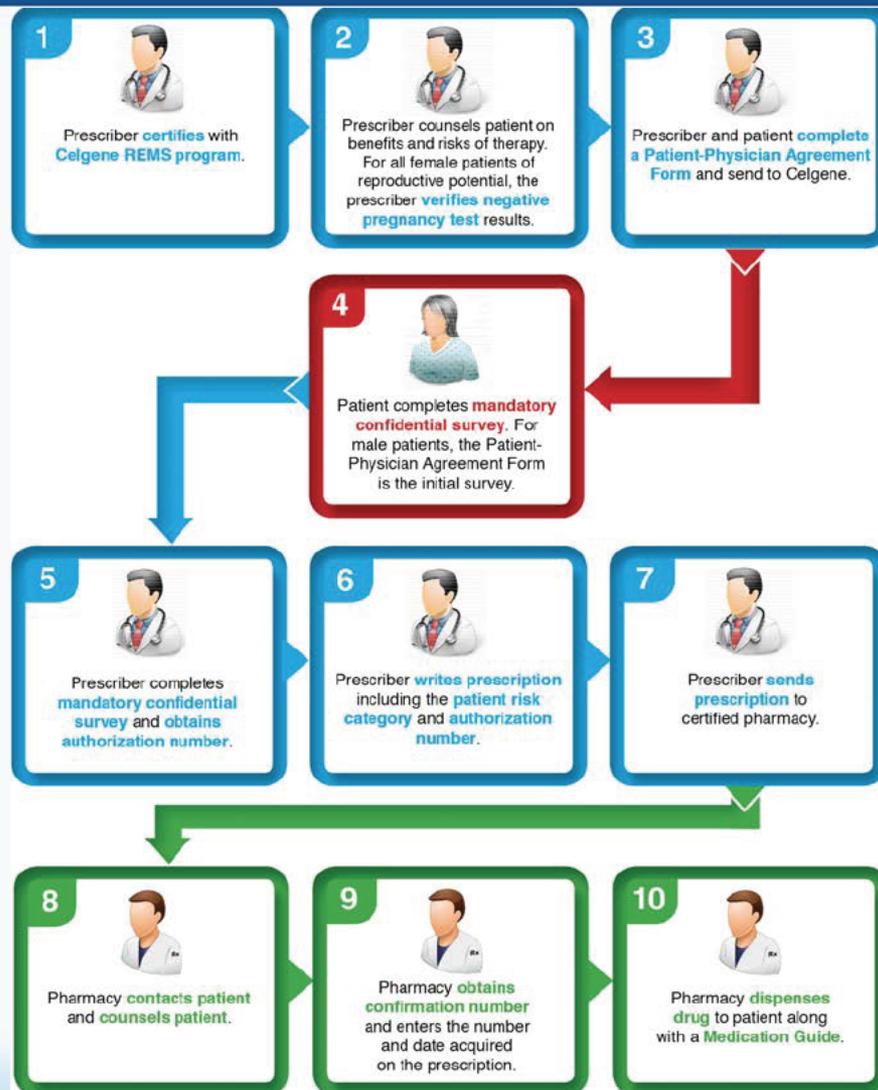

Section 2: Program Requirements for Patients and Prescribers

In this section

- Program overview
- Certification and enrollment requirements for prescribers and patients
- Patient risk categories
- Contraception requirements
- Pregnancy test requirements
- Mandatory confidential surveys
- Pharmacy staff knowledge check

Celgene REMS program overview

Certification and enrollment requirements for prescribers and patients

- Prescribers must be certified with the Celgene REMS program in order to prescribe a product with a REMS program for a patient
 - Prescribers must complete the REMS program enrollment and agree to comply with the program requirements
- Prescribers are required to enroll patients in a specific Celgene REMS program before starting a patient on a therapy with a REMS
 - Patients must enroll in the REMS program and agree to comply with the program requirements

Patient risk categories

- There are 6 different patient risk categories for patients enrolled in Celgene REMS programs:
 - Adult female of reproductive potential
 - Female child of reproductive potential
 - Adult female not of reproductive potential
 - Female child not of reproductive potential
 - Adult male
 - Male child

Definition of females of reproductive potential

Females of reproductive potential include all females who:

- Are menstruating
- Are amenorrheic from previous medical treatments
- Are under 50 years of age
- Are perimenopausal
- Do not qualify for the females not of reproductive potential category

The risk categories for **females of reproductive potential** are:

- Adult female of reproductive potential
- Female child of reproductive potential

Definition of females not of reproductive potential

Females not of reproductive potential include females who:

- Have been in natural menopause for at least 24 consecutive months
- Have had a hysterectomy and/or bilateral oophorectomy
- Have not started menstruating

The risk categories for **females not of reproductive potential** are:

- Adult female not of reproductive potential
- Female child not of reproductive potential

Definition of males

Males include adults and children (under 18 years of age)

The risk categories for **males** are:

- Adult Male
- Male Child

Contraception requirements: Females of reproductive potential

- Female patients of reproductive potential must either completely abstain from heterosexual sexual contact or must use 2 methods of reliable contraception
- Reliable contraceptive methods include using at the same time **at least 1 highly effective method** and **at least 1 additional method** of birth control every time they have sex with a male
- Reliable contraceptive methods must be started at least 4 weeks before therapy, during therapy (including dose interruptions), and for at least 4 weeks following discontinuation of therapy

Highly effective methods

Tubal ligation

Intrauterine device (IUD)

Hormonal (birth control pills, hormonal patches, injections, vaginal rings, or implants)

Partner's vasectomy

Additional effective methods

Male latex or synthetic condom

Diaphragm

Cervical cap

Remind patients that not having any sexual intercourse is the only birth control method that is **100% effective**.

Contraception requirements: Females of reproductive potential (continued)

- **Unacceptable contraception methods:**

- Progesterone-only “mini-pills”
- IUD Progesterone T
- Female condoms
- Natural family planning (rhythm method) or breastfeeding
- Fertility awareness
- Withdrawal
- Cervical shield
 - A cervical shield should not be confused with a cervical cap, which is an effective secondary form of contraception

Contraception requirements: Males

- Male patients must use a latex or synthetic condom:
 - Every time they have sexual intercourse with a female of reproductive potential even if they have undergone a successful vasectomy
 - During therapy (including dose interruptions)
 - For 4 weeks after discontinuation of therapy

Remind patients that not having any sexual intercourse is the only birth control method that is **100% effective**.

Pregnancy test requirements

- For females of reproductive potential, prescriber must obtain a negative pregnancy test:
 - 10 to 14 days before an initial prescription
 - Within 24 hours before an initial prescription
 - The pregnancy test must be sensitive to at least 50 mIU/mL
- Subsequent pregnancy testing should occur:
 - Weekly during the first 4 weeks of use, then
 - Every 4 weeks if patient has regular menses or no menses, or
 - Every 2 weeks if irregular menses

Pregnancy test requirements (continued)

If pregnancy does occur:

- Treatment must be **immediately** discontinued
- Any suspected embryo-fetal exposure must be reported **immediately** to Celgene Global Drug Safety and reported to the FDA
 - Celgene Global Drug Safety: 1-800-640-7854
 - FDA MedWatch number: 1-800-FDA-1088
- The patient should be referred to an obstetrician/gynecologist experienced in reproductive toxicity for further evaluation and counseling

Mandatory confidential surveys

- All patients must complete brief mandatory confidential surveys in order to obtain treatment
 - Surveys can be completed via CelgeneRiskManagement.com or by calling the Celgene Customer Care Center at 1-888-423-5436

Patient Mandatory Confidential Survey Schedule for Adults and Children

Risk category	Initial Prescription	Subsequent Prescriptions
Females of reproductive potential	Complete appropriate survey	Monthly survey
Females not of reproductive potential	Complete appropriate survey	Child: Monthly survey Adult: Survey every 6 months
Males	Do not need to take initial survey	Monthly survey

Pharmacy staff knowledge check

- How many patient risk categories are there in the Celgene REMS programs?
 - A. 3
 - B. 5
 - C. 6

Correct Answer: C. 6

Celgene REMS program patient risk categories	
Adult	Child (under 18)
Adult female of reproductive potential	Female child of reproductive potential
Adult female not of reproductive potential	Female child not of reproductive potential
Adult male	Male child

Pharmacy staff knowledge check (continued)

- For all Celgene REMS products, female patients of reproductive potential must take a pregnancy test:
 - A. 10-14 days before first prescription
 - B. Within 24 hours before first prescription
 - C. 10-14 days and within 24 hours before first prescription

Correct Answer:

C. 10-14 days and within 24 hours before first prescription

- Prescribers must obtain 2 negative pregnancy tests before the first prescription for females of reproductive potential:
 - 10 to 14 days before an initial prescription
 - Within 24 hours before an initial prescription

Pharmacy staff knowledge check (continued)

- Which is a **highly effective** method of contraception?
 - A. Male latex or synthetic condom
 - B. IUD
 - C. Female condom

Correct Answer: B. IUD

Highly effective methods	Additional effective methods
Tubal ligation	Male latex or synthetic condom
Intrauterine device (IUD)	Diaphragm
Hormonal (birth control pills, hormonal patches, injections, vaginal rings, or implants)	Cervical cap
Partner's vasectomy	

Celgene REMS Programs Pharmacy Training: REVLIMID REMS®

Section 3: Program Requirements for Pharmacies

In this section

- Training and certification requirements
- Pharmacy compliance
- Pharmacy staff knowledge check

Training and certification requirements

- Celgene REMS program certified counselors must:
 - Be licensed healthcare professionals
 - Complete the Celgene-sponsored training on all required modules **annually** and pass certification exam **with 100% accuracy**
 - Educate patient by telephone or in person before treatment can be dispensed
 - Understand and counsel patients on the potential for birth defects or death to an unborn baby
 - Counsel patients on possible side effects
- Other pharmacy staff involved in dispensing treatment must:
 - Be educated on the guidelines for dispensing

- Pharmacy manager responsibilities
 - Educate all staff regarding dispensing guidelines
 - Includes floater pharmacists, pharmacy technicians, or anyone else handling the product
 - Make sure counselors are registered and certified in ComplianceWire[®] and advise Celgene of inactive counselors
 - Complete and return all documentation that pertains to non-compliance

Did you know? Pharmacy managers can call the Celgene Customer Care Center at **1-888-423-5436** with questions. Ask for Risk Compliance.

- Pharmacy deviations
 - The pharmacy will be required to investigate and correct conditions that lead to deviations from Celgene REMS programs
 - Celgene will work with the pharmacy to implement appropriate corrective actions and a timeframe for those actions
 - If corrective actions are not successful, Celgene may take additional action, up to and including deactivation of the pharmacy

Pharmacy compliance (continued)

- A High Risk Deviation is:
 - Any action taken by the pharmacy that is inconsistent or non-compliant with the Celgene REMS program that increases the risk of embryo-fetal exposure
 - Any action that occurs on a consistent basis that shows a pharmacy's negligent or willful disregard to the Celgene REMS program requirements
- For any additional occurrence of a High Risk Deviation beyond 2 High Risk Deviations, the pharmacy may be deactivated and no longer permitted to dispense product

Pharmacy staff knowledge check

- Celgene REMS program certified counselors must complete the Celgene-sponsored training:
 - A. Annually
 - B. Every 6 months
 - C. Every 2 years

Correct Answer: A. Annually

- Counselors must complete the Celgene-sponsored training annually

Pharmacy staff knowledge check (continued)

- All counselors must pass the certification test with an accuracy of:
 - A. 100%
 - B. 90%
 - C. 95%

Correct Answer: A. 100%

- Counselors must pass the certification exam with 100% accuracy

Pharmacy staff knowledge check (continued)

- Celgene may deactivate pharmacies for deviations.
 - A. True
 - B. False

Correct Answer: A. True

- The pharmacy will be required to investigate and correct conditions that lead to deviations from Celgene REMS programs
- If corrective actions are not successful, Celgene may take additional action, up to and including deactivation of the pharmacy

Celgene REMS Programs Pharmacy Training: REVLIMID REMS®

Section 4: Guidelines for Counseling

Counseling for female patients of reproductive potential

- Make sure that patients are aware that they will receive the **Medication Guide** along with their prescription

COUNSEL ADULTS AND CHILDREN ON:

- Potential embryo-fetal toxicity
- Not taking treatment if pregnant or breastfeeding
- Using **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control **every time they have sex with a male**, or abstaining from sex with a male
 - **Highly effective** methods of contraception: Tubal ligation, intrauterine device (IUD), hormonal (birth control pills, hormonal patches, injections, vaginal rings, or implants), or partner's vasectomy
 - **Additional effective** methods of contraception: Male latex or synthetic condom, diaphragm, or cervical cap

Counseling for female patients of reproductive potential (continued)

COUNSEL ADULTS AND CHILDREN ON:

- Unacceptable methods of birth control are:
 - Progesterone-only “mini-pills”
 - IUD Progesterone T
 - Female condoms
 - Natural family planning (rhythm method) or breastfeeding
 - Fertility awareness
 - Withdrawal
 - Cervical shield (a cervical shield should not be confused with a cervical cap, which is an effective secondary form of contraception)

Counseling for female patients of reproductive potential (continued)

COUNSEL ADULTS AND CHILDREN ON:

- Continuing to use **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control:
 - Beginning at least 4 weeks before treatment
 - During treatment
 - During dose interruptions
 - For at least 4 weeks after stopping treatment
 - **Every time they have sex with a male**, or abstaining from sex with a male

Counseling for female patients of reproductive potential (continued)

COUNSEL ADULTS AND CHILDREN ON:

- Obtaining a pregnancy test—performed by their healthcare provider—weekly during the first 4 weeks of use
- Pregnancy testing should be repeated:
 - Every 4 weeks during the rest of their treatment in females with regular menstrual cycles or no cycle at all
 - If menstrual cycles are irregular, the pregnancy testing should occur every 2 weeks
- The need to stop treatment right away **in the event of becoming pregnant, or if they think for any reason they may be pregnant**, and to call their healthcare provider immediately

Counseling for female patients of reproductive potential (continued)

COUNSEL ADULTS AND CHILDREN ON:

- Not sharing capsules with anyone—especially with females who can get pregnant
- Not donating blood during treatment (including dose interruptions) and for 4 weeks after stopping treatment
- Not breaking, chewing, or opening capsules
- Instructions on dose and administration
 - It is required that the milligram strength and number of capsules dispensed be recorded on the patient checklist

FOR FEMALE CHILDREN (<18 YEARS OF AGE):

- Parent or legal guardian must have read the Celgene REMS program education material and agreed to ensure compliance

Counseling for female patients not of reproductive potential

- Make sure that patients are aware that they will receive the **Medication Guide** along with their prescription

COUNSEL ADULTS AND CHILDREN ON:

- Not sharing capsules with anyone—especially with females who can get pregnant
- Not donating blood during treatment (including dose interruptions) and for 4 weeks after stopping treatment
- Not breaking, chewing, or opening capsules
- Instructions on dose and administration
 - It is required that the milligram strength and number of capsules dispensed be recorded on the patient checklist

Counseling for female patients not of reproductive potential (continued)

FOR FEMALE CHILDREN (<18 YEARS OF AGE):

- Parent or legal guardian must have read the Celgene REMS program education material and agreed to ensure compliance
- Parent or legal guardian must inform the child's doctor when the child begins menses

Counseling for male patients

- Make sure that patients are aware that they will receive the **Medication Guide** along with their prescription

COUNSEL ADULTS AND CHILDREN ON:

- Potential embryo-fetal toxicity and contraception
 - Wearing a latex or synthetic condom every time when engaging in sexual intercourse with a female who can get pregnant, even if they have undergone a successful vasectomy
- Female partners of males receiving treatment must call their healthcare provider right away if they get pregnant

Counseling for male patients (continued)

COUNSEL ADULTS AND CHILDREN ON:

- Not sharing capsules with anyone—especially with females who can get pregnant
- Not donating blood or sperm during treatment (including dose interruptions) and for 4 weeks after stopping treatment
- Not breaking, chewing, or opening capsules
- Instructions on dose and administration
 - It is required that the milligram strength and number of capsules dispensed be recorded on the patient checklist

FOR MALE CHILDREN (<18 YEARS OF AGE):

- Parent or legal guardian must have read the Celgene REMS program education material and agreed to ensure compliance

Additional counseling for all patients taking REVLIMID® (lenalidomide)

COUNSEL ADULTS AND CHILDREN ON:

- Possible side effects include neutropenia, thrombocytopenia, deep vein thrombosis, and pulmonary embolism as well as risk of myocardial infarction and stroke
- For del 5q MDS patients, the need for weekly blood tests to be completed for the first 8 weeks and monthly thereafter to monitor blood counts while taking REVLIMID

Counsel patient to **contact healthcare provider** if experiencing any side effects.

Pharmacy staff knowledge check

- Which of these is **not** something patients need to be counseled on?
 - A. Not sharing capsules
 - B. Not breaking, chewing, or opening capsules
 - C. Wearing gloves while taking capsules

Correct Answer: C. Wearing gloves while taking capsules.

- Patients must be counseled on:
 - Not sharing capsules with anyone—especially with females who can get pregnant
 - Not breaking, chewing, or opening capsules

Pharmacy staff knowledge check (continued)

- Female patients of reproductive potential must use at the same time at least 1 highly effective method and at least 1 additional effective method of birth control for 4 weeks after stopping treatment.
 - A. True
 - B. False

Correct Answer: A. True

- Female patients of reproductive potential must continue to use **at the same time** at least 1 highly effective method and at least 1 additional effective method of birth control:
 - Beginning at least 4 weeks before treatment
 - During treatment
 - During dose interruptions
 - For at least 4 weeks after stopping treatment
 - **Every time they have sex with a male**, or abstaining from sex with a male

Pharmacy staff knowledge check (continued)

- All patients must receive a Medication Guide along with their prescription.
 - A. True
 - B. False

Correct Answer: A. True

- Make sure that patients are aware that they will receive the **Medication Guide** along with their prescription

Celgene REMS Programs Pharmacy Training: REVLIMID REMS®

Section 5: Guidelines for Dispensing

In this section

- Pharmacy and prescription requirements
- Dispensing guidelines
- Steps for dispensing
- Pharmacy staff knowledge check

Pharmacy and prescription requirements

- Dispensing pharmacies must be certified in the applicable Celgene REMS program and educated on the program and on dispensing procedures for the treatment
- Pharmacy must ensure that every prescription includes:
 - Patient and prescriber demographics and contact information
 - Patient risk category
 - Dosing information and instructions
 - Authorization number
 - Prescriber signature
- Authorization numbers are valid for **7 days** from the date of last pregnancy test for female patients of reproductive potential and **30 days** from the date it is issued for all other patients
- No automatic refills or telephone prescriptions are permitted
- Faxed prescriptions are permissible depending on state laws

Dispensing guidelines

- Dispense **no more than a 4-week (28-day) supply** with the Medication Guide. A new prescription is required for further dispensing
- **Dispense subsequent prescriptions only if there are 7 days or less remaining of therapy on the existing prescription**
- Dispense or ship the product within 24 hours of obtaining and recording the confirmation number
- For females of reproductive potential, product **must be shipped the same day** confirmation number is obtained **or picked-up within 24 hours** of obtaining confirmation
- Pharmacy is required to **cancel** the confirmation number if product is not provided to the patient within the required time frame
 - Pharmacy must obtain a new confirmation number by calling the Celgene Customer Care Center at 1-888-423-5436 when ready to ship or have the product picked up

Dispensing guidelines (continued)

- When shipping, pharmacy must require a signature confirming receipt
- Pharmacy shall keep an inventory log for the drug, by strength, reflecting its on-hand inventory at all times
- Do not transfer the drug to another pharmacy without prior authorization from Celgene
- Accept unused capsules (previously dispensed) from a patient or patient caregiver and return the capsules to Celgene for proper disposal

Review incoming prescriptions

- Only accept prescriptions with all of the following information:
 - Patient and prescriber demographics and contact information
 - Patient risk category
 - Dosing information and instructions
 - Authorization number
 - Prescriber signature
- Make sure the prescription is signed and dated
- Confirm the prescription is written for a 4-week (28-day) supply or less
- For subsequent prescriptions, verify there are 7 days or less of therapy remaining on the existing prescription

Steps for dispensing (continued)

Counsel patient

- Patients must receive counseling from a Celgene REMS program certified pharmacy counselor
- Complete the corresponding section (based on the patient risk category) of the Education and Counseling Checklist
 - Make sure form is signed and dated by the counselor and appropriate boxes are checked off
 - Keep a copy of the checklist and the associated prescription
- Please report adverse drug experiences that are suspected to be associated with the use of the drug and any suspected pregnancy occurring during the treatment

Steps for dispensing (continued)

Obtain confirmation number from Celgene

- Prior to each prescription, contact the Celgene Customer Care Center at 1-888-423-5436, available 24 hours a day, 7 days a week. Eligible pharmacies may also use the Celgene REMS Pharmacy Portal at www.CelgeneREMSPharmacyPortal.com. Call your Celgene Account Manager to see if your pharmacy is eligible.
 1. Enter the pharmacy NABP number or DEA number
 2. Enter the authorization number written on the prescription
 3. Enter the number of capsules and milligram strength being dispensed
 4. Write the **confirmation number** and **date** on the prescription. Note: the confirmation number is **only valid for 24 hours**
- If you do not obtain a confirmation number, you are not permitted to dispense the product to the patient

If you have questions about the validity of the authorization or confirmation numbers, call the Celgene Customer Care Center.

Steps for dispensing (continued)

Dispense prescription

- Include a Medication Guide with each prescription
- Document the dispense date on either the shipping receipt or pharmacy dispensing log
- Dispense or ship the product within 24 hours of obtaining and recording the confirmation number
- For females of reproductive potential, product **must be shipped the same day** confirmation number is obtained **or handed to the patient within 24 hours**

Pharmacy staff knowledge check

- A confirmation number is valid for:
 - A. 24 hours
 - B. 7 days
 - C. 30 days

Correct Answer: A. 24 hours

- The confirmation number is **only valid for 24 hours**
- Pharmacy is required to **cancel** the confirmation number if product is not provided to the patient within the required time frame

Pharmacy staff knowledge check (continued)

- Each prescription must have both an authorization number and a patient risk category written on it.
 - A. True
 - B. False

Correct Answer: A. True

- Only accept prescriptions with all of the following information:
 - Patient and prescriber demographics and contact information
 - Patient risk category
 - Dosing information and instructions
 - Authorization number
 - Prescriber signature

Pharmacy staff knowledge check (continued)

- The pharmacy must dispense no more than a 4-week (28-day) supply.
 - A. True
 - B. False

Correct Answer: A. True

- Dispense **no more than a 4-week (28-day) supply** with the Medication Guide
- A new prescription is required for further dispensing

This is a representation of an electronic record that was signed electronically and this page is the manifestation of the electronic signature.
