TRULICITY REMS

FDA Required REMS Safety Information

- Potential Risk of Medullary Thyroid Carcinoma (MTC)
- Risk of Pancreatitis

Important Safety Notice

The FDA has required Eli Lilly and Company to distribute this safety notice to your organization as part of the TRULICITY REMS (Risk Evaluation and Mitigation Strategy) program.

We request that you inform your members about the following serious risks of TRULICITY (dulaglutide):

Potential Risk of Medullary Thyroid Carcinoma (MTC).

- In male and female rats, dulaglutide causes a dose-related and treatment-duration-dependent increase in the incidence of thyroid C-cell tumors (adenomas and carcinomas) after lifetime exposure. It is unknown whether TRULICITY causes thyroid C-cell tumors, including MTC, in humans as the human relevance of dulaglutide-induced rodent thyroid C-cell tumors has not been determined.

- Cases of MTC in patients treated with lixilaglutide, another GLP-1 receptor agonist, have been reported in the postmarketing period. The data in these reports are insufficient to establish or exclude a causal relationship between MTC and GLP-1 receptor agonist use in humans.

Risk of Pancreatitis.

- Pancreatitis has been reported with the use of GLP-1 receptor agonists. Cases of pancreatitis have been described in association with TRULICITY during clinical trials.

TRULICITY is not recommended as first-line therapy for patients with type 2 diabetes mellitus inadequately controlled on diet and exercise.
A non-promotional factsheet, reviewed by the FDA, with more detailed safety information about these risks is enclosed.

**Indication:** TRULICITY is a GLP-1 receptor agonist indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

This letter does not contain the complete safety information for TRULICITY. Please visit www.TRULICITYREMS.com for more information.

**Reporting Adverse Events**

You are encouraged to report negative side effects of prescription drugs to Eli Lilly and Company (the Sponsor) at 1-800-LillyRx (1-800-545-5979) and/or the FDA at www.fda.gov/medwatch, or call 1-800-FDA-1088.

Please contact The Lilly Answers Center at 1-800-545-5979 with any questions about the information in this letter or the safe and effective use of TRULICITY.

Sincerely,

Robert W. Baker, M.D.
Vice President, Global Patient Safety
Eli Lilly and Company
