Re: K981207
Clearplan Easy Fertility Monitor
Regulatory Class: I
Product Code: LHD, CEP
Dated: August 26, 1998
Received: August 28, 1998

Dear Ms. Roberts:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (Premarket Approval), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. A substantially equivalent determination assumes compliance with the Current Good Manufacturing Practice requirements, as set forth in the Quality System Regulation (QS) for Medical Devices: General regulation (21 CFR Part 820) and that, through periodic QS inspections, the Food and Drug Administration (FDA) will verify such assumptions. Failure to comply with the GMP regulation may result in regulatory action. In addition, FDA may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under sections 531 through 542 of the Act for devices under the Electronic Product Radiation Control provisions, or other Federal laws or regulations.

Page 2

Under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88), this device may require a CLIA complexity categorization. To determine if it does, you should contact the Centers for Disease Control and Prevention (CDC) at (770) 488-7655.

This letter will allow you to begin marketing your device as described in your 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801 and additionally 809.10 for in vitro diagnostic devices), please contact the Office of Compliance at (301) 594-4588. Additionally, for questions on the promotion and advertising of your device, please contact the Office of Compliance at (301) 594-4639. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR 807.97). Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its internet address "<http://www.fda.gov/cdrh/dsmamain.html>".

Sincerely yours,

Steven I. Gutman, M.D., M.B.A.

Radiological Health

Enclosure

510(k) Number (if known):_____

Device Name:_____

Indications For Use:

The CLEARPLAN EASY FERTILITY MONITOR is an interactive system which is designed to identify those days in a woman's cycle on which intercourse is most likely to lead to conception. Women are instructed to act on this information to achieve a pregnancy.

The target market for the CLEARPLAN EASY FERTILITY MONITOR is women who are either planning a pregnancy, or who have been trying for a pregnancy for a number of months without success. In addition, the device will be of use to Obstetricians, Gynaecologists and Fertility Specialists.

The device will provide warning of impending ovulation through detection of the luteinising hormone (LH) surge which precedes it. Besides this feature, CLEARPLAN EASY FERTILITY MONITOR will provide additional warning of ovulation through detection of a rise in the level of estrone-3-glucuronide (E3G) in urine. The product will define three phases of fertility through early morning urine hormone measurement: low, high and peak fertility.

CLEARPLAN EASY FERTILITY MONITOR is designed to adapt its testing strategy to the individual.

CLEARPLAN FERTILITY EASY MONITOR will be labelled not for contraceptive use.
