Date of Summary Preparation

March 8, 1999

Device (Trade & Common Name)

Liquichek Spinal Fluid Control

Classification Name

Class 1, 75JJY

CFR 862.1660: Multi-Analyte Control, All Kinds (Assayed and Unassayed)

Devices to Which Substantial Equivalence is Claimed

Liquichek Spinal Fluid Control
Bio-Rad Laboratories
Irvine, California
K932076

Statement of Intended Use

Liquichek Spinal Fluid Control is intended for use as an assayed quality control to monitor the precision of laboratory testing procedures for the analytes listed in the package insert.

Description of the Device

Liquichek Spinal Fluid Control is a human based control with added constituents of human origin and pure chemicals. This product is provided in liquid form for convenience.

This product contains 0.1% sodium azide as a preservative.

Statement of How Technological Characteristics Compare to Substantial Equivalence Device

A table is provided below comparing the similarities between the Bio-Rad Liquichek Spinal Fluid Control and the devices to which substantial equivalence is claimed.

	Bio-Rad Liquichek Spinal Fluid Control (New Device)	Bio-Rad Liquichek Spinal Fluid Control (Substantially Equivalent Device)
Intended Use	An assayed quality control to monitor the precision of laboratory testing procedures for the analytes listed in the package insert.	An assayed quality control to monitor the precision of laboratory testing procedures for the analytes listed in the package insert.
Form	Liquid	Liquid
Matrix	Human based control.	Human based control.
Storage	2-8°C	2-8°C
Open Vial Claim	30 days when stored tightly capped at 2-8°C.	30 days when stored tightly capped at 2-8°C.
Analytes	Albumin, Chloride, Glucose, Immunoglobulin A, Immunoglobulin G, Immunoglobulin M, Lactate, Total Protein, Sodium plus LDH.	Albumin, Chloride, Glucose, Immunoglobulin A, Immunoglobulin G, Immunoglobulin M, Lactate, Total Protein, Sodium.

Re: K990888
Trade Name: Liquichek Spinal Fluid Control
Regulatory Class: I
Product Code: JJY
Dated: March 8, 1999
Received: March 10, 1999

Dear Ms. Platt:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (Premarket Approval), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. A substantially equivalent determination assumes compliance with the Current Good Manufacturing Practice requirements, as set forth in the Quality System Regulation (QS) for Medical Devices: General regulation (21 CFR Part 820) and that, through periodic QS inspections, the Food and Drug Administration (FDA) will verify such assumptions. Failure to comply with the GMP regulation may result in regulatory action. In addition, FDA may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under sections 531 through 542 of the Act for devices under the Electronic Product Radiation Control provisions, or other Federal laws or regulations.

Under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88), this device may require a CLIA complexity categorization. To determine if it does, you should contact the Centers for Disease Control and Prevention (CDC) at (770) 488-7655.

This letter will allow you to begin marketing your device as described in your 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801 and additionally 809.10 for in vitro diagnostic devices), please contact the Office of Compliance at (301) 594-4588. Additionally, for questions on the promotion and advertising of your device, please contact the Office of Compliance at (301) 594-4639. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR 807.97). Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers Assistance at its toll-free number (800) 638-2041 or (301) 443-6597, or at its internet address "<http://www.fda.gov/cdrh/dsma/dsmamain.html>".

Sincerely yours,
