Preparation Date: 24 May 2010
Device Name
Common Name: Hip joint ceramic, uncemented prosthesis
Trade Name: APEX Modular Hip System BIOLOX® delta Femoral Head
Classification Name: Hip joint metal/ceramic/polymer semi-constrained cemented or nonporous uncemented prosthesis

Regulatory Class: Class II per 21 CFR §888.3353
Product Code: LZO

Legally Marketed: * K012918- Apex Modular™ Alumina Femoral Head, November 27, 2001
* K073150- ApeX-LNK Poly Acetabular Cup Liners- 36mm Alumina Femoral Heads, February 27, 2008
* K100555- ApeX-LNK Poly Acetabular Liners and Apex Modular Head, March 29, 2010

Predicate Device(s)

Device Description: The Apex Modular Hip System BIOLOX® delta Femoral Head is composed of an alumina matrix composite, the femoral heads include diameters ranging from 28mm to 40mm with various offsets.

Indications for Use: The Apex Modular™ Ceramic Femoral Heads are intended for use in combination with the Apex Modular Hip Stem as the femoral component in total hip replacement procedures. This ceramic head is intended to articulate with a polyethylene or metal-backed polyethylene acetabular cup or bipolar component. This prosthesis is intended for single use implantation, and may be used for the following conditions, as appropriate:
- Non-inflammatory degenerative joint disease, including osteoarthritis and avascular necrosis
- Rheumatoid arthritis
- Correction of functional deformity
- Congenital dislocation
- Revision procedures where other treatments or devices have failed
- Femoral neck and trochanteric fractures of the proximal femur.

**Non-Clinical Test Summary**

The following tests were conducted:
- Component testing of BIOLOX forte ball head 32-12/14 L on CoCr test tapers and BIOLOX delta ball heads 28-12/14 L on CoCr test tapers supplied by OMNIlife science. CeramTec Procedure VA 02 04 4129, ISO-7606-10
- Component testing of BIOLOX delta ball heads 28-12/14 L on titanium test tapers supplied by OMNIlife science. CeramTec Procedure VA 02 04 4129, ISO-7606-10
- Influence of diameter and neck length on burst strength of BIOLOX forte and BIOLOX delta ball heads with taper type 12/14. Burst test setup as per ISO-7206-10

**Clinical Test Summary**

No clinical studies were performed.

**Conclusions**

The APEX Modular Hip System BIOLOX® delta Femoral Head is substantially equivalent to the predicate devices.

Dear Ms. Pondicherry:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set
forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/Centers~flfices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,
