510(k) Summary

This summary of 510(k) safety and effectiveness information is provided in accordance with the requirements of SMDA 1990 and 21 CFR 807.92(c).

The assigned 510(k) number is:

1. **510(k) Owner:**
   Shantou Institute of Ultrasonic Instruments Co., Ltd. (SIUI)
   77 Jinsha Road, Shantou, Guangdong 515041, China
   Tel: 86-754-88250150       Fax: 86-754-88251499

   **Contact Person:**
   Flower Cai
   Shantou Institute of Ultrasonic Instruments Co., Ltd.
   77 Jinsha Road, Shantou, Guangdong 515041, China

   **Date Prepared:** Oct 22, 2010

2. **Device/Trade Name:**
   Apogee 1000 Digital Color Doppler Ultrasound Imaging System

   **Classification Name:**
   Regulatory Class: II
   Ultrasonic Pulsed Doppler Imaging System   90-IYN (per 21 CFR 892.1550)
   Ultrasonic Pulsed Echo Imaging System      90-IYO (per 21 CFR 892.1560)
   Diagnostic Ultrasound Transducer           90-ITX (per 21 CFR 892.1570)
3. **Predicate Device:**
The subject device is substantially equivalent to the device currently having FDA 510(k) clearance SIUI CTS-8800 (K092907) with respect to intended use, principles of operation and technological characteristics.

4. **Device Description:**
The SIUI Apogee 1000 is a Digital Ultrasound Imaging System capable of the following operating modes: 2D (B mode), M, Doppler (PWD mode), Color (CFM mode) and 3D. The system is designed for use in linear, convex, phased array and 3D scanning modes and supports linear, convex, phased array and 3D transducers. The system has cine review, image zoom, measurements and calculations, image storage and review, printing and recording capabilities.

5. **Intended Use:**
The device is intended for ultrasonic pulsed echo imaging and measurement for abdominal, pediatric, small organs, musculo-skeletal, cardiac and peripheral vascular applications.

6. **Safety Considerations:**
The Apogee 1000 Digital Color Doppler Ultrasound Imaging System has been tested per the FDA Guidance document “Information for Manufacturers Seeking Marketing Clearance of Diagnostic Ultrasound Systems and Transducers” issued in September 2008. The acoustic output is measured and calculated per NEMA UD 2 Acoustic Output Measurement Standard for Diagnostic Ultrasound Equipment: 2004. The device conforms to applicable medical device safety standards, such as IEC 60601-1, ISO10993-5 and ISO 10993-10.

7. **Conclusion:**
The conclusions drawn from testing of the Apogee 1000 Digital Color Doppler Ultrasound Imaging System demonstrates that the device is as safe and effective as the legally marketed predicate device.
Shantou Institute of Ultrasonic Instruments Co., Ltd. (SIUI)
% Mr. Bob Leiker
QRS Representative
Quality and Regulatory Services, Inc.

DUBLIN CA 95648

Re: K103144
Trade/Device Name: Apogee 1000 Digital Color Doppler Ultrasound System with Convex Array Transducer C3L60C, Linear Array Transducer L8L38C, Convex Array Transducer C5L40C, and Phased Array Transducer P3F14C
Regulation Number: 21 CFR 892.1550
Regulation Name: Ultrasonic pulsed doppler imaging system
Regulatory Class: II
Product Code: IYN, IYO, and ITX
Dated: December 30, 2010
Received: January 3, 2011

Dear Mr Leiker:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

This determination of substantial equivalence applies to the following transducers intended for use with the Apogee 1000 Digital Color Doppler Ultrasound System, as described in your premarket notification:

<table>
<thead>
<tr>
<th>Transducer Model Number</th>
<th>Transducer Model Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Convex Array Transducer C3L60C</td>
<td>Convex Array Transducer C5L40C</td>
</tr>
<tr>
<td>Linear Array Transducer L8L38C</td>
<td>Phased Array Transducer P3F14C</td>
</tr>
</tbody>
</table>
If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

This letter will allow you to begin marketing your device as described in your premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus permits your device to proceed to market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

If you have any questions regarding the content of this letter, please contact Lauren Hefner at (301) 796-6881.

Sincerely yours,

David G. Brown, Ph.D.
Acting Director
Division of Radiological Devices
Office of in Vitro Diagnostic Device Evaluation and Safety
Center for Devices and Radiological Health
