510(k) Summary

5.1 **Type of Submission:** Traditional

5.2 **Submitter:** Unimax Medical Systems Inc.
   **Address:** 8F-2, No. 127, Lane 235, Fao Chiao Rd., Hsin Tien City, Taipei, Taiwan
   **Phone:** 886-2-89191698
   **Fax:** 886-2-89191528
   **Contact:** Sophia Chiu
   **Establishment Registration Number:** 3007791595

5.3 **Identification of the Device:**
   **Proprietary/Trade name:** Unimax Suction Irrigation Set
   **Common Name:** Suction Irrigation
   **Classification Name:** Laparoscope, General & Plastic Surgery
   **Device Classification:** II
   **Regulation Number:** 876.1500
   **Panel:** General & Plastic Surgery
   **Product Code:** GCJ

5.4 **Identification of the Predicate Device:**
   **Predicate Device Name:** GeniCon Laparoscopic Suction Irrigation
   **Manufacturer:** Genicon
   **510(k) Number or Clearance Information:** K041967

5.5 **Intended Use and Indications for Use of the subject device.**

The Unimax Suction Irrigation Set is available with an array of probe designs to facilitate lavage during laparoscopic surgery. This device has applications in laparoscopic gynecologic, general, thoracic and urology procedures to provide suction and irrigation functions to help flush blood and tissue debris from the operative site during laparoscopy to aid visualization.
5.6 Device Description

The Unimax Suction Irrigation Set is indicated for use in patients undergoing a laparoscopic surgical procedure. It is designed to deliver sterile irrigation fluids to surgical sites during laparoscopic procedures and to evacuate blood, tissue debris, and smoke from the surgical site.

The suction irrigation set consists of a hand piece equipped with two trumpet style valves, a probe, and connecting lines of tubing, one set designed to attach to a supply of irrigation fluid, and the other designed to attach to an aspiration pump. The valves allow controlled irrigation and aspiration during a surgical procedure.

The hand piece of the suction irrigator is designed to allow instruments to be introduced through the suction irrigation probe to reach the operative site. The instrument adapter is adjustable to allow a variety of instruments and diameters. It is a single use, disposable device and is sold sterile.

5.7 Non-clinical Testing

A series of in vitro and in vivo preclinical physical, mechanical and biocompatibility tests were performed to assess the safety and effectiveness of the Unimax Suction Irrigation Set. The tests were conducted in accordance with IEC 60601-2-2 Medical electrical equipment - Part 2-2: Particular requirements for the safety of high frequency surgical equipment. All the test results demonstrate the performance of Unimax Suction Irrigation Set meets the requirements of its pre-defined acceptance criteria and intended uses.

The results of the non-clinical testing demonstrate that the Unimax Suction Irrigation Set is as safe and effective as the predicate devices.

5.8 Safety and Effectiveness

The result of bench testing indicates that the new device is as safe and effective as the predicate device.

**5.9 Substantial Equivalence Determination**

The Unimax Suction Irrigation Set submitted in this 510(k) file is substantially equivalent in intended use, design, technology/principles of operation, materials and performance to the cleared GeniCon Laparoscopic Suction Irrigation which is the subject of K041967.

Differences between the devices cited in this section do not raise any new issues of safety or effectiveness.

5.10 Conclusion

After analyzing bench tests, electrical safety testing data, it can be concluded that Unimax Suction Irrigation Set is as safe and effective as the predicate device.

Re: K103509
Trade/Device Name: Unimax Suction Irrigation Set
Regulation Number: 21 CFR 876.1500
Regulation Name: Endoscope and accessories
Regulatory Class: Class II
Product Code: GCJ
Dated: April 25, 2011
Received: April 25, 2011

Dear Mr. Lee:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you; however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act.
or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.
