for
Sirona Dental Systems SIRO Laser Advance

1. **SPONSOR**

Sirona Dental Systems GmbH
Fabrikstrasse 31
D-64625 Bensheim
Germany

Contact Person: Fritz Kolle
Telephone: 49 6251 16 32 94

Date Prepared: August 4, 2010

2. **DEVICE NAME**

Proprietary Name: SIRO Laser Advance

Models:
SIRO Laser Advance  
SIRO Laser Xtend upgraded  
SIRO Laser Xtend  
FONA Laser

Common / usual name: Dental Soft Tissue Laser
Classification Names: Laser instrument, surgical, powered

3. **PREDICATE DEVICE**

SIRO Laser Advance, Biolase iLase

4. **INTENDED USE**

Models: Sirolaser Advance and SIRO Laser Xtend Upgrade

Intended Use:
Intra- and extra-oral surgery including incision, excision, hemostasis, coagulation and vaporization of soft tissue

Indications for Use:
Marginal and interdental gingival and epithelial lining of free gingiva; frenectomy; frenotomy; biopsy; operculectomy; implant recovery; gingivectomy; gingivoplasty; gingival troughing; crown lengthening; hemostasis of donor site; removal of granulation tissue; laser assisted flap surgery; debridement of diseased epithelial lining; incisions and draining of abscesses; tissue retraction for impressions; papillectomy; vestibuloplasty; excision of lesions; exposure of unerupted/partially erupted teeth; removal of hyperplastic tissues; treatment of aphthous ulcers; leukoplakia; Laser removal of diseased, infected, inflamed and necrosed soft tissue within the periodontal pocket; Sulcular debridement (removal of diseased, infected, inflamed and necrosed soft tissue in the periodontal pocket to improve clinical indices including gingival index, gingival bleeding index, probe depth, attachment loss and tooth inability); pulpotomy; pulpotomy as adjunct to root canal therapy; Fibroma removal; Gingival incision and excision; Treatment of canker sores; herpetic ulcers of the oral mucosa; Laser soft tissue curettage; Reduction of gingival hypertrophy.

Models: SIROLaser Xtend and FONALaser

Intended Use:
Intra- and extra-oral surgery including incision, excision, hemostasis, coagulation and vaporization of soft tissue

Indications of use:
marginal and interdental gingival and epithelial lining of free gingiva; frenectomy; frenotomy; biopsy; operculectomy; implant recovery; gingivectomy; gingivoplasty; gingival troughing; crown lengthening; hemostasis of donor site; removal of granulation tissue; incisions and draining of abscesses; tissue retraction for impressions; papillectomy; vestibuloplasty; excision of lesions; exposure of unerupted/partially erupted teeth; removal of hyperplastic tissues; treatment of aphthous ulcers; leukoplakia; Laser removal of diseased, infected, inflamed and necrosed soft tissue within the periodontal pocket; Sulcular debridement (removal of diseased, infected, inflamed and necrosed soft tissue in the periodontal pocket to improve clinical indices including gingival index, gingival bleeding index, probe depth, attachment loss and tooth inability); pulpotomy; pulpotomy as adjunct to root canal therapy; Fibroma removal; Gingival incision and excision; Treatment of canker sores; herpetic ulcers of the oral mucosa; Laser soft tissue curettage; Reduction of gingival hypertrophy.
Models: Sirolaser Advance and SIROLaser Xtend Upgrade

5. **DEVICE DESCRIPTION**

Sirona Dental traditional 510(k) Summary August 4, 2010
SIROLaser Advance
The SIRO Laser Advance is a Diode Laser System for dental soft tissue surgery. The system is comprised of the laser unit with handpiece, laser fibers of different diameters, bendable tips, and a wireless foot control.

The SIRO Laser Advance has the following basic functions:

- Ability to emit laser radiation either in continuous wave mode (cw) or chopped mode
- Setup and display of treatment parameters:
  - power,
  - treatment time,
  - chop frequency
  - duty cycle
- Selection of predetermined settings for different indications
- Upgradeable firmware

6. **Basis for Substantial Equivalence**

The Sirona Dental Systems SIRO Laser Advance Device is substantially equivalent to Sirona SIRO Laser Advance (K0092660) and Biolase iLase. Performance testing to validate the safety and effectiveness of the SIRO Laser Advance includes electrical safety, electromagnetic compatibility, and validation testing of both hardware and software functions.
Dear Mr. Teichert:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Mark N. Melkerson

INDICATIONS FOR USE

510(k) Number (if known):

Device Name: SIROLaser Advance
Models: Sirolaser Advance and SIROLaser Xtend Upgrade

Indications for Use:
Intra- and extra-oral surgery including incision, excision, hemostasis, coagulation and vaporization of soft tissue; marginal and interdental gingival and epithelial lining of free gingiva; frenectomy; frenotomy; biopsy; operculectomy; implant recovery; gingivectomy; gingivoplasty; gingival toughening; crown lengthening; hemostasis of donor site; removal of granulation tissue; laser assisted flap surgery; debridement of diseased epithelial lining; incisions and draining of abscesses; tissue retraction for impressions; papillectomy; vestibuloplasty; excision of lesions; exposure of unerupted/partially erupted teeth; removal of hyperplastic tissues; treatment of aphthous ulcers; leukoplakia; Laser removal of diseased, infected, inflamed and necrosed soft tissue within the periodontal pocket; sulcular debridement (removal of diseased, infected, inflamed and necrosed soft tissue in the periodontal pocket to improve clinical indices including gingival index, gingival bleeding index, probe depth, attachment loss and tooth inability); pulpotomy; pulpotomy as adjunct to root canal therapy; fibroma removal; gingival incision and excision; treatment of canker sores; herpetic ulcers of the oral mucosa; laser soft tissue curettage; reduction of gingival hypertrophy.

Device Name: SIROLaser Advance
Models: SIROLaser Xtend and FONALaser

Intra- and extra-oral surgery including incision, excision, hemostasis, coagulation and vaporization of soft tissue; marginal and interdental gingival and epithelial lining of free gingiva; frenectomy; frenotomy; biopsy; operculectomy; implant recovery; gingivectomy; gingivoplasty; gingival toughening; crown lengthening; hemostasis of donor site; removal of granulation tissue; incisions and draining of abscesses; tissue retraction for impressions; papillectomy; vestibuloplasty; excision of lesions; exposure of unerupted/partially erupted teeth; removal of hyperplastic tissues; treatment of aphthous ulcers; leukoplakia; Laser removal of diseased, infected, inflamed and necrosed soft tissue within the periodontal pocket; sulcular debridement (removal of diseased, infected, inflamed and necrosed soft tissue in the periodontal pocket to improve clinical indices including gingival index, gingival bleeding index, probe depth, attachment loss and tooth inability); pulpotomy; pulpotomy as adjunct to root canal therapy; fibroma removal; gingival incision and excision; treatment of canker sores; herpetic ulcers of the oral mucosa; laser soft tissue curettage; reduction of gingival hypertrophy.
