| Trade Name | ROMEO posterior osteosynthesis system |
| SPECIA 510k | Modification to ROMEO posterior osteosynthesis system  
|           | (Extension of range of products) |
| CFR section | 888.3070 |
| Classification Name | Pedicle screw spinal system |
| Class | II |
| Product Code | MNI orthosis, spinal pedicle fixation |
| Subsequent product codes | MNH orthosis, spondylolisthesis spinal fixation  
|           | KWP Spinal interlaminal fixation orthosis |
| Device panel | ORTHOPEDIC |
| Legally marketed predicate devices | ELLIPSE posterior osteosynthesis system (K081165) and  
|           | ROMEO posterior osteosynthesis system (K093170 and K101678) manufactured by SPINEART |

### Description

The modifications to ROMEO posterior osteosynthesis system (K081165, K093170, K101678) manufactured by SPINEART consist of addition of:

- Extension of the length range of pre-bent Rod Ø5.4mm (35, 45 and 55 mm)
- Extension of the length range of straight Rod Ø5.4mm (55 mm)
- Extension of the length range of transverse Connectors (20, 30 and 40 mm)
- Addition of Iliac Connectors (Length 15, 20, 30, 40, 50 and 60 mm)
- Addition of axial Rod Connector, Parallel Rod Connector,
- Addition of Percutaneous pre-bent and straight titanium Rod Ø5.4 (Length 30 to 200 mm)

These components are supplied either sterile or not sterile.
### Intended Use

ROMEKO posterior osteosynthesis system is intended to provide immobilization and stabilization of spinal segments in skeletally mature patients as an adjunct to fusion in the treatment of the following acute and chronic instabilities or deformities of the thoracic, lumbar, and sacral spine: severe spondylolisthesis (grades 3 and 4) of the L5-S1 vertebra; degenerative spondylolisthesis with objective evidence of neurologic impairment; fracture; dislocation; scoliosis; kyphosis; spinal tumor; and failed previous fusion (pseudoarthrosis).

### Performance data

ROMEKO posterior osteosynthesis additional components conforms to special control established for Pedicle screw spinal system and to « Spinal System 510(k)s - Guidance for Industry and FDA Staff Document » issued on: May 3, 2004.

Mechanical testing including static axial compression, static torsion and dynamic axial compression tests have been performed according to ASTM F1717-09. Results demonstrate that additional components perform as safely and effectively as their predicate devices.

### Substantial equivalence

ROMEKO posterior osteosynthesis system additional components are substantially equivalent to their predicate device in terms of intended use, material, design, mechanical properties and function.

Non clinical performance testing according to special control demonstrate that additional components are as safe, as effective, and performs as safely and effectively as their predicate devices.

Re: K111127
Trade/Device Name: ROMEO Posterior Osteosynthesis System
Regulation Number: 21 CFR 888.3070
Regulation Name: Pedicle screw spinal system
Regulatory Class: Class II
Product Code: MNI, MNH, KWP
Dated: July 18, 2011
Received: July 20, 2011

Dear Mr. Pennesi:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA).

You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you; however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Mark N. Melkerson
