510(k) Summary

Submitter: Boston Scientific Corporation
One Scimed Place Maple Grove, MN 55311

Contact Person: Mark Murphy
Phone Number: 763-494-2377
Fax Number: 763-494-2222
Date Prepared: May 6, 2011

Device Trade Name: .014 Monorail and OTW PTA Balloon Dilatation Catheters
Common Name: Percutaneous Transluminal Angioplasty Dilatation Catheter
Device Classification: Class II 21 CFR 870.1250 Product Code: LIT

Predicate Devices
Sterling SL Monorail and OTW PTA Balloon Dilatation Catheters and Sterling ES Monorail and OTW PTA Catheters.

Device Description
The .014 PTA Balloon Dilatation Catheters have a coaxial shaft design. The outer lumen is used for inflation of the balloon, and the wire lumen permits the use of guidewires 0.014 in (0.36 mm) to facilitate advancement of the catheter to and through the stenosis to be dilated. The balloon is designed to provide an inflatable segment of known diameter and length at recommended pressures. The catheter includes a tapered tip to facilitate advancement of the catheter. The working lengths of the balloon catheter are 90 cm and 150 cm.

Indications for Use
The .014 Balloon Dilatation Catheter is indicated for Percutaneous Transluminal Angioplasty (PTA) in the peripheral vasculature, including iliac, femoral, infrapopliteal, popliteal, renal arteries, and for the treatment of obstructive lesions of native or synthetic arteriovenous dialysis fistulae.

Substantial Equivalence
The .014 PTA Balloon Dilatation Catheters design, materials, manufacturing process and intended use are substantially equivalent to predicate devices Sterling ES (K080982 and K093636), and Sterling SL Monorail and OTW (K093720) PTA Catheters.

Comparison of Technological Characteristics
The .014 PTA Balloon Dilatation Catheter incorporates substantially equivalent device materials and design, packaging materials and design, fundamental technology, manufacturing processes, sterilization processes and intended use as those featured in the Boston Scientific predicate devices, Sterling ES PTA Balloon Dilatation Catheter (K080982 and K093636) and Sterling SL PTA Balloon Dilatation Catheter (K093720).

Performance Data

Bench testing and biocompatibility testing were performed to support a determination of substantial equivalence. The results of these tests provide reasonable assurance that the proposed device has been designed and tested to assure conformance to the requirements for its intended use. No new safety or performance issues were raised during the testing.

The following biocompatibility tests were completed on the .014 PTA Balloon Dilatation Catheter:
- MEM Elution / Cytotoxicity
- Guinea Pig Maximization Sensitization
- Intracutaneous Reactivity
- Acute Systemic Toxicity
- Materials Mediated Rabbit Pyrogen
- Hemolysis / Direct Contact
- Complement Activation
- Partial Thromboplastin Time
- In Vitro Hemocompatibility
The following in-vitro performance tests were completed for the .014 PTA Balloon Dilatation Catheter:

- Balloon Multiple Inflation
- Balloon Compliance (Distension)
- Balloon Diameter at Nominal Pressure
- Balloon Length Dimensions (mm)
- Balloon Rated Burst Pressure
- Bond Tensile
- Burst Mode
- Catheter Length Dimensions

Distal Inner Shaft ID

Conclusion

Based on the indications for use, technological characteristics, and safety and performance testing, the .014 PTA Balloon Dilatation Catheter has been shown to be appropriate for its intended use and is considered to be substantially equivalent to the Boston Scientific Sterling ES PTA Balloon Dilatation Catheter (K080982 and K0936336) and the Sterling SL PTA Balloon Dilatation Catheter (K093720).

Re: K111295  
Trade/Device Name: .014 Monorail and Over-The-Wire PTA Balloon Dilatation Catheters  
Regulation Number: 21 CFR 870.1250  
Regulation Name: Percutaneous catheter  
Regulatory Class: Class II (two)  
Product Code: LIT, DQY  
Dated: May 6, 2011  
Received: May 9, 2011

Dear Mr. Murphy:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Bram D. Zuckerman, M.D.
