Device Name

Trade Name: Rusch EasyCric Emergency Cricothyrotomy Set

Common Name: Emergency Cricothyrotomy Kit

Classification Name: Emergency Airway Needle (Class II per 21 CFR 868.5090, Product Code BWC, Class 2)

Predicate Device

Melker Emergency Cricothyrotomy Catheter Set - K013916

Device Description

The Rusch EasyCric Emergency Cricothyrotomy Set is a sterile, single use emergency cricothyroidotomy set available in size 5 mm. The device employs the Seldinger technique to provide an emergency artificial airway when attempts to intubate the trachea fail. Cricothyroidotomy provides faster access in emergency situations than surgical or percutaneous tracheostomy, which are time consuming procedures. The device gains access by cutting the link between the cricoid cartilage and the thyroid cartilage into the ligamentum conicum. It is available uncuffed. Components of the set include the EasyCric tube and insertion dilator, scalpel, puncture needle, syringe, guidewire, comport neckband and saline solution.

Indications for Use

Rusch EasyCric Emergency Cricothyrotomy Set is indicated to provide emergency airway access when conventional ventilation by intubation or face mask cannot be performed.
Patient Population: Adult Patients

Environment of Use: Hospital Operating Room, Intensive Care Unit, the Emergency Room or out of the Hospital

Substantial Equivalence

The proposed device is substantially equivalent to the predicate device:

</table>
Indications for Use – The indications for use are identical for the proposed device when compared to the predicate – K013916. Each device is indicated for use in emergency airway management when conventional intubation cannot be performed.

Technology and construction – The design, fabrication, shape, size, etc. are equivalent to the predicate – K013916. Both the proposed and predicate devices use the Seldinger technique to gain access to the airway.

Environment of use – The environments of use are equivalent to predicate – K013916

Patient Population – The patient population is equivalent to the predicate – K013916

Materials – All patient contacting materials are in compliance with ISO 10993-1. Testing performed is listed in the performance summary table below.
Performance – A brief summary of tests relied upon to demonstrate substantial equivalence to the predicate can be found in the table below:

</tr>
</tbody>
</table>

The Rusch EasyCric has the same indications for use, technological characteristics and construction as its predicate. Performance test results demonstrate that the proposed device does not raise new questions of safety and effectiveness and because pass/fail criteria has been met, the devices can be found substantially equivalent.

Re: K1130405
  Trade/Device Name: Rusch EasyCric Emergency Cricothyrotomy Set
  Regulation Number: 21 CFR 868.5090
  Regulation Name: Emergency Airway Needle
  Regulatory Class: Class II
  Product Code: BWC
  Dated: October 4, 2013
  Received: October 7, 2013

Dear Ms. Pfohl:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Mary S. Runner, M.S.
