Phone: (440) 354-2600
Fax No: (440) 357-9198

Contact: Bill Brodbeck
Director, Regulatory Affairs

Telephone: (440) 392-7690
Fax No: (440) 357-9198

Summary Date: April 19, 2013
1. **Device Name**

   Trade Name: Amsco® V-PRO® 1, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems

   Common/usual Name: Vapor Phase Hydrogen Peroxide Sterilizer

   Classification Name: Sterilizer, Ethylene Oxide Gas

   21 CFR 880.6860

   Product Code MLR

2. **Predicate Devices**

   Amsco® V-PRO® 1 Low Temperature Sterilization System (K062297, K102394, K111810 and K120632)

   Amsco® V-PRO® 1 Plus Low Temperature Sterilization System (K083097, K102394, K111810 and K120632)

   Amsco® V-PRO® maX Low Temperature Sterilization System (K102330, K112760 and K120632)

3. **Description of Device**

   The Amsco V-PRO 1, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems are vaporized hydrogen peroxide sterilizers. The V-PRO Sterilizers use VAPROX® HC Sterilant to sterilize the intended devices through exposure to vaporized hydrogen peroxide (VHP). The pre-programmed V-PRO cycles all utilize a conditioning phase, a sterilization phase and an aeration phase. The packaged sterilized devices are ready for use at the completion of the cycle; no cool down or aeration period is required.

   The three V-PRO Sterilizers share common cycles as outlined in Table 5-1.

   **Table 5-1: V-PRO Cycles Provided in the V-PRO Family of Sterilizers**

   * Shaded cell indicates that the V-PRO Sterilizer does not include the identified cycle.

   All three sterilizers contain the Lumen Cycle. The purpose of this submission is to update the indications for use statement cleared under K120632. No modifications were made to the Sterilizers' hardware or software for the proposed modification to the Lumen Cycle stainless steel lumen claims.
The accessories that have been validated for use in the three V-PRO Cycles and the Premarket Notification submission references under which the accessories were cleared for the cycles are listed in Table 5-2.

4. **Intended Use**

The purpose of this submission is to update the indications for use statement cleared under K120632. No modifications are being made to the V-PRO Sterilizers' intended use with respect to the Non Lumen and Flexible Cycles.

The Amsco V-PRO 1, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems, with VAPROX HC Sterilant, are vaporized hydrogen peroxide sterilizers intended for use in the terminal sterilization of cleaned, rinsed and dried reusable metal and nonmetal medical devices used in healthcare facilities. The pre-programmed sterilization cycles (Lumen Cycle, Non Lumen Cycle, and Flexible Cycle) operate at low pressure and low temperature and are thus suitable for processing medical devices sensitive to heat and moisture.

The Amsco V-PRO 1, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems’ Lumen Cycle, the subject of this submission, can sterilize:

- Lumened and non-lumened instruments with diffusion-restricted spaces such as the hinged portion of forceps and scissors
- Medical devices, including single, dual and triple channeled rigid and semi-rigid endoscopes, with the following configurations:
  - Single channeled devices with a stainless lumen that is ≥ 0.77 mm internal diameter (ID) and ≤ 500 mm in length
Amsco® V-PRO®, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems

- **dual channeled devices** with stainless steel lumens that are ≥ 0.77 mm ID and ≤ 527 mm in length
- **triple channeled devices** with stainless steel lumens that are either
  - ≥ 1.2 mm ID and ≤ 275 mm in length
  - ≥ 1.8 mm ID and ≤ 310 mm in length
  - ≥ 2.8 mm ID and ≤ 317 mm in length

The validation studies for all channel/lumen configurations were conducted using a maximum of twenty (20) lumens per load. Hospital loads should not exceed the maximum number of lumens validated by this testing. The validation studies were performed using a validation load consisting of two instrument trays and two pouches for a total weight of 19.65 lbs.

The Amsco V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems’ **Non Lumen Cycle**, cleared under K083097, K102394 and K111810, can sterilize:

- Non-lumened instruments including non-lumened rigid, semi-rigid and flexible endoscopes and non-lumened instruments with stainless steel diffusion-restricted areas such as the hinged portion of forceps or scissors.

The validation studies were conducted using a validation load consisting of two instrument trays and two pouches for a total weight of 19.65 lbs.

The Amsco V-PRO maX Low Temperature Sterilization System’s **Flexible Cycle**, cleared under K102330 and K112760, can sterilize single or dual lumen surgical flexible endoscopes (such as those used in ENT, Urology and Surgical Care) and bronchoscopes in either of two load configurations:

1. Two flexible endoscopes with a light cord (if not integral to endoscope) and mat with no additional load.

   The flexible endoscopes may contain either:
   - a single lumen that is ≥ 1 mm ID and ≤ 1050 mm in length
   - or two lumens with:
     - one lumen that is ≥ 1 mm ID and ≤ 998 mm in length
     - and the other lumen that is ≥ 1 mm ID and ≤ 850 mm in length

   The validation studies were conducted with two flexible endoscopes, each packaged into a tray with silicone mat and light cord (if not integral to endoscope).

2. One flexible endoscope with a light cord (if not integral to endoscope) and mat and additional non-lumened instruments including instruments with diffusion-restricted areas such as the hinged portion of forceps or scissors.
The flexible endoscope can contain either:
- a single lumen that is $\geq 1$ mm ID and $\leq 1050$ mm in length
- or two lumens with:
  - one lumen that is $\geq 1$ mm ID and $\leq 998$ mm in length
  - and the other lumen that is $\geq 1$ mm and $\leq 850$ mm in length

The validation studies were conducted with a flexible endoscope in a tray with silicone mat and light cord (if not integral to endoscope). Also included in the load were an additional instrument tray and one pouch for a total load weight of 24.0 lbs.

### 5. Summary of Nonclinical Tests

The Amsco V-PRO 1, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems have the same or similar intended use and the same technological characteristics as compared to the predicate devices. Performance testing to assess and demonstrate substantial equivalence to the predicates is summarized below.

<table>

The Amsco V-PRO Low Temperature Sterilization Systems have been tested for conformity and are certified to the following standards:

- EN 61010-1:2001 Safety requirements for electrical equipment for measurement, control and laboratory use. General requirements; Part 1: General Requirements

6. **Conclusion**

The Amsco V-PRO 1, V-PRO 1 Plus and V-PRO maX Low Temperature Sterilization Systems have been validated to meet the established performance criteria. The results of the Amsco V-PRO Low Temperature Sterilization System verification studies demonstrate that the Lumen Cycle performs as intended and the proposed device is substantially equivalent to the predicate devices.

Re: K131120
Trade/Device Name: Amsco® V-PRO® 1, V-PRO 1 Plus and V-PROMax Low Temperature Sterilization Systems
Regulation Number: 21 CFR 880.6860
Regulation Name: Ethylene Oxide Gas Sterilizer
Regulatory Class: II
Product Code: MLR
Dated: April 19, 2013
Received: April 22, 2013

Dear Mr. Brodbeck:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Mary S. Runner -S

Indications for Use

510(k) Number (if known): \( \text{K}131120 \)

Device Name: **Amsco\(^\text{TM}\) V-PRO\(^\text{TM}\) 1, V-PRO I Plus and V-PRO maX Low TemperatureSterilization Systems**

**Indications For Use:**

The Amsco V-PRO 1, V-PRO I Plus and V-PRO maX Low Temperature Sterilization Systems, with VAPRO\(\text{TM}\)HC Sterilant, are vaporized hydrogen peroxide sterilizers intended for use in the terminal sterilization of cleaned, rinsed and dried reusable metal and nonmetal medical devices used in healthcare facilities. The pre-programmed sterilization cycles (Lumen Cycle, Non Lumen Cycle, and Flexible Cycle) operate at low pressure and low temperature and are thus suitable for processing medical devices sensitive to heat and moisture.

The Amsco V-PRO 1, V-PRO I Plus and V-PRO maX Low Temperature Sterilization Systems' Lumen Cycle, the subject of this submission, can sterilize:

- Lumened and non-lumened instruments with diffusion-restricted spaces such as the hinged portion of forceps and scissors
- Medical devices, including single, dual and triple channelled rigid and semi-rigid endoscopes, with the following configurations:
  - **single channelled devices** with a stainless lumen that is \( \geq 0.77 \) mm internal diameter (ID) and \( \leq 500 \) mm in length
  - **dual channelled devices** with stainless steel lumens that are \( \geq 0.77 \) mm ID and \( \leq 527 \) mm in length
  - **triple channelled devices** with stainless steel lumens that are
    - \( \geq 1.2 \) mm ID and \( \leq 275 \) mm in length
    - \( \geq 1.8 \) mm ID and \( \leq 310 \) mm in length
    - or
    - \( \geq 2.8 \) mm ID and \( \leq 317 \) mm in length

*The validation studies for all channel/lumen configurations were conducted using a maximum of twenty (20) lumens per load. Hospital loads should not exceed the maximum number of lumens validated by this testing. The validation studies were performed using a validation load consisting of two instrument trays and two pouches for a total weight of 19.65 lbs."
The Amsco V-PRO I Plus and V-PRO maX Low Temperature Sterilization Systems' Non Lumen Cycle, cleared under K083097, K102394, and K111810, can sterilize:

- Non-lumened instruments including non-lumened rigid, semi-rigid and flexible endoscopes and non-lumened instruments with stainless steel diffusion-restricted areas such as the hinged portion of forceps or scissors.

The validation studies were conducted using a validation load consisting of two instrument trays and two pouches for a total weight of 19.65 lbs.

The Amsco V-PRO maX Low Temperature Sterilization System's Flexible Cycle, cleared under K102330 and K112760, can sterilize single or dual lumen surgical flexible endoscopes (such as those used in ENT, Urology and Surgical Care) and bronchoscopes in either of two load configurations:

1. Two flexible endoscopes with a light cord (if not integral to endoscope) and mat with no additional load.

   The flexible endosopes may contain either:
   - a single lumen that is ≥ 1 mm ID and ≤ 1050 mm in length
   - or two lumens with:
     - one lumen that is ≥ 1 mm ID and ≤ 998 mm in length
     - and the other lumen that is ≥ 1 mm ID and ≤ 850 mm in length

   The validation studies were conducted with two flexible endoscopes, each packaged into a tray with silicone mat and light cord (if not integral to endoscope).

2. One flexible endoscope with a light cord (if not integral to endoscope) and mat and additional non-lumened instruments including instruments with diffusion-restricted areas such as the hinged portion of forceps or scissors.

   The flexible endoscope can contain either:
   - a single lumen that is ≥ 1 mm ID and ≤ 1050 mm in length
   - or two lumens with:
     - one lumen that is ≥ 1 mm ID and ≤ 998 mm in length
     - and the other lumen that is ≥ 1 mm and ≤ 850 mm in length

   The validation studies were conducted with a flexible endoscope in a tray with silicone mat and light cord (if not integral to endoscope). Also included in the load were an additional instrument tray and one pouch for a total load weight of 24.0 lbs.
