Introduction:

Device Trade Name: NOVAPROBE LED Light Source (LEUKOS 175)

Common Name: Light source, Fiber Optic, Routine

Classification Name: Endoscope and accessories

Regulation Number: 21 CER 876.1500

Product Code: FCW, NTN

Device Description:

The NOVAPROBE LED LEUKOS 175 is specifically designed to provide the cold light intensity required for modern day Endoscopic procedures. The LED light provides the color temp of 6500 deg K also known as white light. The white light offers unmatched quality for the single chip, three chip and HD cameras. The LED light intensity is controlled digitally. Using LED nullifies any skin burning problems that may occur due to the use of arc lamps. The NovaProbe LED Light source assures that the light passing through the fiber optic cable is a cold light.

Intended Use:

The NovaProbe Inc. LED Light is used to illuminate the site of the surgery during minimally invasive surgical procedures in Arthroscopy (orthopedic surgery), Laparoscopy (general and gynecological surgery) and Endoscopy (general, gastroenterological and ENT surgery). The light is transmitted from the source through an optical cable and a scope.

Comparison of Technological Characteristics:

The technology of the NOVAPROBE LED LEUKOS 175 Light Source System is similar to the referenced predicate devices of LED Light Sources as they utilize the similar components as shown below.

Sterilization:

This system is a non-sterile system. The Light Source is to be cleaned with a soft cloth moistened with surface disinfectant, alcohol or spirit as defined in instruction manual.

Rational for Substantial Equivalence:

The NovaProbe Inc. LED LEUKOS 175 Light Source is substantially equivalent to Stryker Endoscopy LED light Source L9000 (K0828813), SOPRO LED light source 281(K103813), Richard Wolf ENDOLIGHT light source (K121724) and Sunoptic Technologies LLS-050 LED(K093792) light Source due to the fact that they all utilize similar components and technology as the NovaProbe Inc. LED LEUKOS 175 Light Source for the same approved intended uses. Further, the NovaProbe Inc. LED LEUKOS 175 Light Source introduces no new patient risks or concerns.

The NovaProbe Inc. LED LEUKOS 175 Light Sources were non-clinically tested to determine the safety and efficacy under the indications for use and meet aforementioned safety standards, same as the predicate devices.

Performance Data:

Design verification testing demonstrates that the devices function as intended, and the Performance did not raise any new issues of safety and effectiveness, and that formal user training is not required.

No applicable mandatory performance standards or special controls exists for this device.

Clinical Data:

No clinical data was required to confirm safety and effectiveness.
Conclusion:

Testing has shown that the NovaProbe Inc. LED LUEKOS 175 Light Source performs to its specifications, operates as intended, is safe and effective, and is substantially equivalent to legally marketed devices.

Dear Mr. Ingle:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you; however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set
forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

David Krause -S
