Special 510(k) Premarket Notification – ZOE Fluid Status Monitor Model: ZOE3

510(k) Summary

This summary of safety and effectiveness is provided as part of this Premarket Notification in compliance with 21 CFR, Part 807, Subpart E, Section 807.92.

APPLICANT
Noninvasive Medical Technologies, Inc.
6412 S. Arville St.
Las Vegas, NV 922614
Tel: (888) 906-0413
Fax: (702) 614-4170

OFFICIAL CORRESPONDENT
Dr. Marc O’Griofa MD (MB BCh BAO)
Chief Technology/Medical Officer

DATE PREPAIRED
October 19, 2012

TRADE NAME
ZOE Fluid Status Monitor

MODEL
ZOE3

COMMON OR CLASSIFICATION NAME
Impedance Plethysmograph

DEVICE CLASSIFICATION
Class II per 21CFR §870.2770

PRODUCT CODE
DSB

PREDICATE DEVICE NAMES
ZOE Fluid Status Monitor

The ZOE Fluid Status Monitor Model ZOE3 is substantially equivalent to the following currently marketed Predicate Device.

Device Description:
The ZOE Fluid Status Monitor Model ZOE3 is a non-invasive, battery powered impedance monitor designed as an 'early warning' monitor for determining changes in the fluid status of patients with fluid management problems.

The ZOE Fluid Status Monitor Model ZOE3 works by applying a low amplitude high frequency electrical current to the body and measuring the electrical impedance. Base Impedance also known as Zo, decreases when fluid increases and increases when fluid decreases.

The ZOE Fluid Status Monitor Model ZOE3 is designed for use with disposable, self-adhesive silver / silver chloride electrodes that are readily available from Noninvasive Medical Technologies, Inc. NMT approved electrodes must be used with the ZOE Fluid Status Monitor. Zo readings obtained from unapproved electrodes may not be accurate!

Labeling:
Federal (United States) Law restricts this device to sale by or on the order of a physician or licensed healthcare professional.

Noninvasive Medical Technologies, Inc. October 24, 2013
Indications for Use:
The ZOE Fluid Status Monitor is intended for patients:

- Taking diuretic medication
- Living with Heart Failure
- Living with End-stage Renal Disease
- Recovering from Coronary Artery Disease related event
- Suffering from Recurrent Dehydration

This device is intended for use under the direction of a physician, for the non-invasive monitoring and management of patients with fluid management problems in a variety of medically accepted clinical applications.

Predicate Device Discussion:
The ZOE Fluid Status Monitor Model ZOE3 has the same method of operation and is functionally equivalent to the predicate devices K112830 (November 13, 2012) & K131509 (June 28, 2013). The ZOE Fluid Status Monitor has the identical indications for use as the predicate devices the ZOE Fluid Status Monitor K112830 (November 13, 2012) & K131509 (June 28, 2013)

Performance Characteristics:
There is no performance standards published for Product Code DSB Impedance Plethysmograph (870.2770)

Quality and Safety Testing:
Noninvasive Medical Technology is presently certified to ISO13485 2003 as of 9/27/09 by IQ Net and NEMKO AS. (Registration Number 908132) All products are designed and manufactured under Quality Management System. The following quality assurance measures were applied to the Zoe Fluid Status Monitor:

- Risk Analysis
- Requirements Review
- Design reviews
- Code Inspections
- Verification and Validation
- H/W and SW Implementation Verification Testing

The ZOE Fluid Status Monitor Model ZOE3 will undergo testing to assess the overall electrical safety and EMI safety by an independent testing house. The ZOE Fluid Status Monitor will comply with the electrical standards of the CAN/CSA C22.2 No. 60601-1:08 standard The ZOE will meet all electrical and electromagnetic compatibility (EMI) safety requirements, set forth in the European national Safety Requirements LVD Low voltage Directive testing to Safety of Medical Devices IEC 60601-1, 3rd edition, EMC testing to Emissions / Immunity Requirements for EMC/EMI requirements for Medical Devices IEC 60601-1-2 which reasonably assures the device is safe when used as directed for its prescribed intended use.

Conclusion:
The ZOE3 Fluid Status Monitor Model has the same method of operation and is functionally equivalent to the predicate devices. The ZOE3 Fluid Status Monitor has the identical indications for use as the predicate devices the ZOE Fluid Status Monitors K112830 (November 13, 2012) & K131509 (June 28, 2013). The ZOE3 Fluid Status Monitor does not raise any new issues of safety, effectiveness or performance of the device when compared to the existing predicate devices ZOE Fluid Status Monitor K112830 (November 13, 2012) & K131509 (June 28, 2013)

Re: K133301
Trade/Device Name: ZOE3 Fluid Content Monitor
Regulation Number: 21 CFR 870.2770
Regulation Name: Impedance Plethysmograph
Regulatory Class: Class II
Product Code: DSB
Dated: December 20, 2013
Received: December 23, 2013

Dear Marc O'Griofa:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-
related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in
the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product
radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please
contact the Division of Small Manufacturers, International and Consumer Assistance at its toll-
free number (800) 638-2041 or (301) 796-7100 or at its Internet address
http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note
the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part
807.97). For questions regarding the reporting of adverse events under the MDR regulation (21
CFR Part 803), please go to
http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH's Office
of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the
Division of Small Manufacturers, International and Consumer Assistance at its toll-free number
(800) 638 2041 or (301) 796-7100 or at its Internet address

Sincerely yours,

Owen P. Faris -S
