Date Prepared: 25. October 2013

Device Name: Tinnitus SoundSupport

Device Class: Class II

Classification Name: Tinnitus Masker

Classification Regulation: 21 C.F.R. §874.3400

Product Code: KLW

Predicate Devices: K110932 Tinnitus Sound Generator, GnResound
K123450 Tinnitus Balance Software, Phonak

Intended Use / Indications for Use

Tinnitus SoundSupport is a tool intended to generate sounds to provide temporary relief to patients suffering from tinnitus as part of a tinnitus management program.

The target population is the adult population (>18yrs).

Tinnitus SoundSupport is targeted for licensed hearing care professionals (audiologists, hearing aid specialists, or otolaryngologists) who are familiar with the evaluation and treatment of tinnitus and hearing losses. The fitting of
Tinnitus SoundSupport must be done by a hearing care professional participating in a tinnitus management program.

Technological Characteristics

Oticon’s Tinnitus SoundSupport consists of a software module added to the company’s class II, 510(k)-exempt wireless air conduction hearing instruments legally marketed under 21 C.F.R. 874.3305.

Tinnitus SoundSupport is fitted to the patient by the Hearing Care Professional using Oticon fitting software.

Tinnitus SoundSupport provides the option of relief sounds based on white, pink or red noise. The relief sounds can be limited in frequency by high pass or low pass filters. Tinnitus SoundSupport also provides the option of amplitude modulation, a volume control and automatic level steering.

The design of Tinnitus SoundSupport is based on the controls of the Occupational Safety and Health Administration (OSHA). Compliance with OSHA controls is achieved through (1) output limitation and (2) professional labeling and (3) patient labeling.

Tinnitus SoundSupport must be used as part of a tinnitus management program.

Performance Data

Oticon’s Tinnitus SoundSupport embedded software module and the Tinnitus tool in the fitting software has been verified and validated according to relevant standard for medical device software (Figure 7-1). In all instances, Oticon’s Tinnitus SoundSupport functioned as intended and the performance observed was as expected.

The underlying class II, 510(k)-exempt wireless air conduction hearing instruments marketed legally by Oticon under 21 C.F.R. 874.3305 has been evaluated according to relevant standards. This includes evaluation in accordance with standards relating to EMC and electrical safety as well as biocompatibility (Figure 7-2). In all instances, the 510(k)-exempt hearing instruments functioned as intended and the performance was as expected.

**Substantial equivalence**

Oticon's Tinnitus SoundSupport is as safe and effective as GnResound's Tinnitus Sound Generator (K110932) and Phonak's Tinnitus Balance Software (K123450). As shown in the table below, Oticon's Tinnitus SoundSupport, GnResound's Tinnitus Sound Generator (K110932) and Phonak's Tinnitus Balance Software (K123450) have the same intended use and similar indications, technological characteristics and principles of operation. Minor technological differences do not present any new issues of safety or effectiveness. Thus, Oticon's Tinnitus SoundSupport is substantially equivalent to GnResound's Tinnitus Sound Generator (K110932) and Phonak's Tinnitus Balance Software (K123450).

**Indications for use**

Tinnitus SoundSupport is a tool intended to generate sounds to provide temporary relief to patients suffering from tinnitus as part of a tinnitus management program.

The target population is the adult population (\( >18 \) yrs).

Tinnitus SoundSupport is targeted for licensed hearing care professionals (audiologists, hearing aid specialists, or otolaryngologists) who are familiar with the evaluation and treatment of tinnitus and hearing losses. The fitting of Tinnitus SoundSupport must be done by a hearing care professional participating in a tinnitus management program.

The Tinnitus Sound Generator Module is a tool to generate sounds to be used in a Tinnitus Management Program to relieve patients suffering from tinnitus.

The target population is primarily the adult population over 18 years of age. This product may also be used with children 5 years of age or older.

The Tinnitus Sound Generator Module is targeted for healthcare professionals, which are treating patients suffering from tinnitus, as well as conventional hearing disorders.

Before being fit with Tinnitus Balance, individuals presenting with tinnitus should be assessed by a licensed ear physician to confirm the diagnosis and management of tinnitus. Phonak hearing aids provide amplification to address sensorineural, conductive, or mixed hearing losses.

**510(k) Summary**
The source of their tinnitus is not due to any of the following medical conditions:

- Visible congenital or traumatic deformity of the ear
- Any active drainage from the ear within the previous 90 days
- Sudden hearing loss within the previous 90 days
- Acute or chronic dizziness
- Unilateral hearing loss of sudden or recent onset within the previous 90 days
- Pain or discomfort in the ear

Re: K133308
Trade/Device Name: Tinnitus Soundsupport
Regulation Number: 21 CFR 874.3400
Regulation Name: Tinnitus Masker
Regulatory Class: Class II
Product Code: KLW
Dated: February 10, 2014
Received: February 14, 2014

Dear Mr. Witt:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Eric A. Mann -S
