Fax No: (216) 639-4459

Contact: Bill Brodbeck, Ph.D.
Director, Regulatory Affairs
Telephone: (440) 392-7690
Fax No: (440) 357-9198

Submission Date: July 10, 2014
1. **Device Name**

   **Trade Name:** VERIFY® V24 Self-Contained Biological Indicator
   
   **Common/usual Name:** Biological Indicator (BI)
   
   **Device Class:** Class II
   
   **Classification Name:** Indicator, Biological Sterilization Process (21 CFR 880.2800, FRC)

2. **Predicate Device**

   Verify Self-Contained Biological Indicator (SCBI) for Vaporized \(^{V_2O_2}\) Sterilization Processes (K073244) modified under K090514.

3. **Description of Device**

   The VERIFY V24 Self-Contained Biological Indicator (SCBI) is used by healthcare providers to monitor the V-PRO® Low Temperature Sterilization Systems. It is designed to accompany medical devices placed in the sterilizer.

   The user places the VERIFY V24 Self-Contained Biological Indicator into the V-PRO Low Temperature Sterilization System and performs a sterilization cycle. After cycle completion, the SCBI can either be immediately activated or it can be held at room temperature for a maximum of 72 hours (3 days) prior to activation.

   The SCBI is activated by sealing the vial and rupturing the medium ampoule using the STERIS VERIFY SCBI HP activator. The activator automatically seals the SCBI vial and releases the growth media.

   The activated SCBI is incubated at 55 – 60 °C for \(\geq 24\) hours. The SCBI indicates a pass if the media remains orange and non-turbid. The SCBI indicates a failure of sterilization if the media changes from orange to yellow and/or if the media is turbid.

4. **Intended Use**

   The VERIFY® V24 Self-Contained Biological Indicator is intended for routine monitoring of the Lumen, Non Lumen and Flexible cycles of V-PRO® Low Temperature Sterilization Systems.
5. **Description of Safety and Substantial Equivalence**

The VERIFY V24 Self-Contained Biological Indicator has the identical characteristics as compared to its predicate device, the Verify Self-Contained Biological Indicator (SCBI) for Vaporized $\text{H}_2\text{O}_2$ Sterilization Processes (name changed in K090514). A comparison table that outlines the characteristics of the proposed and predicate devices is below.

### Feature

<table>
<thead>
<tr>
<th>Proposed Device</th>
<th>Predicate Device</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>VERIFY V24 Self-Contained Biological Indicator</strong></td>
<td><strong>Predicate Device Verify Self-Contained Biological Indicator (SCBI) for Vaporized [VH2O2] Sterilization Processes (K073244) modified under K090514</strong></td>
</tr>
</tbody>
</table>

### Comparison

- Proposed and predicate devices have the same resistance characteristics specifications.
- Proposed and predicate devices utilize identical culture conditions. Please note that the reduced incubation time of 24 hours was cleared under K090514.
- Proposed and predicate devices have identical carrier materials.
- Primary and packaging materials are identical for predicate and proposed devices.
- Proposed and predicate devices specify identical storage conditions.
- Proposed and predicate devices claim identical shelf life.

The proposed and predicate devices are therefore identical in respect to the labeling, organism, accessories, spore population, resistance characteristics, culture conditions, carrier materials, packaging, storage conditions and claimed shelf life. The only difference between the subject and predicate device is the claimed intended use. This submission therefore focuses on testing to qualify the proposed biological indicator for use in the V-PRO 60 Low Temperature Sterilization System to demonstrate substantial equivalence to the claimed predicate.
Summary of Nonclinical Tests:

<tr>
<td>SCBI Growth Inhibition Following Exposure to V-PRO 60 Cycle</td>
<td>There was no growth inhibition and no effect of the sterilization process on the media.</td>
</tr>
<tr>
<td>SCBI Simulated Use in the V-PRO 60 Sterilizer</td>
<td>Simulated use performance has been successfully demonstrated.</td>
</tr>
<tr>
<td>SCBI Worst Case Location in the V-PRO 60 Sterilizer</td>
<td>Worst case location for SCBI placement was determined.</td>
</tr>
</tbody>
</table>

All performance studies for the VERIFY V24 Self-Contained Biological Indicator recommended within FDA Guidance for Industry and FDA Staff: Biological Indicator (BI) Premarket Notification [510(k)] Submissions have been previously completed, submitted and cleared under K073244 and K090514. These studies and the results are summarized in the appropriate sections throughout this submission and include, but are not limited to:

- Viable Spore Population Assay
- Resistance Characteristics
- Carrier and Primary Packaging Evaluation
- Holding Time Assessment
- Recovery Methods
- Shelf Life

Therefore, the VERIFY V24 Self-Contained Biological Indicator is substantially equivalent to the claimed predicate device since it is identical in design and performance characteristics and has, in addition, been qualified for use in the V-PRO 60 Sterilizer.

Summary Date: July 10, 2014
6. **Device Name**

   Trade Name: VERIFY® V24 Biological Indicator Challenge Pack

   Common/usual Name: Biological Indicator (BI) Process Challenge Device

   Device Class: Class II

   Classification Name: Indicator, Biological Sterilization Process (21 CFR 880.2800, FRC)

7. **Predicate Device**

   Verify® Biological Indicator Challenge Pack for Vaporized \( \text{VH}_2\text{O}_2 \) Sterilization Processes, K103331.

8. **Description of Device**

   The VERIFY V24 Biological Indicator Challenge Pack is used by healthcare providers for qualification testing of the V-PRO Low Temperature Sterilization Systems following installation, relocation, malfunctions or major repairs. The challenge pack is placed in an otherwise empty sterilizer chamber; a hospital-defined challenge load is not included.

   The user places the VERIFY V24 Biological Indicator Challenge Pack into the V-PRO Sterilizer and performs a sterilization cycle. After cycle completion, the VERIFY HPU Chemical Indicator (CI) and the VERIFY V24 Self-Contained Biological Indicator (SCBI) contained in the challenge pack are retrieved. The CI is assessed for a passing color change immediately and the SCBI can either be immediately activated or it can be held at room temperature for a maximum of 72 hours (3 days) prior to activation.

   The SCBI is activated by sealing the vial and rupturing the media ampoule using the STERIS VERIFY SCBI HP activator. The activator automatically seals the SCBI vial and releases the growth media.

   The activated SCBI is incubated at 55-60 °C for ≥ 24 hours. The SCBI indicates a pass if the media remains orange and non-turbid. The SCBI indicates a failure if the media changes from orange to yellow and/or if the media is turbid.
9. **Intended Use**

The VERIFY V24 Biological Indicator Challenge Pack is intended for qualification testing of the Lumen, Non-Lumen and Flexible Cycles in V-PRO Low Temperature Sterilization Systems following installation, relocation, malfunctions or major repairs.

The challenge pack is placed in an otherwise empty sterilizer chamber; a hospital-defined challenge load is not included.

The challenge pack is not intended for routine monitoring of V-PRO Sterilizers. It has been tested and validated solely for use in Sterilizer qualification testing.

10. **Description of Safety and Substantial Equivalence**

The VERIFY V24 Biological Indicator Challenge Pack has the identical characteristics as compared to its predicate device, the Verify Biological Indicator Challenge Pack for Vaporized $\text{H}_2\text{O}_2$ Sterilization Processes, K103331. A comparison table that outlines the characteristics of the proposed and predicate devices is below.

<td>------------</td>
</tr>
<tr>
<td>Biological Indicator (BI)</td>
<td>VERIFY V24 SCBI (subject of this submission)</td>
<td>Verify V24 SCBI (K090514)</td>
<td>The biological indicator is identical in materials.</td>
</tr>
<tr>
<td>Mechanism to Increase the Resistance of the BI</td>
<td>The VERIFY V24 SCBI is packaged with a sheet of polyurethane foam which serves as a physical barrier to penetration as well as a reservoir for hydrogen peroxide.</td>
<td>The Verify V24 SCBI is packaged with a sheet of polyurethane foam which serves as a physical barrier to penetration as well as a reservoir for hydrogen peroxide.</td>
<td>The mechanism to increase BI resistance is identical in the proposed and predicate devices.</td>
</tr>
<tr>
<td>BI Secondary Packaging</td>
<td>The SCBI and foam sheet are placed within a Tyvek pouch.</td>
<td>The SCBI and foam sheet are placed within a Tyvek pouch.</td>
<td>The BI Secondary Packaging is identical in the proposed and predicate devices.</td>
</tr>
<tr>
<td>Class I Chemical Indicator</td>
<td>The VERIFY HPU Chemical Indicator (separate Premarket Notification submission) is placed in the pouch. A throughput process indicator is also located on the VERIFY V24 SCBI label.</td>
<td>The Verify V-PRO Chemical Indicator (K091174) is placed in the pouch. A throughput process indicator is also located on the Verify V24 SCBI label.</td>
<td>The Class I Chemical Indicator intended to be used in the proposed device is similar to that in the predicate device. A separate, concurrent Premarket Notification is being submitted for the Class I Process Indicator.</td>
</tr>
<tr>
<td>Resistance Characteristics</td>
<td>The VERIFY V24 Biological Indicator Challenge Pack is more resistant to the V-PRO 60 Sterilizer cycles than is the biological model developed for validation of those sterilization cycles.</td>
<td>The Verify Biological Indicator Challenge Pack for Vaporized ( \text{VH}_2\text{O}_2 ) Sterilization Processes is more resistant to the V-PRO maX Sterilizer cycles than is the biological model developed for validation of those sterilization cycles.</td>
<td>Performance testing provided in this submission demonstrates that the VERIFY V24 Biological Indicator Challenge Pack is more resistant to the V-PRO 60 Sterilizer cycles than is the biological model developed for validation of those sterilization cycles.</td>
</tr>
</tbody>
</table>
The proposed and predicate devices are therefore identical except for the claimed intended use and the Class I Chemical Indicator, which has been submitted under a separate concurrent Premarket Notification. This submission therefore focuses on testing to qualify the proposed device for use in the V-PRO 60 Low Temperature Sterilization System to demonstrate substantial equivalence to the claimed predicate.

Summary of Nonclinical Tests:

<table>
<thead>
<tr>
<th>Test</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resistance Characterization</td>
<td>Pass Challenge Pack resistance is equivalent or greater than the biological models used to validate the V-PRO 60 Low Temperature Sterilization System.</td>
</tr>
<tr>
<td>Simulated Use Evaluation</td>
<td>Pass The VERIFY HPU Chemical Indicator and VERIFY V24 SCBI yielded passing results when evaluated under worst case simulated use conditions.</td>
</tr>
<tr>
<td>Worst Case Location</td>
<td>Pass The worst case location within the V-PRO 60 Sterilizer Chamber was identified</td>
</tr>
</tbody>
</table>

The subject device is similar to the claimed predicate and conforms with all performance studies recommended within FDA Guidance for Industry and FDA Staff: Biological Indicator (BI) Premarket Notification [510(k)] Submissions.

Therefore, the VERIFY V24 Biological Indicator Challenge Pack is substantially equivalent to the claimed predicate device for use in the V-PRO 60 Sterilizer.

Re: K140499
Trade/Device Name: Verify® V24 Self-Contained Biological Indicator, Verify® V24 Biological Indicator Challenge Pack
Regulation Number: 21 CFR 880.2800
Regulation Name: FRC
Regulatory Class: II
Product Code: FRC
Dated: June 19, 2014
Received: June 24, 2014

Dear Mr. Brodbeck:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA).

You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Tejasri Purohit-Sheth, M.D.
