Traditional 510(k): Skintact® Neutral Electrodes for Neonates
510(k) Summary-Continued

DESCRIPTION of the DEVICE:
Skintact® Neutral Electrodes for Neonates are single use, non-sterile and disposable and are to be used on intact (uninjured) skin.
Skintact® Neutral Electrodes for Neonates consist of a backing material, conductive layer and conductive adhesive gel. The Neutral Electrodes for Neonates are applied on a release liner. The only change in construction materials is a slight modification of the conductive hydrogel. This modification was carried out to adapt the gel to the skin of neonates. Skintact® Neutral Electrodes for Neonates are accessories to surgery devices.
Skintact® Neutral Electrodes for Neonates are passive devices and do not contain active electronics, software or firmware. Skintact® Neutral Electrodes for Neonates are packaged in water-vapour-proofed, heat-sealed, non-transparent, aluminized pouches.

SUMMARY of TESTING:
Performance and Standards:
Performance testing was conducted according standard EN60601-2-2:2009 Medical electrical equipment - Part 2-2: Particular requirements for the basic safety and essential performance of high frequency surgical equipment and high frequency surgical accessories (IEC 60601-2-2:2009), relevant clauses.
EN60601-2-2:2009, 201.15.101.5 - NE thermal performance - including comparative thermal performance testing against predicate product.
EN60601-2-2:2009, 201.15.101.6 - NE contact impedance
EN60601-2-2:2009, 201.15.101.7 - NE adhesion
Release test with electrodes aged at +23°C for 43 days and Shelf life test with accelerated aged electrodes at increased temperature of +75°C for 43 days.
According EN60601-2-2:2009, 201.15.101.8. Results are within limits.

Biocompatibility and Sterility:
Biocompatibility testing has been performed for materials with direct skin contact. Biocompatibility testing confirms the materials are biocompatible and do not introduce new risks. Skintact® Neutral Electrodes for Neonates are NON-STERILE so there was no sterility testing required.

Substantial Equivalence Summary [21CFR 807.92(a) (6)]
Skintact® Neutral Electrodes for Neonates have the same indications for use as Skintact® Cool Contact Electrosurgical Grounding Plates approved in existing 510(k)s K030362 and K063161, expanded with the addition of target group "neonates" like approved in existing 510(k) K994428.

CONCLUSION:
The introduction of the Skintact® Neutral Electrodes for Neonates (and also to be offered for sale under various private label tradenames) does not introduce new issues of safety or effectiveness and the Skintact® Neutral Electrodes for Neonates are substantially equivalent to the predicate device. Biocompatibility testing confirms the materials are biocompatible and do not introduce new risks.

The patient weight range of Skintact® Neutral Electrodes for Neonates is indicated according standard EN60601-2-2:2009 Medical electrical equipment - Part 2-2: Particular requirements for the basic safety and essential performance of high frequency surgical equipment and high frequency surgical accessories (IEC 60601-2-2:2009). Skintact Neutral Electrodes for Neonates are substantially equivalent to predicate devices.

Traditional 510(k): Skintact® Neutral Electrodes for Neonates
Dear Ms. Duncan:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you; however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set
forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638 2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

David Krause -S

Indications for Use

510(k) Number (if known): K140500

Device Name: Skintact® Neutral Electrodes for Neonates

Indications for Use:

Skintact® Neutral Electrodes for Neonates are designed for use with electrosurgical generators for cutting and coagulation of human tissue of newborn or prematurely born patients of between approximately 1 and 11 lbs (0.45 kg and 4.99 kg).

Prescription Use X AND/OR Over-The-Counter Use ______
(Part 21 CFR 801 Subpart D) (21 CFR 801 Subpart C)
