Re: K142153
Trade/Device Name: Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution
Regulation Number: 21 CFR 868.5630
Regulation Name: Nebulizer (Direct Patient Interface)
Regulatory Class: II
Product Code: CAF
Dated: March 30, 2015
Received: April 1, 2015

Dear Mr. Cochie:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Tejashri Purohit-Sheth, M.D.

Indications for Use

The Hudson RCI® Addipak® Unit Dose Vial, 0.9% Full Normal Saline Solution may be used in conjunction with a non-ventilatory nebulizer for lavage therapy, or for tracheal irrigation.

Type of Use (Select one or both, as applicable)

- Prescription Use (Part 21 CFR 801 Subpart D)
- Over-The-Counter Use (21 CFR 801 Subpart C)

PLEASE DO NOT WRITE BELOW THIS LINE – CONTINUE ON A SEPARATE PAGE IF NEEDED.

C. Date Prepared

July 25, 2014 (Revised April 28, 2015)

D. Device Name

Trade Name: Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution

Common Name: Saline Solution for Inhalation

Classification Name: Nebulizer (Direct Patient Interface)
CFR – 868.5630, Class II

E. Device Description

Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution is a pre-filled vial of sterile 0.9% saline for inhalation therapy. The content of this product is a 0.90% sodium chloride solution (*normal saline*). Vials are factory-sealed, made of translucent, color-coded polyethylene, and are available in three sizes (3mL, 5mL, and 15mL). These products are single-use, disposable, and intended for inhalation only.

Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution filled with sterile saline solutions conforms to the specifications of the USP monograph for Sodium Chloride Inhalation Solution.
Section 25 – 510(k) Summary

Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution have a perforated, break-away twist cap for dispensing the solution. When twisted by the user, the cap breaks away and opens a small hole for solution to pass through. The Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution are designed with inverted graduations to allow the clinician to read volume while dispensing the solution.

F. Indications for Use

The Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution may be used in conjunction with a non-ventilatory nebulizer for lavage therapy, or for tracheal irrigation.

G. Target Population

This device is intended for use on any patient requiring lavage therapy or tracheal irrigation.

H. Environments of Use

This device is intended for home, hospital, and sub-acute facilities.

This product is single use only.

I. Contraindications

There are no known contraindications.

J. Comparative Equivalence Characteristics

The proposed Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution is substantially equivalent to the predicate devices:

### K. Non-clinical Comparative Performance Testing

Bench testing has been performed to verify that the performance of the proposed Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution is substantially equivalent to the predicate devices, and that the Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution will perform as intended.

</table>

All patient contacting materials are in compliance with ISO 10993-1. Testing included cytotoxicity, irritation, sensitization, genotoxicity and implantation testing.

In addition, the vial material was tested to USP <661> physiochemical test for plastics and found to meet the criteria for nonvolatile residue, heavy metals and buffering capacity.

L. Substantial Equivalence

The proposed Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution is substantially equivalent in intended use for lavage therapy and tracheal irrigation, design, performance and principles of operation to the identified predicate devices. The differences between the Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution and the predicate devices are minor and raise no new issues of safety and efficacy. The Hudson RCI® AddiPak® Unit Dose Vial, 0.9% Full Normal Saline Solution are substantially equivalent to the currently marketed predicate device.
