Re: K143351
Trade/Device Name: Icase Contact Lens Case
Regulation Number: 21 CFR 886.5928
Regulation Name: Soft (hydrophilic) Contact Lens Care Products
Regulatory Class: Class II
Product Code: LRX
Dated: March 30, 2015
Received: April 1, 2015

Dear Ms. Beucler:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies.
You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Kesia Y. Alexander -A

Enclosure
Indications for Use

For storage of soft (hydrophilic), and rigid gas permeable (RGP) hard contact lenses during disinfection with buffered, saline, 3% hydrogen peroxide contact lens solution. Not to be used with multi-purpose (chemical) disinfection, heat disinfection or saline solutions.

Type of Use (Select one or both, as applicable)

☐ Prescription Use (Part 21 CFR 801 Subpart D)  ☒ Over-The-Counter Use (21 CFR 801 Subpart C)

510(k) Summary

NOVABAY PHARMACEUTICALS, INC.

iCase Contact Lens Case

1. Applicant Information

NovaBay Pharmaceuticals, Inc.
5980 Horton St., Suite 550
Emeryville, CA  94608

Contact Person:   Dr. Charles Francavilla
Telephone No.:   (510) 899 - 8831
Fax No.:         (510) 280 - 8379
E-mail:          cfrancavilla@novabaypharma.com
Date Prepared:   April 28, 2015

2. Device Information

Classification name: Contact Lens Care Products
Device classification: Class II
Regulation number: 21 CFR 886.5928 (Soft (hydrophilic) contact lens care products)
Product code: LRX
Proprietary name: NovaBay Pharmaceuticals, Inc. iCase Contact Lens Case

3. Predicate Devices

NovaBay Pharmaceuticals, Inc. claims substantial equivalence to PMA No. P820040,
AOSept Lens Care System (Reclassified to Class II in 1997), Trade Name “Clear Care Contact Lens Care System”, CIBA Vision.

4. Description of Device

The iCase is a personal contact lens case used with one step hydrogen peroxide (H₂O₂) lens disinfecting/cleaning solutions. The iCase monitors the initial rate of neutralization of hydrogen peroxide (H₂O₂) and indicates the status of the disinfection cycle using the LED display in the cap. The iCase LED display and monitoring system are disabled after 65 cycles of use to promote routine lens case replacement.
5. **Indications for Use**

The NovaBay Pharmaceuticals, Inc. iCase contact lens case is indicated for the storage of soft (hydrophilic), and rigid gas permeable (RGP) hard contact lenses during disinfection with buffered, saline, 3% hydrogen peroxide contact lens solution. Not to be used with multi-purpose (chemical) disinfection, heat disinfection or saline solutions.

6. **Performance Data**

The key components of any hydrogen peroxide disinfection case includes: plastic vial, lens baskets, vented screw cap and catalytic platinum disk. The iCase Contact Lens Case and the predicate device incorporate all of these same components with identical functions.

The key electrical components of the iCase includes: power supply (battery), sensors, microcontroller and light emitting diodes. These components are unique to the iCase Contact Lens Case. The iCase Contact Lens Case with the integrated electrical components and software has undergone extensive evaluation and testing for IEC electrical safety testing, Risk Analysis, Device Hazard Analysis, Corrosion testing, Software validation and Cycling studies including peroxide degradation measurements.

**Non-Clinical Data**

The iCase Contact Lens Case was evaluated for Biocompatibility safety in accordance with the following standards. The iCase component testing included Cytotoxicity, Systemic Toxicity and Primary Ocular Irritation. The test results indicate the components are safe for the intended use.

- ISO Part 10993 Biological Evaluation of Medical Devices.

**Electrical Safety Data**

The iCase Contact Lens Case was evaluated for electrical safety in accordance with the following standards.

- IEC 60601- 1 Medical Electrical Equipment Part 1: General Requirements for basic safety and essential performance.
• IEC 60601-1-11 Medical Electrical Equipment Part 1-11: General Requirements for basic safety and essential performance, Collateral Standard: Requirements for Medical Electrical Equipment and Medical Electrical Systems use in the Home Healthcare Environment,

• IEC 62366 Medical Devices - Application of Usability Engineering to Medical Devices.

The iCase Contact Lens Case complies with the applicable sections of the referenced electrical standards. The iCase red/yellow indicator lights vary from the standard, as they do not indicate Warning/Caution as listed 60601-1 Section 7.8.1.

The iCase Contact Lens Case utilizes data acquisition software to monitor the status of the peroxide neutralization process. The iCase software has been evaluated in accordance with FDA guidance, General Principles of Software Validation; Final Guidance for Industry and FDA Staff, January 2002 and the FDA Guidance for Premarket Submissions for Software Contained in Medical Devices, May 2005. The iCase Contact Lens Case complies with the applicable sections of the referenced software validation guidance.

Clinical Data

Clinical studies involving contact lens wear were unnecessary for this application. Lens care hydrogen peroxide solutions used with this iCase Contact Lens Case are already cleared for use as cleaning, rinsing, disinfection and storage solutions for contact lenses.

Conclusion

Based upon the test data presented, the NovaBay Pharmaceuticals, Inc. iCase Contact Lens Case is as safe, as effective and performs as well as the predicate device. A comparison of the new device and the predicate device is presented in Table 1.

7. Substantial Equivalence

The claim of substantial equivalence to the approved PMA No. P820040, AOSept Lens Care System (Reclassified to Class II in 1997), Trade Name “Clear Care Contact Lens Care System, is supported by the Comparison of Characteristics in Table 1. The predicate device was approved under the FDA product code LPN (accessories, soft lens products) and included a lens care solution and lens case. The iCase 510(k) application includes only a lens case and is identified by the FDA product code LRX (case, contact lens).

The iCase Contact Lens Case and the Clear Care contact lens case are similar in design and volume. Both lens cases are manufactured from similar materials that have been proven to be safe for use. Both lens cases can be used for one step hydrogen peroxide disinfection treatments. The new components used in the iCase Contact Lens Case have been evaluated for electrical safety and validated for their intended functions and do not pose any new risks for safety and effectiveness. Therefore, NovaBay Pharmaceuticals, Inc. iCase Contact Lens Case is substantially equivalent to the predicate device.
