Trade/Device Name: LOGIQ S8
Regulation Number: 21 CFR 892.1550
Regulation Name: Ultrasonic pulsed doppler imaging system
Regulatory Class: II
Product Code: IYN, IYO, ITX
Dated: February 13, 2017
Received: February 14, 2017

Dear Mr. Behn:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Industry and Consumer Education at its toll-free number (800) 638 2041 or (301) 796-7100 or at its Internet address

<http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm>. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to <http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm> for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address

Indications for Use Forms

The following forms represent indications with clinical applications and exam types along with the modes of operation for the LOGIQ S8 system and for all of its probe/mode combinations. Combinations identified by “P” represent those previously cleared with the unmodified LOGIQ S8. “N” is new in this submission and “E” have been added by Appendix E of the FDA Ultrasound Guidance.

The subject modification does not alter the previously cleared system level indications and clinical applications.

Determination of Substantial Equivalence: Comparison to Predicates

The following is an overview of the differences between the proposed LOGIQ S8 and the predicate LOGIQ S8 (K152195). The proposed LOGIQ S8 has had several features and probes migrated to it currently cleared on other GE Ultrasound systems.

- The systems are all intended for diagnostic ultrasound imaging and fluid flow analysis.
- The LOGIQ S8 and predicate LOGIQ S8 systems have the same clinical intended use.
- The LOGIQ S8 and predicate LOGIQ S8 systems have the same imaging modes except the new LOGIQ S8 adds Fibroscan elastography and CAP (Controlled Attenuation Parameter) which is substantially equivalent to FibroScan (K160524).
- The systems are manufactured with materials which have been evaluated and found to be safe for the intended use of the device.
- The systems have acoustic power levels which are below the applicable FDA limits.
- The LOGIQ S8 and predicate LOGIQ S8 systems have similar capability in terms of performing measurements, capturing digital images, reviewing and reporting studies.
- The LOGIQ S8 and predicate systems have been designed in compliance with approved electrical and physical safety standards.
- The following probes and features have been migrated from GE ultrasound systems LOGIQ E9 (K163077): C1-6VN-D, C2-9VN-D, C2-7VN-D probe, and Contrast parametric imaging.
