Re: K171443

Trade/Device Name: Etherea MX

Regulation Number: 21 CFR 878.4810

Regulation Name: Laser Surgical Instrument For Use In General And Plastic Surgery And In
Dermatology

Regulatory Class: Class II

Product Code: GEX, ONF, PDZ, ILY

Dated: March 13, 2018

Received: March 13, 2018

Dear Kathy Maynor:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good

manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to <http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm> for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

For comprehensive regulatory information about medical devices and radiation-emitting products, including information about labeling regulations, please see Device Advice (<https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/>) and CDRH Learn (<http://www.fda.gov/Training/CDRHLearn>). Additionally, you may contact the Division of Industry and Consumer Education (DICE) to ask a question about a specific regulatory topic. See the DICE website (<http://www.fda.gov/DICE>) for more information or contact DICE by email (DICE@fda.hhs.gov) or phone (1-800-638-2041 or 301-796-7100).

Sincerely,

Jennifer R. Stevenson -S3

Indications for Use

510(k) Number (if known)

K171443

Device Name

Vydence Etherea MX

Indications for Use (Describe)

IPL 400nm – 1200nm Filter

- The treatment of moderate inflammatory acne vulgaris;
- The treatment of benign pigmented epidermal lesions including dyschromia, hyperpigmentation, melasma, and ephelides (freckles);
- the treatment of benign cutaneous lesions including warts, scars and striae;
- The treatment of benign cutaneous vascular lesions including port wine stains, hemangiomas, facial, truncal and leg telangiectasias, rosacea, erythema of rosacea, angiomas and spider angiomas, Poikiloderma of Civatte, leg veins and venous malformations.
- Use on all skin types (Fitzpatrick I-VI).

IPL 515-1200nm Filter

- The treatment of moderate inflammatory acne (acne vulgaris).
- The treatment of tattoos and benign pigmented epidermal and benign cutaneous lesions including warts, scars, striae, dyschromia, hyperpigmentation, melasma, ephelides (freckles), lentigines, nevi, melasma, and café-au-lait macules.
- The treatment of benign cutaneous vascular lesions including port wine stains, hemangiomas, facial, truncal and leg telangiectasias, rosacea, erythema of rosacea, angiomas and spider angiomas, poikiloderma of Civatte, leg veins and venous malformations.
- The removal of unwanted hair to effect stable long-term or permanent hair reduction. . Permanent reduction in hair growth is defined as the long-term , stable reduction in the number of hairs regrowing when measured at 6,9 an 12 months after the completion of a treatment regime.
- Use on Fitzpatrick skin types I-V.

Type of Use (Select one or both, as applicable)

Prescription Use (Part 21 CFR 801 Subpart D)

Over-The-Counter Use (21 CFR 801 Subpart C)

CONTINUE ON A SEPARATE PAGE IF NEEDED.

Indications for Use (Describe)

IPL 540nm-1200nm Filter

- benign pigmented epidermal lesions including dyschromia, hyperpigmentation, melasma, and ephelides (freckles),
- lentigines, nevi, and cafe-au-lait macules;
- the treatment of benign cutaneous vascular lesions including port wine stains, hemangiomas, facial, truncal and leg telangiectasias, rosacea, erythema of rosacea, angiomas and spider angiomas, poikiloderma of Civatte, leg veins and venous malformations.
- The treatment of benign cutaneous lesions including warts, scars and striae.
- The removal of unwanted hair to effect stable long-term or permanent hair reduction. Permanent reduction in hair growth is defined as the long-term , stable reduction in the number of hairs regrowing when measured at 6,9 and 12 months after the completion of a treatment regime.
- Use on all skin types (Fitzpatrick I-VI).

IPL 580nm-1200nm Filter

- The treatment of moderate inflammatory acne vulgaris.
- The treatment of benign pigmented epidermal lesions, including dyschromia, hyperpigmentation, melasma and ephelides (freckles).
- The treatment of face and body vascular and benign pigmented lesions.
- The treatment of benign cutaneous lesions, including scars and striae.
- The treatment of benign cutaneous vascular lesions, including port wine stains, hemangiomas, facial, truncal and leg telangiectasias, rosacea, melasma, angiomas and spider angiomas, poikiloderma of Civatte, leg veins and venous malformations.
- The removal of unwanted hair to effect stable long-term or permanent hair reduction. . Permanent reduction in hair growth is defined as the long-term , stable reduction in the number of hairs regrowing when measured at 6,9 an 12 months after the completion of a treatment regime.

Vydence Etherea MX

Indications for Use (Describe)

Intense IR Handpiece

• intended to emit energy in the infrared spectrum to provide topical heating for the purpose of elevating the tissue temperature. It's also indicated for the treatment in the temporary relief of minor muscle pain and joint pain and stiffness, the temporary relief of minor joint pain associated with arthritis, the temporary increase in local circulation where applied, and the relaxation of muscles; may also help muscle spasms, minor sprains and strains, and minor muscular back pain.

1064 LongPulse Handpiece

• removal of unwanted hair, for stable long term or permanent hair reduction and for treatment of PFB. The laser is indicated for all skin types, Fitzpatrick I-VI, including tanned skin. Permanent hair reduction is defined as the long-term, stable reduction in the number of hair regrowing when measured at 6, 9 and 12 months after the completion of a treatment regime;

• Treatment of pseudofolliculitis barbae (PFB)

• Benign vascular lesions such as, but not limited to treatment of: Port wine stains; Hemangiomas; Warts; Superficial and deep telangiectasias (venulectasias); Reticular veins (0.1-4.0 mm dia.) of the leg; Rosacea; Venus lake; Leg veins; Spider veins; Poikiloderma of Civatte; Angiomas

Type of Use (Select one or both, as applicable)

Device Name

Vydence Etherea MX

Indications for Use (Describe)

1064 LongPulse Handpiece (continued)

- Benign pigmented lesions such as, but not limited to: Lentigos (age spots); Solar lentigos (sun spots); Cafè-au-lait macules; Seborrheic keratoses; Nevi and nevus of Ota; Chloasma; verrucae, skin tags, keratoses, the removal of black, blue, or green tattoos (significant reduction in the intensity of black and/or blue/black tattoos, plaques

- Benign cutaneous lesions, such as, but not limited to warts, scars, striae and psoriasis
Pigmented lesions to reduce lesion size, for patients with lesions that would potentially benefit from aggressive treatment, and for patients with lesions that have not responded to other laser treatments.

* The non-ablative treatment of facial wrinkles, such as, but not limited to:

- Periocular wrinkles
- Perioral wrinkles

Laser skin resurfacing procedures for the treatment of:

- Acne scars
- Wrinkles
- reduction of red pigmentation in hypertrophic and keloid scars where vascularity is an integral part of the scar

Type of Use (Select one or both, as applicable)

Indications for Use

510(k) Number (if known)

K171443

Device Name

Vydence Etherea MX

Indications for Use (Describe)

1064 LongPulse Handpiece Short Pulse Operation

- intended for the coagulation and hemostasis of benign vascular lesions such as but not limited to, rosacea/ diffuse redness, poikiloderma of civatte, scar reduction (including hypertrophic and keloidscars), and warts.
- is also indicated for the treatment of wrinkles such as, but not limited to, periocular and perioral wrinkles.
- For use on all skin types(Fitzpatrick I-VI), including tanned skin.

1064 Handpiece - Onychomycosis

- podiatry (i.e. ablation, vaporization, incision, excision, and coagulation of soft tissue) including matrixectomy, radical nail excision, periungual and subungual warts, plantar warts, neuromas,
- temporary increase of clear nail in patients with onychomycosis (e.g., dermatophytes Trichophyton rubrum and Trichophyton mentagrophytes, and/or yeasts Candida albicans, etc.).

Acroma QS handpiece

The 1064 nm wavelength is indicated for:

- treatment of benign vascular lesions such as (but not limited to): port wine stains; hemangiomas; warts; superficial and deep telangiectasias (venulectasias); reticular veins (0.1-4.0 mm diameter) of the leg; rosacea; venous lakes; leg veins; spider veins; Poikiloderma of Civatte; angiomas;
- benign cutaneous lesions, such as, but not limited to: warts; scars; striae; psoriasis;
- benign pigmented lesions such as, but not limited to: lentigos (age spots); solar lentigos (sun spots); cafe-au-lait macules; seborrheic keratoses; nevi and Nevus of Ota; chloasma; verrucae; skin tags;
- keratoses; the removal of black, blue or green tattoos (significant reduction in the intensity of black and/or blue/black tattoos); plaques;
- pigmented benign lesions to reduce lesions' size for patients with lesions that would potentially benefit from aggressive treatment, and for patients with lesions that have not responded to other laser treatments.
- the non-ablative treatment of facial wrinkles, including but not limited to: periocular wrinkles; perioral wrinkles;
- laser skin resurfacing procedures for the treatment of acne scars; wrinkles,
- reduction of red pigmentation in hypertrophic and keloid scars where vascularity is an integral part of the scar.
- indicated for use on all skin types (Fitzpatrick I-VI), including tanned skin.

Type of Use (Select one or both, as applicable)

Device Name

Vydence Etherea MX

Indications for Use (Describe)

Acroma QS handpiece (continued)

The 532 nm wavelength is indicated for:

- incision, excision, ablation, vaporization of soft tissue;
- tattoo removal: light blue, yellow, red; green;
- benignvascular lesions: Hemangiomas (port wine stains/birthmarks, cavernous, cherry, spider, hemangiomas); angiomas (cherry, spider); telangiectasias; spider nevi;
- benign pigmented lesions: cafe-au-lait macules; lentigines (senile and solar); freckles (ephelides); chloasma; nevi; nevus spillus; Nevus of Ota; Becker's Nevi;
- other benign pigmented cutaneous lesions: verrucae; skin tags; keratoses; plaques

1540 GoSmooth Handpiece

- The 1540 Fractional Non-ablative Laser Handpiece is intended for use in the coagulation of soft tissue, skin resurfacing procedures as well as treatment of melasma, striae, acne scars and surgical scars.

2940 DualMode Handpiece - non-fractional

• DERMATOLOGY AND PLASTIC SURGERY

Skin resurfacing; Treatment of wrinkles; Epidermal nevi; Telangiectasia; Spider veins;

Actinic chelitis; Keloids; Verrucae; Skin tags;

Anal tags; Keratoses; Scar revision (including acne scars); Debulking benign tumors; Debulking cysts; Superficial skin lesions; : Diagnostic biopsies; Decubitus

ulcers;
