Re: K180503
Trade/Device Name: PRECICE STRYDE System
Regulation Number: 21 CFR 888.3020
Regulation Name: Intramedullary Fixation Rod
Regulatory Class: Class II
Product Code: HSB, HWC
Dated: February 22, 2018
Received: February 26, 2018

Dear Lance Justice:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

April 3, 2018
Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

For comprehensive regulatory information about medical devices and radiation-emitting products, including information about labeling regulations, please see Device Advice (https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/) and CDRH Learn (http://www.fda.gov/Training/CDRHLearn). Additionally, you may contact the Division of Industry and Consumer Education (DICE) to ask a question about a specific regulatory topic. See the DICE website (http://www.fda.gov/DICE) for more information or contact DICE by email (DICE@fda.hhs.gov) or phone (1-800-638-2041 or 301-796-7100).

Sincerely,

Mark N. Melkerson -S

Enclosure
Device Name
PRECICE STRYDE System

Indications for Use (Describe)
The PRECICE STRYDE System is indicated for limb lengthening, open and closed fracture fixation, pseudoarthrosis, mal-unions, non-unions, or bone transport of long bones.
510(k) Summary

In accordance with Title 21 of the Code of Federal Regulations, Part 807, and in particular 21 CFR §807.92, the following summary of information is provided:

A. Submitted by:
   Lance Justice
   Regulatory Affairs Specialist
   NuVasive Specialized Orthopedics, Inc.
   101 Enterprise, Suite 100
   Aliso Viejo, CA 92656
   Telephone: (949) 544-6540
   Date Prepared: February 22, 2018

B. Device Name
   Trade or Proprietary Name: PRECICE® STRYDE™ System
   Common or Usual Name: Intramedullary Fixation Rod
   Classification Name: Rod, Fixation, Intramedullary and Accessories;
                       Screw, Fixation, Bone
   Device Class: Class II
   Classification: 21 CFR § 888.3020 and 888.3040
   Product Code: HSB, HWC

C. Predicate Devices
   The subject PRECICE STRYDE System is substantially equivalent to the predicate device, PRECICE System (K173129).

D. Device Description
   The PRECICE STRYDE System includes the PRECICE STRYDE Nail, locking screws, end caps, surgical instruments, and external remote controller (ERC). The PRECICE STRYDE nails and end caps are supplied sterile by gamma radiation while the locking screws and instruments are supplied non-sterile and must be sterilized prior to use. The system is designed to achieve limb correction through gradual lengthening or compression and providing internal fixation for fractures of long bones. The telescopic PRECICE STRYDE Nail is implanted using locking screws, end caps, and reusable surgical instruments. The PRECICE STRYDE Nail contains an enclosed rare earth magnet, telescoping distraction rod, and planetary gearing which allows the length of the nail to be adjusted non-invasively by the External Remote Controller (ERC). The PRECICE STRYDE Nail is available in various diameters, lengths and screw hole configurations to accommodate a variety of patient anatomies and implantation methods. The locking screws are also available in a variety of diameters, lengths, and thread styles. The ERC is available in several compatible models.

   The purpose of this submission is to implement design changes to the predicate PRECICE System (K173129) to create a product line extension which includes the PRECICE STRYDE Nail and compatible locking screws and end caps. These design changes meet improved performance specifications which allow for modification of the device labeling; specifically, the contraindications, warnings, and precautions regarding maximum patient weight and ERC/tissue
Special 510(k) Premarket Notification

PRECI$CE®$ STRYDE™ System

gap. These modifications to the PRECI$CE System do not change the indications for use or intended use of the device, nor do they change the fundamental scientific technology of the device.

E. **Intended Use**
The PRECI$CE STRYDE System is indicated for limb lengthening, open and closed fracture fixation, pseudoarthrosis, mal-unions, non-unions, or bone transport of long bones.

F. **Comparison of Technological Characteristics with the Predicate Device**
As was established in this submission, the subject PRECI$CE STRYDE System is substantially equivalent to the predicate PRECI$CE System (K173129) previously cleared by the FDA for commercial distribution in the United States. There have been no design changes to the implants previously cleared in the predicate 510(k)s. The subject device has been shown to be substantially equivalent and have equivalent technological characteristics to its predicate device through comparison in areas including design, labeling/intended use, material composition, and function.

G. **Performance Data**
Nonclinical performance verification testing was performed to demonstrate that the subject PRECI$CE STRYDE System is substantially equivalent to the predicate device. The following testing was performed:

<table>
<thead>
<tr>
<th>Testing Description</th>
<th>Applicable Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Static Compression</td>
<td>ASTM F1264 - Standard Specification and Test Methods for Intramedullary Fixation Devices</td>
</tr>
<tr>
<td>Bending Strength</td>
<td></td>
</tr>
<tr>
<td>Dynamic Compression</td>
<td></td>
</tr>
<tr>
<td>Bending strength</td>
<td></td>
</tr>
<tr>
<td>Torsion</td>
<td></td>
</tr>
<tr>
<td>Torque Resistance</td>
<td>ASTM F543 - Standard Specification and Test Methods for Metallic Medical Bone Screws</td>
</tr>
<tr>
<td>Axial Pullout</td>
<td>N/A</td>
</tr>
<tr>
<td>Tensile Strength</td>
<td>N/A</td>
</tr>
<tr>
<td>Distraction Force</td>
<td>N/A</td>
</tr>
</tbody>
</table>

The results demonstrate that the subject PRECI$CE STRYDE System is substantially equivalent to the predicate.

H. **Conclusions**
The subject PRECI$CE STRYDE System has been shown to be substantially equivalent to the legally marketed predicate device for its intended use.
