510(k) Summary of Safety and Effectiveness

<table>
<thead>
<tr>
<th>Statement</th>
<th>Information supporting claims of substantial equivalence, as defined under the Federal Food, Drug and Cosmetic Act, respecting safety and effectiveness is summarized below. For the convenience of the Reviewer, this summary is formatted in accordance with the Agency’s final rule “…510(k) Summaries and 510(k) Statements…” (21 CFR §807) and can be used to provide a substantial equivalence summary to anyone requesting it from the Agency.</th>

<tbody>
<tr>
<td>Device description</td>
<td>The Niobe Magnetic Navigation System [MNS] is an interventional workstation for the navigation of appropriately equipped, magnetically adapted, devices (e.g., catheters or guidewires) through tissue to designated target sites. The system uses computer-controlled permanent magnets for orienting the tip of a magnetic device. The system employs magnetic fields to <em>orient</em> or <em>steer</em> the tip of a magnetic device.</td>
</tr>
<tr>
<td>Intended use</td>
<td>The Niobe MNS is intended to navigate a magnetic device through tissue to designated target sites in the right and left heart and coronary vasculature by orienting the device tip in a desired direction.</td>
</tr>
<tr>
<td>Substantial equivalence</td>
<td>The Niobe MNS is substantially equivalent to the Telstar Magnetic Navigation System [MNS], K013484.</td>
</tr>
<tr>
<td>Technological characteristics</td>
<td>The Niobe Magnetic Navigation System employs application of magnetic fields to orient the distal tip of a magnetically-adapted device (e.g., catheter or guidewire).</td>

510(k) Summary of Safety and Effectiveness, Continued

Physical testing
Performance testing has demonstrated substantial equivalence of the new device to the predicate device.

Preclinical animal and clinical performance data
The Niobe MNS is a modification of the predicate Telstar MNS. Clinical data are not necessary to support the modifications. Clinical application data for magnetic navigation were provided in K013484. Performance of the Niobe MNS was demonstrated in three canine studies.

Re: K021555
Trade Name: Niobe™ Magnetic Navigation System
Regulation Number: 21 CFR 870.1290
Regulation Name: Steerable Catheter Control System
Regulatory Class: Class II (two)
Product Code: DXX
Dated: December 6, 2002
Received: December 9, 2002

Dear Dr. Takes:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (301) 594-4646. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97) you may obtain.

Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its Internet address http://www.fda.gov/cdrh/dsma/dsmamain.html

Sincerely yours,

Enclosure
Appendix 2: Indications for Use Statement

Indications for Use Statement:

510(k) Number: K 021555

Device Name: Niobe Magnetic Navigation System [MNS]

Indications for Use: The Niobe MNS is intended to navigate a magnetic device through tissue to designated target sites in the right and left heart and coronary vasculature by orienting the device tip in a desired direction.

The information herein is considered CONFIDENTIAL to STEREOTAXIS, Inc. in accordance with the provisions and expectations of 21 CFR §20.61, 21 CFR §812.38, and 21 CFR §814.9.
