Re: K201466
Trade/Device Name: Tranberg CLS Laser Applicator
Regulation Number: 21 CFR 878.4810
Regulation Name: Laser surgical instrument for use in general and plastic surgery and in dermatology
Regulatory Class: Class II
Product Code: GEX
Dated: February 22, 2021
Received: February 26, 2021

Dear David Makanani:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. Although this letter refers to your product as a device, please be aware that some cleared products may instead be combination products. The 510(k) Premarket Notification Database located at https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfpmn/pmn.cfm identifies combination product submissions. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803) for devices or postmarketing safety reporting (21 CFR 4, Subpart B) for combination products (see https://www.fda.gov/combination-products/guidance-regulatory-information/postmarketing-safety-reporting-combination-products); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820) for devices or current good manufacturing practices (21 CFR 4, Subpart A) for combination products; and, if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

For comprehensive regulatory information about medical devices and radiation-emitting products, including information about labeling regulations, please see Device Advice (https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance) and CDRH Learn (https://www.fda.gov/training-and-continuing-education/cdrh-learn). Additionally, you may contact the Division of Industry and Consumer Education (DICE) to ask a question about a specific regulatory topic. See the DICE website (https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/contact-us-division-industry-and-consumer-education-dice) for more information or contact DICE by email (DICE@fda.hhs.gov) or phone (1-800-638-2041 or 301-796-7100).

Sincerely,

Jessica Mavadia-shukla -S

Indication for Use

510(k) Number: K201466

Device Name: TRANBERG^{CLS} Laser Applicator

Indications for Use:

The TRANBERG^{CLS} Laser Applicator is indicated for use to necrotize or coagulate soft tissue through interstitial irradiation or thermal therapy in medicine and surgery in cardiovascular thoracic surgery (excluding the heart and the vessels in the pericardial sac), dermatology, ear-nose-throat surgery, gastroenterology, general surgery, gynecology, head and neck surgery, neurosurgery, plastic surgery, pulmonology, radiology, and urology, for wavelengths 980nm through 1064nm.

Prescription Use: X AND/OR Over-The-Counter Use: NO

(Part 21 CFR 801 Subpart D) (21 CFR 801 Subpart C)

DEVICE NAME
- Classification: Class II
- Trade Name: TRANBERG® Laser Applicator
- Common Name: TRANBERG® Laser Applicator
- Classification: 21 CFR 878.4810
- Product Code: GEX - Powered Laser Surgical Instrument
- Review Panel: General and Plastic Surgery

PREDICATE DEVICE:
- K163103, Clinical LaserThermia Systems Tranberg® Laser Diffuser Fiber

INTENDED USE:
The TRANBERG® Laser Applicator is indicated for use to necrotize or coagulate soft tissue through interstitial irradiation or thermal therapy in medicine and surgery in cardiovascular thoracic surgery (excluding the heart and the vessels in the pericardial sac), dermatology, ear-nose-throat surgery, gastroenterology, general surgery, gynecology, head and neck surgery, neurosurgery, plastic surgery, pulmonology, radiology, and urology, for wavelengths 980nm through 1064nm.

DEVICE DESCRIPTION:
The TRANBERG® Laser Applicator is used to transfer laser energy from the laser unit to the location for the treatment.
The laser Applicator is designed with a core of 550 μm. The fiber length is 3 and 12m and it has a standard connector SMA 905 to fit the laser unit. The numerical aperture is at 0.22.

The Laser Applicator is used with an introducer and both (fiber and introducer), are delivered sterile and for single use only. The introducer consists of an introducer stylet and introducer catheter with a fiber lock

**TECHNOLOGICAL CHARACTERISTIC AND SUBSTANTIAL EQUIVALENCE:**

This device is identical in construction and design as the predicate device.

**PERFORMANCE TESTING - (NON-CLINICAL) BENCH**

The Tranberg® Laser Applicator has been determined through engineering testing to support substantial equivalence with this device and the predicate. This testing showed the Tranberg® Laser Applicator to meet applicable ISO, IEC and FDA safety and performance standards.

**PERFORMANCE TESTING – CLINICAL**

There are no clinical data submitted with this Notification.

**CONCLUSION:**

Based on the results of non-clinical testing, the TRANBERG® Laser Applicator performs according to specifications, and as intended, and the comparative discussion of intended use, principle of operation, and technological characteristics, has determined that the Tranberg® Laser Applicator is substantially equivalent to the predicate device.
