Re: K202612

Trade/Device Name: Sensititre 20-24 hour *Haemophilus influenzae* /*Streptococcus pneumoniae* MIC or Breakpoint Susceptibility System with Dtest (containing erythromycin at 1 µg/mL and clindamycin at 0.5 µg/mL)

Regulation Number: 21 CFR 866.1640
Regulation Name: Antimicrobial Susceptibility Test Powder
Regulatory Class: Class II
Product Code: JWY, LRG, LTT
Dated: August 31, 2020
Received: September 9, 2020

Dear Cynthia Knapp:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. Although this letter refers to your product as a device, please be aware that some cleared products may instead be combination products. The 510(k) Premarket Notification Database located at [https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfpmn/pmn.cfm](https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfpmn/pmn.cfm) identifies combination product submissions. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's
requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801 and Part 809); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803) for devices or postmarketing safety reporting (21 CFR 4, Subpart B) for combination products (see https://www.fda.gov/combination-products/guidance-regulatory-information/postmarketing-safety-reporting-combination-products); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820) for devices or current good manufacturing practices (21 CFR 4, Subpart A) for combination products; and, if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

For comprehensive regulatory information about medical devices and radiation-emitting products, including information about labeling regulations, please see Device Advice (https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance) and CDRH Learn (https://www.fda.gov/training-and-continuing-education/cdrh-learn). Additionally, you may contact the Division of Industry and Consumer Education (DICE) to ask a question about a specific regulatory topic. See the DICE website (https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/contact-us-division-industry-and-consumer-education-dice) for more information or contact DICE by email (DICE@fda.hhs.gov) or phone (1-800-638-2041 or 301-796-7100).

Sincerely,

Ribhi Shawar -S

Indications for Use

510(k) Number *(if known)*
K202612

Device Name
Sensititre 20-24 hour *Haemophilus influenzae/Streptococcus pneumoniae* MIC or Breakpoint Susceptibility System with Dtest (containing erythromycin at 1 μg/ml and clindamycin at 0.5 μg/ml)

Indications for Use *(Describe)*
The Sensititre *Haemophilus influenzae/Streptococcus pneumoniae* (HP) MIC or Breakpoint Susceptibility System is an in vitro diagnostic product for clinical susceptibility testing of *Haemophilus influenzae*, *Streptococcus pneumoniae*, and *Streptococcus* species.

The Sensititre*® Haemophilus influenzae/Streptococcus pneumoniae* (HP) MIC or Breakpoint Susceptibility System with Dtest (containing erythromycin at 1 μg/ml and clindamycin at 0.5 μg/ml) broth test for *Streptococcus pneumoniae* and *Streptococcus* spp.-β-Hemolytic Group is an in vitro diagnostic product for clinical susceptibility testing.

The Dtest for broth microdilution is for the detection of inducible clindamycin resistance in *Streptococcus* spp. resistant to erythromycin (MICs ≥ 1μg/mL) and either susceptible (MIC ≤ 0.25 μg/mL) or intermediate (MIC equal to 0.5 μg/mL) to clindamycin.

Dtest is intended for use with the following *Streptococcus* species:

*Streptococcus pneumoniae*
*Streptococcus agalactiae*
*Streptococcus pyogenes*

Type of Use *(Select one or both, as applicable)*

- [ ] Prescription Use (Part 21 CFR 801 Subpart D)
- [x] Over-The-Counter Use (21 CFR 801 Subpart C)
