**510(k) Summary**

This 510(k) Summary for the EBI AIS System is provided as required per Section 513(i)(3) of the Food, Drug and Cosmetic Act.

1. **Submitter:** Frederic Testa, RAC
   Regulatory Affairs Project Manager
   EBI, L.P.
   100 Interpace Parkway
   Parsippany, NJ 07054
   
   **Contact Person:**
   Frederic Testa, RAC
   Telephone: 973-299-9300
   Fax: 973-257-0232

   Date prepared: August 13, 2004

2. **Proprietary Name:** EBI CAS Spine Spacer System
   **Common Name:** Spinal Fixation Device
   **Classification Name/Code:** Spinal Vertebral Body Replacement Device/MQP

3. **Predicate or legally marketed devices that are substantially equivalent:**

   - EBI ESL Spine Spacer System (K040482)
   - EBI Ionic Spine Spacer System (K020887)

4. **Description of the device:**
   The CAS Spine Spacer System is design modification of the EBI ESL Spine Spacer System. The EBI CAS Spine System is a vertebral body replacement device consisting of one curved implant. The pyramidal teeth on the superior and inferior ends resist expulsion in all directions. The device is available in flat or lordotic angles. The device is open in the transverse plane to allow the surgeon to pack the device with bone graft prior to insertion. There are also holes through the anterior-posterior direction to allow for more bone growth through the device. The EBI CAS Spine Spacer System is intended for use with the FBI NGC Spinal System, the FBI Omega21™ Spinal System, EBI SpineLink™ II Spinal System, or the FBI Array Spinal System as a supplemental internal fixation system.

5. **Intended Use:**
   The EBI CAS Spine Spacer System is intended for use in the thoracolumbar spine (i.e., T1- L5) for partial replacement (i.e., partial vertebrectomy) of a diseased vertebral body resected or excised for the treatment of tumors in order to achieve anterior decompression of the spinal cord and neural tissues, and to restore the height of a collapsed vertebral body. The EBI CAS Spine Spacer System is also indicated for treating fractures of the thoracic and lumbar spine. The EBI CAS Spine Spacer System is designed to restore the biomechanical integrity of the anterior, middle, and posterior spinal column even in the absence of fusion for a prolonged period of time. The system must be used in conjunction with the EBI NGC Spinal System, EBI Omega 21 Spinal System, EBI SpineLink II Spinal System, or the EBI Array Spinal System.

6. **Materials:**
   The CAS Spine Spacer System is manufactured from Titanium, Ti-6Al-4V ELI, per ASTM F136.
7. **Comparison of the technological characteristics of the device to predicate devices:** There are no significant differences between the EBI CAS Spine Spacer System and other currently marketed spine systems. The EBI CAS Spine Spacer System is substantially equivalent* to the predicate devices in regards to intended use, materials and function. Mechanical testing comparing the EBI ESL Spine Spacer System to a predicate system demonstrated that the device complies with applicable standards and guidelines and meets all of its functional requirements.

*Any statement made in conjunction with this submission regarding a determination of substantial equivalence to any other product is intended only to relate to whether the product can be lawfully marketed without pre-market approval or reclassification and is not intended to be interpreted as an admission or any other type of evidence in patent infringement litigation. [Establishment Registration and Premarket Notification Procedures, Final Regulation, Preamble, August 23, 1977, FR 42520 (Docket No. 76N-0355.].]

Re: K042268
   Trade/Device Name: EBI CAS Spine Spacer System
   Regulation Number: 21 CFR 888.3060
   Regulation Name: Spinal intervertebral body fixation orthosis
   Regulatory Class: II
   Product Code: MQP
   Dated: September 28, 2004
   Received: September 29, 2004

Dear Mr. Testa:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.
This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (240) 276-0120. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its Internet address http://www.fda.gov/cdrh/dsma/dsmamain.html

Sincerely yours,

Celia M. Witten, Ph.D., M.D.
