Summary of Safety and Effectiveness

Liquichek Specialty Immunoassay Control

1.0 Submitter

Bio-Rad Laboratories
9500 Jeronimo Road,
Irvine, California 92618-2017
Telephone: (949) 598-1200
Fax: (949) 598-1557

Contact Person

Suzanne Parsons
Regulatory Affairs Specialist
Telephone: (949) 598-1467

Date of Summary Preparation

November 2, 2004

2.0 Device Identification

Product Trade Name: Liquichek Specialty Immunoassay Control
Common Name: Multi-analyte controls, (assayed and unassayed)
Classifications: Class I
Product Code: JJY
Regulation Number: 21 CFR 862.1660

3.0 Device to Which Substantial Equivalence is Claimed

Lyphochek Immunoassay Plus Control
Bio-Rad Laboratories
Irvine, California

510 (k) Number: K981532

4.0 Description of Device

Liquichek Specialty Immunoassay Control is prepared from human serum with added constituents of human and animal origin, chemicals, stabilizers, and preservatives. This product is provided in liquid form.

5.0 Intended Use

Liquichek Specialty Immunoassay Control is intended for use as a quality control serum to monitor the precision of laboratory testing procedures for analyte listed in the package insert.
6.0 **Comparison of the new device with the Predicate Device**

Liquichek Specialty Immunoassay Control claims substantial equivalence to the Lyphochek Immunoassay Plus Control currently in commercial distribution (K981532). Both products are serum based products that contain multiple analytes used to monitor precision of laboratory testing procedures.

7.0 **Statement of Supporting Data**

Stability studies have been performed to determine the open vial stability and shelf life for the Liquichek Specialty Immunoassay Control. Product claims are as follows:

7.1 Open vial 30 days at 2°C to 8°C with the following exceptions: Anti-Tg and Anti-TPO will be stable for 21 days

7.2 Shelf Life Stability 2 Years at -20 to -70°C

All supporting data is retained on file at Bio-Rad Laboratories.

Re: k043108  
Trade/Device Name: Liquichek Specialty Immunoassay Control  
Regulation Number: 21 CFR 862.1660  
Regulation Name: Quality Control Material (Assayed and Unassayed)  
Regulatory Class: Class I  
Product Code: JJY  
Dated: November 4, 2004  
Received: November 9, 2004

Dear Ms Parsons:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to legally
marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (240) 276-3084. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its Internet address http://www.fda.gov/cdrh/dsma/dsmamain.html

Sincerely yours,
