510(k) Summary per 21 CFR 807.92(c)

510(k) # K070425

SUBMITTER: Chattanooga Group, A Division of Encore Medical, L.P. 
4717 Adams Road 
Hixson, TN 37343

ESTABLISHMENT REGISTRATION: 1022819

CONTACT: Michael Treas, Manager of Regulatory Affairs

DATE PREPARED: May 31, 2007

PROPRIETARY NAME: Vitalstim Experia

MODELS: 5950, 5951

CLASSIFICATION: Class II

PRODUCT CODES: IPF, HCC

REGULATION NUMBERS 21 CFR 890.5850- Stimulator, Muscle, Powered

AND COMMON NAMES: 21 CFR 882.5050- Biofeedback device

PANEL: Physical Medicine

Description:
Vitalstim Experia therapy is a comprehensive electrotherapy device for treating patients suffering from dysphagia. It is a prescription device administered to patients by or under the direction of a licensed healthcare provider in hospitals, post acute care facilities, nursing homes and outpatient clinics. The intended use is achieved by the benefit of powered muscle stimulation and muscle activity biofeedback in one comprehensive device. The intended patient outcome is to regain control of muscles to swallow food without aspirating.

Indications for Use:
Muscle re-education by application of external stimulation to the muscles necessary for pharyngeal contraction.

Intended Uses:
VitalStim™ waveform is a square symmetrical biphasic waveform with interphase interval pulse with the application for use on the swallowing musculature in the anterior portion of the neck. The intended uses are:
The VitalStim waveform intended uses are muscle re-education of the swallowing musculature in the treatment of dysphagia (swallowing problems) from any etiology except mechanical causes that would need surgical intervention (for instance, obstructing tumors). Non-mechanical causes of dysphagia include: neurological and muscle disorders; cardiovascular accidents; respiratory disorders with swallowing complications; iatrogenic conditions (conditions caused by surgery); fibrosis/stenosis arising from radiation; disuse due to stroke, intubation, or birth-related anoxic injuries; and trauma to the head and neck. This device is a prescription device intended for use by or on the order of a physician or other licensed health professional.
VMSTM waveform is a square symmetrical biphasic waveform with the application for use on the musculature of the face. The intended uses are:

Optional application of sEMG biofeedback with Muscle Stimulation VMSTM waveform for prevention or retardation of disuse atrophy, for muscle re-education, and for relaxation of muscle spasms in the treatment of swallowing musculature dysfunction in post-traumatic conditions or after neurological insult with impaired neuromuscular function.

HVPC™ waveform is a very brief pulsed monophasic waveform with the application for use on the musculature of the face. The intended uses are:

Optional application of sEMG biofeedback with Muscle Stimulation High Volt Pulsed Current (HVPC) waveform for prevention or retardation of disuse atrophy, for muscle re-education, and for relaxation of muscle spasms in the treatment of swallowing musculature dysfunction in post-traumatic conditions or after neurological insult with impaired neuromuscular function.

sEMG™ is surface biofeedback for use on the swallowing musculature of the face and/or anterior portion of the neck. The intended uses are:

The sEMG intended uses are surface electromyography biofeedback for relaxation training and muscle re-education.

Accessories: The Vitalstim Experia utilizes special patented patient electrodes and lead wires with indexed connectors to ensure proper connection for intended use. The uniqueness of the electrodes is in the convenient patented snap type connection for attaching to the patient lead wires, as well as their unique small size for use in the anterior portion of the neck.

Certification Program: The VitalStim dysphagia therapy certification program is recommended for healthcare providers prior to administering VitalStim dysphagia therapy. The Vitalstim certification program educates the healthcare professional on the indications, contraindications and the importance of electrode placement. It is recommended that only VitalStim electrodes be used with the Vitalstim Experia therapy device. Any supplemental electrodes must be cleared to market by the FDA specifically for use in the anterior portion of the neck, and for use with the Vitalstim Experia therapy device.
Declarations of Conformity

The Vitalstim Experia device is in compliance with the following FDA recognized Consensus Standards:

Truthful and Accurate Statement

A statement attesting to the truthfulness and accuracy of the information was included in the premarket submission.

Further Information

In the event that additional information is required, please contact:

Michael Treas

U.S.A.  
Telephone: (423) 870-2281 ext. 7207  
Fax: (423) 870-7404  
E-mail: Michael_Treas@ChattGroup.com
Dear Mr. Treas:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.
This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (240) 276-0120. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR Part 807.97). You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (240) 276-3150 or at its Internet address http://www.fda.gov/cdrh/industry/support/index.html.

Sincerely yours,

Mark N. Melkerson
