510(k) Summary

This summary of 510(k) safety and effectiveness information is being submitted in accordance with the requirements of 21 CFR 807.92(c)

510(k) Number K083125 pg. 1 of 2

Date Summary Prepared October 21, 2008

Trade Name Neuron™ Select Catheter

Common Name Percutaneous Catheter

Classification Name Percutaneous Catheter
(21 CFR Part 870.1250; Product Code DQY)

Submitted By Penumbra, Inc.
1351 Harbor Bay Parkway
Alameda, CA 94502

Predicate Devices

Neuron Intracranial Access System (K070970), manufactured by Penumbra, Inc.

Device Description

The Neuron Intracranial Access System has a Neuron Select Catheter 053 (predicate device), which is 3.5F and has multiple tip configurations, and a Neuron Select Catheter 070 (modified device) which is 5F and has multiple tip configurations. The Neuron Intracranial Access System also has a Neuron Delivery Catheter size 053, which tapers from 6F to 5F, and a Neuron Delivery Catheter 070, which is 6F.

Materials used in the Neuron Intracranial Access System devices are manufactured from medical grade materials that are commonly used in the industry, are similar or identical to the predicate devices, and have historically been demonstrated to be both biocompatible and suitable for this use.

Intended Use

The Neuron Intracranial Access System is indicated for the introduction of interventional devices into the peripheral, coronary, and neuro vasculature. The indication statement of

the Neuron Intracranial Access System is substantially equivalent to the legally marketed predicate devices.

Substantial Equivalence

The intended use, method of operation, methods of construction, and materials used are either identical or substantially equivalent to the existing, legally marketed, predicate devices. Therefore, Penumbra believes the Neuron Select Catheter size 070 is substantially equivalent to the predicate device.

Testing

Bench testing, *in vitro* testing, and *in vivo* testing have been performed on the device materials, components, subassemblies, and final assemblies. The devices tested acceptably met the specifications.

Re: K083125
Trade/Device Name: Neuron™ Select Catheter
Common Name: Catheter, Percutaneous
Regulation Number: 21 CFR 870.1250
Regulatory Class: II
Product Code: DQY
Dated: October 21, 2008
Received: October 22, 2008

Dear Ms. Brandner-Allen:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set

forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Center for Devices and Radiological Health's (CDRH's) Office of Compliance at (240) 276-0120. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR Part 807.97). For questions regarding postmarket surveillance, please contact CDRH's Office of Surveillance and Biometrics' (OSB's) Division of Postmarket Surveillance at 240-276-3474. For questions regarding the reporting of device adverse events (Medical Device Reporting (MDR)), please contact the Division of Surveillance Systems at 240-276-3464. You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (240) 276-3150 or at its Internet address <http://www.fda.gov/cdrh/industry/support/index.html>.

Sincerely yours,

Bram D. Zuckerman, M.D.
