Proposed Product
Trade Name: GSD Intense Pulsed Light System
Model: GP666C4 & GP666C
Product Code: GEX
Regulation Number: 21 CFR 878.4810
Device Class: Class II

Submission Purpose: New Device

Predicate Device:
Angelite Family of Intense Pulsed Light System (K083915)
SkinStation System (K030897)
Radiancy Mistral Device (K072331)

Device Description: The GSD Intense Pulsed Light System (GP666C4 and GP666C) is an intense pulsed light system which delivers intense pulsed light at a wavelength ranging from 400nm-1200nm. Intense Pulsed Light (IPL) systems work on the principles of selective photothermolysis. That is, causing...
thermal damage to target chromophores by using light of appropriate wavelength in pulses that exceeds the chromophores’ thermal relaxation time but sparing normal skin by limiting the pulse width below the thermal relaxation time for skin.

Test Conclusion

The GSD Intense Pulsed Light system is designed, tested and will be manufactured in accordance with both mandatory and voluntary standards, including:

SE Determination

The proposed device is Substantially Equivalent (SE) to the predicate device which is US legally market device. Therefore, the subject device is determined as safe and effectiveness.

Intended Use/Indication for Use

The GSD Intense Pulsed Light System (inclusive of the handpieces used to deliver pulsed-light energy) is indicated for use in surgical, aesthetic and cosmetic applications in the treatment of acne, treatment of benign pigmented lesions, hair removal, treatment of vascular lesions as following:

1. Intense Pulsed Light energy wavelengths from 500-1200nm are indicated for the treatment of pigmented lesions, hair removal, and treatment of vascular lesions.

2. Intense Pulsed Light energy wavelengths from 400nm-1200nm are indicated for the treatment of acne.

3. Intense Pulsed Light energy wavelengths from 750nm-1200nm are indicated for the treatment of benign pigmented lesions, hair removal, and treatment of vascular lesions.

Re: K091664
Trade/Device Name: GSD Intense Pulsed Light System
Regulation Number: 21 CFR 878.4810
Regulation Name: Laser surgical instrument for use in general and plastic surgery and in dermatology
Regulatory Class: Class II
Product Code: ONF
Dated: November 5 2009
Received: November 9, 2009

Dear Ms. Hong:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must
comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, "Misbranding by reference to premarket notification” (21CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/cdrh/mdr/ for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/cdrh/industry/support/index.html.

Sincerely yours,

Mark N. Melkerson

Indication For Use

510(k) Number (if known): Pending

Device Name: GSD Intense Pulsed Light System

Indications for Use:

The GSD Intense Pulsed Light System (inclusive of the handpieces used to deliver pulsed-light energy) is indicated for use in surgical, aesthetic and cosmetic applications in the treatment of acne, treatment of benign pigmented lesions, hair removal, treatment of vascular lesions as following:

1. Intense Pulsed Light energy wavelengths from 500-1200nm are indicated for the treatment of pigmented lesions, hair removal, and treatment of vascular lesions.
2. Intense Pulsed Light energy wavelengths from 400nm-1200nm are indicated for the treatment of acne.
3. Intense Pulsed Light energy wavelengths from 750nm-1200nm are indicated for the treatment of pigmented lesions, hair removal, and treatment of vascular lesions.
