Prepared on: 29th September 2009

Trade Name: Epidrum

Common Name: Loss of Resistance Device

Classification Name: Piston syringe

Class: II

Regulation Number: 880.5860

Product Code: FMF

Device Description: The Epidrum comprises a small chamber, featuring a female Luer inlet port and a male Luer exit port on opposing sides, with an expandable membrane as one of the sides between the ports.

The Epidrum is a single use device, manufactured from medical grade polymers.

Intended use: The Epidrum is intended for use in epidural procedures between a luer syringe and an epidural needle to give a clear visual signal that the needle tip has entered the epidural space.

Indications for Use:

The Epidrum is intended for use, in conjunction with an epidural needle, to verify the needle tip placement in the epidural space.
**Equivalent Device:** Avid-Nit Loss of Resistance Syringe

**510K Number:** K001731

**Manufacturer:** Avid Medical Inc.
9000 Westmont Drive
Stonehouse Commerce Park
Toano
Virginia 23168

### Comparison:

<table>
<thead>
<tr>
<th><strong>Epidrum</strong></th>
<th><strong>Avid-nit LOR Syringe</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Intended Use</strong></td>
<td>Intended for use between a Luer syringe and an epidural needle to give a clear visual signal that the needle tip has entered the epidural space.</td>
</tr>
<tr>
<td><strong>Indications For Use</strong></td>
<td>The Epidrum is intended for use, in conjunction with an epidural needle to verify the needle tip placement in the epidural space.</td>
</tr>
<tr>
<td><strong>Technological Differences:</strong></td>
<td>The design incorporates an expandable membrane which deflates when the needle tip enters the epidural space giving an instantaneous, clear, visual signal.</td>
</tr>
</tbody>
</table>

**Conclusion:** Although the Epidrum uses different senses of the user (visual:touch) from the Loss of Resistance Syringe mentioned above, it operates on precisely the same loss of resistance principle, has the same intended use and raises no new questions of safety and effectiveness.

Dear Ms. Margaret Blackmore:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.
Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm for the Center for Devices and Radiological Health’s (CDRH’s) Office of Compliance. Also, please note the regulation entitled, “Misbranding by reference to premarket notification” (21CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Anthony D. Watson, B.S., M.S., M.B.A.
