

NDA 21-289

Ferring Pharmaceuticals, Inc.  
Attention: Ronald Nardi, Ph.D.  
Vice President, Regulatory and Scientific Affairs  
120 White Plains Road  
Tarrytown, NY 10591

Dear Dr. Nardi:

Please refer to your new drug application (NDA) dated October 31, 2001, received November 6, 2002, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act for Bravelle™ (urofollitropin for injection, purified).

We acknowledge receipt of your submissions dated July 30, August 3, August 9, and September 10, 2001, and January 29, February 25, 27, April 8, 12, 18, 25, 26, 30, and May 1, 3, 6, 2002. Your submission of October 31, 2001, constituted a complete response to our July 27, 2001, action letter.

This new drug application provides for the use of Bravelle™ (urofollitropin for injection, purified) for ovulation induction.

We have completed the review of this application, as amended, and have concluded that adequate information has been presented to demonstrate that the drug product is safe and effective for use as recommended in the agreed upon enclosed labeling text. Accordingly, the application is approved effective on the date of this letter.

The final printed labeling (FPL) must be identical to the enclosed labeling (text for the package insert, text for the patient package insert, immediate container and carton labels). Marketing the product with FPL that is not identical to the approved labeling text may render the product misbranded and an unapproved new drug.

Please submit the copies of final printed labeling (FPL) electronically according to the guidance for industry titled *Providing Regulatory Submissions in Electronic Format - NDA* (January 1999). Alternatively, you may submit 20 paper copies of the FPL as soon as it is available but no more than 30 days after it is printed. Please individually mount ten of the copies on heavy-weight paper or similar material. For administrative purposes, this submission should be designated "FPL for approved NDA 21-289." Approval of this submission by FDA is not required before the labeling is used.

NDA 21-289

Validation of the regulatory methods has not been completed. At the present time, it is the policy of the Center not to withhold approval because the methods are being validated. Nevertheless, we expect your continued cooperation to resolve any problems that may be identified.

Be advised that, as of April 1, 1999, all applications for new active ingredients, new dosage forms, new indications, new routes of administration, and new dosing regimens are required to contain an assessment of the safety and effectiveness of the product in pediatric patients unless this requirement is waived or deferred (63 *FR* 66632). We are waiving the pediatric study requirement for this action on this application.

In addition, please submit three copies of the introductory promotional materials that you propose to use for this product. All proposed materials should be submitted in draft or mock-up form, not final print. Please submit one copy to this Division and two copies of both the promotional materials and the package insert directly to:

Division of Drug Marketing, Advertising, and Communications, HFD-42  
Food and Drug Administration  
5600 Fishers Lane  
Rockville, Maryland 20857

Please submit one market package of the drug product when it is available.

We remind you that you must comply with the requirements for an approved NDA set forth under 21 CFR 314.80 and 314.81.

If you have any questions, call Archana Reddy, M.P.H., Regulatory Project Manager, at (301) 827-4260.

Sincerely,

*{See appended electronic signature page}*

Daniel Shames, M.D.  
Acting Director  
Division of Reproductive and Urologic Drug Products  
Office of Drug Evaluation III  
Center for Drug Evaluation and Research
