

ANDA 78-785

Emcure Pharmaceuticals USA Inc.
U.S. Agent for Emcure Pharmaceuticals Ltd.
Attention: Nilesh Patel
21B/Cotters Lane
East Brunswick, NJ 08816

Dear Sir:

This is in reference to your abbreviated new drug application (ANDA) dated January 9, 2007 submitted pursuant to section 505(j) of the Federal Food, Drug, and Cosmetic Act (the Act), for Atazanavir Sulfate Capsules, 100 mg (base), 150 mg (base), and 200 mg (base).

Reference is also made to your amendments dated March 21, April 2, May 2, May 31, June 29, and July 23, 2007.

This application has been reviewed according to the expedited review provisions of the President's Emergency Program for AIDS Relief (PEPFAR).

We have completed the review of this ANDA, and based upon the information you have presented to date we have concluded that the drug is safe and effective for use as recommended in the submitted labeling. However, we are unable to grant final approval to your ANDA at this time because of the patent issue noted below. Therefore, the ANDA is **tentatively approved**. This determination is based upon information available to the agency at this time, (i.e., information in your ANDA and the status of current good manufacturing practices (cGMPs) of the facilities used in the manufacturing and testing of the drug product). This determination is subject to change on the basis of new information that may come to our attention.

The reference listed drug (RLD) upon which you have based your ANDA, Reyataz Capsules, 100 mg (base), 150 mg (base), and 200 mg (base), of Bristol Myers Squibb, is subject to periods of patent protection. As noted in the agency's publication titled Approved Drug Products with Therapeutic Equivalence Evaluations (the "Orange Book"), U.S. Patent Nos. 5,849,911 (the '911 patent) and

6,087,383 (the '383 patent) are scheduled to expire on April 9, 2017 and December 21, 2018, respectively. Your ANDA contains paragraph III certifications to each of the patents under section 505(j)(2)(A)(vii)(III) of the Act stating that Emcure Pharmaceuticals Ltd. will not market Atazanavir Sulfate Capsules, 100 mg (base), 150 mg (base), and 200 mg (base) prior to the expiration of the patents. Therefore, final approval of your ANDA may not be made effective pursuant to section 505(j)(5)(B)(ii) of the Act until the patents have expired, currently, December 21, 2018.

To reactivate your ANDA prior to final approval, please submit a "MINOR AMENDMENT - FINAL APPROVAL REQUESTED" 90 days prior to the date you believe that your ANDA will be eligible for final approval. This amendment should provide the legal/regulatory basis for your request for final approval and should include a copy of a court decision, or a settlement or licensing agreement, as appropriate. It should also identify changes, if any, in the conditions under which the ANDA was tentatively approved, i.e., updated information such as final-printed labeling, chemistry, manufacturing, and controls data as appropriate. This amendment should be submitted even if none of these changes were made, and it should be designated clearly in your cover letter as a MINOR AMENDMENT - FINAL APPROVAL REQUESTED.

In addition to the amendment requested above, the agency may request at any time prior to the date of final approval that you submit an additional amendment containing the requested information. Failure to submit either or, if requested, both amendments may result in rescission of the tentative approval status of your ANDA, or may result in a delay in the issuance of the final approval letter.

Any significant changes in the conditions outlined in this ANDA as well as changes in the status of the manufacturing and testing facilities' compliance with current good manufacturing practices (cGMPs) are subject to agency review before final approval of the application will be made. Such changes should be categorized as representing either "major" or "minor" changes, and they will be reviewed according to OGD policy in effect at the time of receipt. The submission of multiple amendments prior to final approval may also result in a delay in the issuance of the final approval letter.

This drug product may not be marketed without final agency approval under section 301 of the Act. The introduction or

delivery for introduction into interstate commerce of this drug product before the final approval date is prohibited under section 301 of the Act. Also, until the agency issues the final approval letter, this drug product will not be deemed approved for marketing under section 505 of the Act, and will not be listed in the "Orange Book." Should you believe that there are grounds for issuing the final approval letter prior to December 21, 2018, you should amend your ANDA accordingly.

For further information on the status of this ANDA or upon submitting an amendment to the ANDA, please contact Ted Palat, Project Manager, at 301-827-5849.

Sincerely yours,
