Dear Ms. DeFeo:

Please refer to your supplemental new drug application dated April 7, 2009, received April 8, 2009, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for CRESTOR® (rosuvastatin calcium) Tablets.

We acknowledge receipt of your submissions dated May 1, 11(2), and 21, July 1 and 31, August 5, 20, and 24, September 1, 11(2), and 14, October 2, 13, 19, and 30, November 13 and 23, and December 1, 4, 9, 10, 11(2), and 21, 2009, and January 11, 15, 19, 21, and 29 (email), 2010.

This supplemental new drug application provides for a new indication for CRESTOR for the primary prevention of cardiovascular disease, based on the results of Justification for the Use of statins in Primary prevention: an Intervention Trial Evaluating Rosuvastatin (JUPITER).

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.

**CONTENT OF LABELING**

As soon as possible, but no later than 14 days from the date of this letter, please submit the content of labeling [21 CFR 314.50(l)(1)(i)] in structured product labeling (SPL) format as described at [http://www.fda.gov/oc/datacouncil/spl.html](http://www.fda.gov/oc/datacouncil/spl.html) that is identical to the enclosed labeling (text for the package insert and patient package insert submitted January 29, 2010, by email). For administrative purposes, please designate this submission, “SPL for approved NDA 21366/S-016.

**REQUIRED PEDIATRIC ASSESSMENTS**

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients, new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the
product for the claimed indication(s) in pediatric patients unless this requirement is waived, deferred, or inapplicable.

We are waiving the pediatric study requirement for this application because necessary studies are impossible or highly impracticable. This is because the indication is for an adult-related condition.
