Dear Mr. Marini:

Please refer to your Supplemental New Drug Application (sNDA) dated and received July 22, 2011, submitted under section 505(b)(1) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Betapace AF (sotalol HCl) 80 mg, 120 mg, and 160 mg Tablets.

This "Changes Being Effected" supplemental new drug application provides for the following changes:

1. Under **WARNINGS, Anesthesia**, the section was revised from:

Anesthesia

The management of patients undergoing major surgery who are being treated with beta-blockers is controversial. Protracted severe hypotension and difficulty in restoring and maintaining normal cardiac rhythm after anesthesia have been reported in patients receiving beta-blockers.

To:

Major Surgery

Chronically administered beta-blocking therapy should not be routinely withdrawn prior to major surgery; however, the impaired ability of the heart to respond to reflex adrenergic stimuli may augment the risks of general anesthesia and surgical procedures.

We have completed our review of this supplemental application and it is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.
