Sairam Towers, Alexander Road
Secunderabad-500 003
Andhra Pradesh (AP)
India

Dear Mr. Bhattad:

Please refer to your New Drug Application (NDA) 22282 dated and received on May 20, 2011, submitted pursuant to section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act for Atazanavir Sulfate and Ritonavir Tablets, 300 mg/100 mg.

We acknowledge receipt of your submissions dated:

July 7, 2011
September 2, 2011

August 4, 2011
September 14, 2011

August 22, 2011

This NDA provides for the use of Atazanavir Sulfate and Ritonavir Tablets, 300 mg/100 mg in combination with other antiretrovirals for the treatment of HIV-1 infection.

This NDA was reviewed under the President's Emergency Plan for AIDS Relief (PEPFAR).

We completed our review of this application. It is **tentatively approved** under 21 CFR 314.105 for use as recommended in the agreed-upon labeling (refer to the enclosed text for the package insert and immediate container, carton, and bulk labels). Also refer to the agreed-upon labeling emailed on November 18, 2011, for the package insert. Based on the data provided, the expiration dating period is 24 months for Atazanavir Sulfate and Ritonavir Tablets, 300 mg/100 mg in HDPE bottles of 30, 90, and 120 tablets (with induction seals and desiccant) when stored at 25°C (77°F); excursions permitted to 15° to 30°C (59° to 86°F). ^{(b) (4)}

This determination is based upon information available to the Agency at this time [i.e., information in your application and the status of current good manufacturing practices (cGMPs) of the facilities used in manufacturing and testing of the drug product]. This determination is subject to change on the basis of any new information that may come to our attention.

Two of the listed reference drug products [REYATAZ[®] (atazanavir sulfate) and NORVIR[®] (ritonavir)] upon which you base your application are subject to a period of patents' protection and therefore, final approval of your application under section 505(c)(3) of the Act [21 U.S.C. 355(c)(3)] may not be made effective until the period has expired. If you have questions as to when this date will be, please contact the Agency at the information provided below.

Two or six months prior to the expiration of the patents' protection, as appropriate, submit an amendment to this application identifying changes, if any, in the conditions under which your product was tentatively approved. Any changes to the conditions outlined in this NDA require our review before final approval and the goal date for our review will be set accordingly. Your amendment should include updated labeling, chemistry, manufacturing and controls data, and a safety update. This amendment should include draft final printed labels and labeling which comply with all United States regulations (uniqueness of drug product appearance per 21 CFR 206; child-resistant packaging per 16 CFR 1700, etc.). This amendment should be designated clearly in your cover letter as a "**FINAL APPROVAL REQUESTED.**"

We remind you that you are expected to comply with the reporting requirements provided in 21 CFR 314.80 and 314.81. If the product is to be mass distributed in developing countries, a system of collecting and reporting adverse drug reactions by the distributor would be desirable (e.g., through governmental or nongovernmental agencies distributing the products).

We remind you that, should you intend to market this product in the United States after the period of patents' protection, you are required to join the antiretroviral pregnancy registry at that time and make the appropriate labeling change that references the existence of the pregnancy registry. In addition, an updated package insert (PI) must be submitted under the Structured Product Labeling requirements (<http://www.fda.gov/oc/datacouncil/spl.html>) as defined by the Physician's Labeling Rule [21 CFR 201.56, 201.57].

Before we issue a final approval letter, this NDA is not deemed approved. If you believe that there are grounds for issuing the final approval letter before the period of patents' protection has expired, you should amend your application accordingly.

Please note that this drug product may not be marketed in the United States without final Agency approval under Section 505 of the Act. The introduction or delivery for introduction into interstate commerce of this drug product before the final approval date is prohibited under Section 501 of the Act and 21 U.S.C. 331(d).

If you have any questions, please contact David Araujo, Pharm.D., Senior Program Consultant, at (301) 796-0669 or email at david.araujo@fda.hhs.gov.

Sincerely yours,
