Dear Ms. Roy,

Please refer to your Supplemental New Drug Application (sNDA) dated March 14, 2013, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for DEXEDRINE (dextroamphetamine sulfate) SPANSULE Sustained Release Capsules 5mg, 10mg, and 15mg.

We acknowledge receipt of your amendment dated May 20, 2013.

Reference is also made to an Agency letter dated June 20, 2012, informing you that the Agency identified cases suggestive of an association between the use of stimulants used for the treatment of Attention Deficit Hyperactivity Disorder and peripheral vascular instability or Raynaud's phenomenon, and requesting revisions to your product labeling.

This supplemental new drug application proposes the following revisions to product labeling:

1. Addition of a new subsection under **Warnings** entitled **Peripheral Vasculopathy, including Raynaud's phenomenon**.
2. Addition of a new subsection under **Precautions-Information for Patients** entitled *Circulation problems in fingers and toes [Peripheral vasculopathy, including Raynaud's phenomenon]*.
3. Revisions to the Medication Guide relating to peripheral vasculopathy, including Raynaud's phenomenon.

We have completed our review of this supplemental application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.
