Dear Dr. Horton:

Please refer to your Supplemental New Drug Application (sNDA) dated and received November 20, 2014, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for EPZICOM[®] (abacavir sulfate and lamivudine) tablets, 600 mg/300 mg.

We acknowledge receipt of your amendments dated February 11, 2015, March 5, 2015, August 27, 2015, September 10, 2015, September 11, 2015, and September 15, 2015.

This “Prior Approval” supplemental new drug application provides for once-daily dosing, in combination with other antiretroviral agents, for the treatment of HIV-1 infection in pediatric patients weighing at least 25 kg.

APPROVAL & LABELING

We have completed our review of this supplemental application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at <http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm>. Content of labeling must be identical to the enclosed labeling (text for the package insert and Medication Guide), with the addition of any labeling changes in pending “Changes Being Effectuated” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry titled “SPL Standard for Content of Labeling Technical Qs and As at

<http://www.fda.gov/downloads/DrugsGuidanceComplianceRegulatoryInformation/Guidances/UCM072392.pdf>.

The SPL will be accessible from publicly available labeling repositories. Also within 14 days, amend all pending supplemental applications that includes labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in MS Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes and annotate each change. To facilitate review of your submission, provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients, new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication(s) in pediatric patients unless this requirement is waived, deferred, or inapplicable.

We are waiving the pediatric study requirement for pediatric patients less than 6 years of age or weighing less than 25 kg because this combination does not provide a meaningful benefit over existing therapies; therefore, development of an age appropriate formulation for patients weighing less than 25 kg are not necessary.

FULFILLMENT OF POSTMARKETING REQUIREMENT

This Prior Approval Supplement was also submitted to fulfill the following PREA postmarketing requirement:

612-1 Deferred pediatric study under PREA for the treatment of HIV-1 infection in pediatric patients ages three months to 17 years.

The approval of this supplemental new drug application fulfills this postmarketing requirement.

This completes all of your postmarketing commitments and requirements acknowledged in our August 2, 2004, approval letter.
