Dear Dr. Biswas:

Please refer to your Supplemental Biologics License Application (sBLA), dated November 11, 2015, received November 12, 2015, and your amendments, submitted under section 351(a) of the Public Health Service Act for Extavia (interferon beta-1b).

This Prior Approval supplemental biologics application provides for the following revisions to the labeling:

- The addition of a new Warnings and Precautions subsection describing cases of drug-induced lupus erythematosus
- The addition of information pertaining to the removable rubber cap of the diluent pre-filled syringe containing natural rubber latex, including the following statement in Section 5.2 (Anaphylaxis and Other Reactions): “The removable rubber cap of the diluent (Sodium Chloride, 0.54% Solution) pre-filled syringe contains natural rubber latex, which may cause allergic reactions and should not be handled by latex-sensitive individuals. The safe use of EXTAVIA pre-filled syringe in latex-sensitive individuals has not been studied.”

We have completed our review of this supplemental application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.
