Raritan, NJ 08869

Dear Mr. Lewis:

Please refer to your Supplemental New Drug Application (sNDA) dated and received April 30, 2015, and your amendments, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for OLYSIO[®] (simeprevir) 150 mg capsules, for oral use.

This “Prior Approval” sNDA provides for revised dosing recommendations for the treatment of chronic hepatitis C virus (HCV) genotype 1 infection in treatment-naïve adult patients of East Asian ancestry.

APPROVAL & LABELING

We have completed our review of this supplemental application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.

WAIVER OF HIGHLIGHTS SECTION

Please note that we have previously granted a waiver of the requirements of 21 CFR 201.57(d)(8) regarding the length of Highlights of prescribing information.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at <http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm>. Content of labeling must be identical to the enclosed labeling (text for the package insert, text for the patient package insert), with the addition of any labeling changes in pending “Changes Being Effected” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry titled “SPL Standard for Content of Labeling Technical Qs and As at <http://www.fda.gov/downloads/DrugsGuidanceComplianceRegulatoryInformation/Guidances/UCM072392.pdf>

The SPL will be accessible from publicly available labeling repositories.

Also within 14 days, amend all pending supplemental applications that includes labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in MS Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes and annotate each change. To facilitate review of your submission, provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients, new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication(s) in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because none of these criteria apply to your application, you are exempt from this requirement.

FULFILLMENT OF POSTMARKETING REQUIREMENT

This Prior Approval sNDA was also submitted to fulfill the following postmarketing requirement:

2105-4 Submit the final report and datasets from the ongoing clinical trial TMC435HPC3005 entitled “A Phase 3, Randomized, Double-Blind, Double Dummy, Placebo-Controlled Study Conducted in the Asia-Pacific Region to Investigate the Efficacy, Pharmacokinetics, Safety and Tolerability of TMC435 vs. Placebo as Part of a Treatment Regimen Including Peginterferon alfa-2a and Ribavirin in Treatment-naïve, Genotype 1 Hepatitis C-Infected Subjects.”

The approval of this supplemental new drug application fulfills this postmarketing requirement.
